QUESTION 71 Hotspot Question You are managing a SharePoint farm. All users in the farm have access to a document library app. You need to begin the process of enabling managed terms for the app. Which option should you select? (To answer, select the appropriate option in the answer area.) Enterprise Metadata and Keywords Settings

Answer: Documents > Settings

QUESTION 72 Drag and Drop Question You are managing a SharePoint site collection that contains a site for each department. Users in the Accounting department have the following requirements for the department SharePoint site: All group members must be able to create document workspaces, approve site content, and add group members. Group membership must be visible only to group members. Other users must not be able to request group membership. You need to meet the requirements of the Accounting department. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

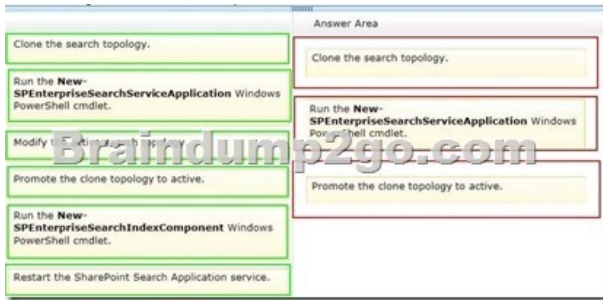

Answer:

QUESTION 73 You are configuring a query rule for a site in a SharePoint site collection. You need to promote specific search results during a defined date range only. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Configure actions for the rule. B. Configure query conditions for the rule. C. Add the rule with a source type. D. Add the rule without a source type. E. Configure publishing options for the rule. Answer: A, E Explanation: Without using any custom code, Search service application administrators, site collection administrators, and site owners can help searches respond to the intent of users by creating query rules. In a query rule, you specify conditions and correlated actions. When a query meets the conditions in a query rule, the search system performs the actions specified in the rule to improve the relevance of the search results, such as by narrowing results or changing the order in which results are displayed. For example, a query rule condition could be that a term in a query matches a particular term in a SharePoint term set, or that a query is frequently performed on a particular result source in a search system, such as videos. When the query rule condition is satisfied, a correlated action could be to show a specific item at the top of the search results. You can configure query rules for one or more result sources, and you can specify the time period during which the query rule is active. E: To make the query rule active during a particular time period, click Publishing, and then specify the period. Reference: Manage query rules in SharePoint Server 2013 QUESTION 74 Drag and Drop Question You are managing a SharePoint website. You need to add a search service component to the search topology. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

QUESTION 75 Drag and Drop Question A SharePoint group named Accounting contains 50 user accounts. Group members plan to store documents in a SharePoint app. You need to ensure that only Accounting group members can store or view documents in the app. You must achieve this goal without affecting existing apps or permissions, and by using the least amount of administrative effort. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

QUESTION 76 Drag and Drop Question You are managing a SharePoint farm. A user account named Admin1 is a member of the Farm Administrators group. A domain user account named Admin2 will manage a third-party SharePoint app, named App1, and the App Catalog in which it will reside. You need to make App1 available to users. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

QUESTION 77 Drag and Drop Question A SharePoint environment includes an enterprise search application. You are configuring the search application crawl schedule for a specific farm. You plan to configure the crawl schedule at set intervals of 15 minutes on a continuous basis. The relevant information for the farm is shown in the following graphic.

Name : Search Service Application
 Id : 1873
 ServiceName : Search Service Application

You need to ensure that search results are fresh and up-to-date for all SharePoint sites in the environment. Which Windows PowerShell cmdlets should you run? (To answer, drag the appropriate cmdlets to the correct variable or variables in the answer area. Each cmdlet may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Get-SPEnterpriseSearchCrawlContentSource - SearchApplication \$corpsearchapp

Get-SPEnterpriseSearchServiceApplication "Search Service Application"

Set-SPEnterpriseSearchCrawlContentSource - EnableContinuousCrawls 1

Set-SPEnterpriseSearchCrawlContentSource -ScheduleType Full Daily CrawlSchedule -CrawlScheduleRunEveryInterval 30

Set-SPEnterpriseSearchCrawlContentSource -ScheduleType Incremental - DailyCrawlScheduleCrawlScheduleRepeatInterval 15 - CrawlScheduleRepeatDuration 1440

Answer Area

Variable	Windows PowerShell cmdlet
\$corpsearchapp =	
\$contentsource =	
\$contentsource	

Answer:

Set-SPEnterpriseSearchCrawlContentSource - EnableContinuousCrawls 1

Set-SPEnterpriseSearchCrawlContentSource -ScheduleType Full Daily CrawlSchedule -CrawlScheduleRunEveryInterval 30

Braindump2go.com

Answer Area

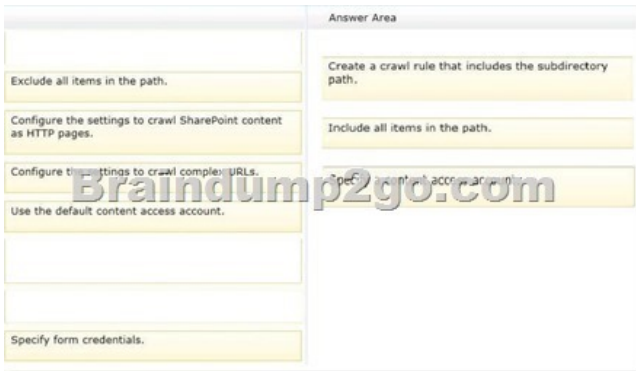

Variable	Windows PowerShell cmdlet
\$corpsearchapp =	Get-SPEnterpriseSearchServiceApplication "Search Service Application"
\$contentsource =	Get-SPEnterpriseSearchCrawlContentSource - SearchApplication \$corpsearchapp
\$contentsource	Set-SPEnterpriseSearchCrawlContentSource -ScheduleType Incremental - DailyCrawlScheduleCrawlScheduleRepeatInterval 15 - CrawlScheduleRepeatDuration 1440

QUESTION 78 Drag and Drop Question You are managing a SharePoint search topology. An external identity management system

handles all user authentication. SharePoint is not indexing some subdirectories of a public SharePoint site. You need to ensure that SharePoint indexes the specific subdirectories. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

QUESTION 79A company is planning to upgrade from SharePoint 2010 to SharePoint 2013. You need to find out the web traffic capacity of the SharePoint farm by using a Microsoft Visual Studio Team System project file. Which tool should you use? A. Network Monitor B. SharePoint Health Analyzer C. SharePoint Diagnostic Studio D. Load Testing Kit (LTK) Answer: D

QUESTION 80 You install SharePoint Server in a three-tiered server farm that meets the minimum requirements for SharePoint 2013 and surrounding technologies. The content databases will reside on Fibre Channel drives in a storage area network (SAN). The backup solution will utilize SAN snapshots. You are estimating storage requirements. You plan to migrate 6 TB of current content from file shares to SharePoint. You need to choose the content database size that will optimize performance, minimize administrative overhead, and minimize the number of content databases. Which content database size should you choose? A. 100 GBB. 200 GB C. 3 TBD. 6 TB Answer: C
