

(2016-Jun-Updated) Latest Microsoft 70-695 Free PDF from Braindump2go(NQ31-NQ42)

2016 June Microsoft Official New: 70-695 PDF and 70-695 VCE Dumps with 105q 70-695 Exam Questions Released by Braindump2go Today for Free Download! 100% Exam Pass Guaranteed! NEW Case Study 4 -Proseware Inc. (NEW QUESTION 34 - NEW QUESTION 42)

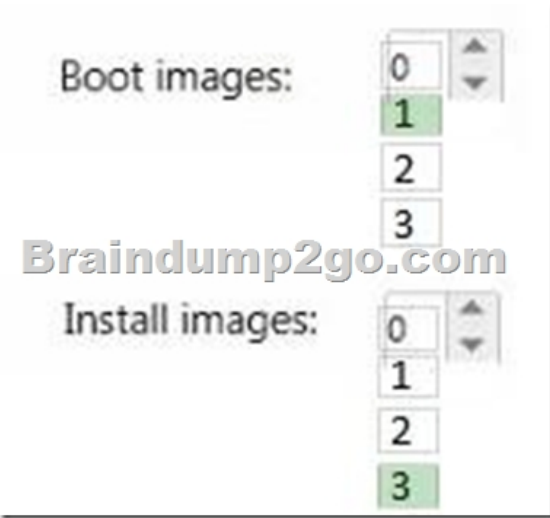

Overview General Overview Proseware Inc., is a manufacturing company that has 3,000 employees. The company has a sales department a marketing department, a research department, a customer service department, and a human resources department. **Physical Locations** Proseware has two main offices and five branch offices. The main offices are located in New York City and Paris. The branch offices are located throughout North America. All offices have a high-speed connection to the Internet. The offices connect to each other through the Internet by using VPN appliances. **Existing Environment** Active Directory The network contains two Active Directory forests named na.proseware.com and fr.proseware.com. Each forest contains a single domain. All domain controllers run Windows Server 2012 R2. The main office in New York City and all the branch offices each contain a domain controller for the na.proseware.com forest. The main office in Paris contains domain controllers for the fr.proseware.com forest only. Due to legal requirements, the na.proseware.com and fr.proseware.com forests must remain separate. Administrators from each forest are allowed to manage the resources in their respective forest only. Users from all of the departments are located in each office. Users in the research department store their research data in local folders on their computer. The data can be up to 100 GB on each computer. Each office is configured as an Active Directory site. All of the domain controllers are configured as DNS servers. All of the client computers are configured to connect to the DNS servers in their respective office only. All of the domain controllers are configured as DHCP servers. **New York Office** The computers in the New York City office are managed by using Microsoft System Center 2012 R2 Configuration Manager. The New York City office has the following servers and client computers:- A Key Management Service (KMS) server host- Client computers that run Windows 7 and Microsoft Office 2010- Five file servers that host multiple shared folders and run Windows Server 2012 R2- A server that runs Windows Server 2012 R2 and is configured as a Configuration Manager site server **Branch Offices** Each branch office has the following servers and client computers:- Client computers that run Windows 7 and Office 2010- A file server that hosts multiple shared folders and runs Windows Server 2012 R2- Currently, the branch offices are not managed by using the Configuration Manager deployment in the New York City office. **Paris Offices** The Paris office has the following servers and client computers:- Client computers that run Windows 7 and Office 2010- Five file servers that host multiple shared folders and run Windows Server 2012 R2- Currently, the activation of the client computers in the Paris office is performed manually. **Deployments** Currently, all new client computers are shipped initially to and imaged in the New York City office, and then shipped to the other offices. There are multiple images for both 32-bit and 64-bit computers. The images contain specific drivers for each type of computer. All of the computers are PXE-compatible. If a client computer must be reimaged, the reimaging is performed locally at each office by using a boot disk and a USB hard drive that contains multiple images. USB hard drives storing updated images are sent to each office every six months. **Applications** A third-party desktop application named App1 is used by the sales department. All of the users in the human resources department use an application named HR1. HR1 is installed by using a Windows Installer (MSI) package. HR1 is compatible with Windows 7 only. **Problem Statements** Proseware identifies the following issues:- Users in the branch offices report that it can take up to four weeks to receive a requested new client computer, which is too long.- If a client computer must be reimaged, it can take several hours before the computer is ready for use again due to the updates that must be applied.- Currently, the hardware used for the client computers in the Paris office is undocumented. All of the computers in the customer service department and the research department were replaced during the past year. **Requirements** Business Goals As much as possible, Proseware plans to minimize the costs associated with purchasing hardware and software. **Planned Changes** Proseware plans to deploy a new version of its standard operating environment (SOE). The new SOE will contain the following:- A volume license edition of Windows 8.1 Enterprise (64-bit)- A volume license edition of Office 2013 (32-bit)- A new line-of-business Windows Store app named App2 will be deployed. App2 will be used by all users.- New client computers will be delivered directly from the hardware vendor to each office. As a result, Proseware plans to change the imaging process. **Technical Requirements** Proseware identifies the following technical requirements:- Minimize the size of desktop images.- Centralize the activation of all the client computers.- Minimize the amount of network traffic over the VPN.- Minimize the number of desktop images that must be maintained.- Ensure that only the users in the human resources department can access HR1.- Ensure that the data of the research department users is retained while deploying the new image.- Minimize the amount of time it takes to upgrade the research department computers in the Paris office.- Ensure that a branch office administrator can deploy a new image to new client computers with minimal delay.- Ensure that the French language is configured as the default language for the client computers in the Paris office.- A network technician will visit each client

computer in the Paris office to start the operating system deployments.- Gather a detailed hardware inventory of all the client computers in the Paris office without installing any additional software on the computers.- Users in the research and customer service departments in the Paris office will have the new image deployed to their current computer. The current Windows installation will not be preserved during the upgrade.- All of the other client computers in the Paris office will be replaced with new computers during the next two years. During this time, some computers may need to be reimaged by using the current Windows image. QUESTION 34 You need to recommend a solution for the research department computers in the Paris office. Which action should you include in the recommendation? A. a User State Migration Tool (USMT) script that uses a remote migration store B. a User State Migration Tool (USMT) script that performs a hard-link migration C. a Configuration Manager package that performs a hard link migration D. a Configuration Manager package that uses remote configuration storage Answer: B QUESTION 35 You need to recommend a method to deploy the images to the new client computers in the Paris office. What should you include in the recommendation? A. a Configuration Manager secondary site B. a Windows Deployment Services (WDS) server C. a Windows To Go installation D. a cloud distribution point Answer: B QUESTION 36 You are evaluating deploying the new image to na.proseware.com in the branch offices by using Configuration Manager. You need to recommend changes to the existing environment to meet the technical requirements. What should you recommend deploying to each branch office? A. a software update point B. Windows Deployment Services (WDS) C. a secondary site D. an enrollment point Answer: C QUESTION 37 You need to recommend a solution to generate a report for the client computers in the Paris office. What should you include in the recommendation? A. Deploy the Configuration Manager client. B. Install and configure the Microsoft Deployment Toolkit (MDT). C. Install and configure the Microsoft Assessment and Planning (MAP) Toolkit. D. Install and configure the Windows Assessment and Deployment Kit (Windows ADK). Answer: C QUESTION 38 You need to recommend a solution for activation. What should you include in the recommendation? A. a Multiple Activation Key (MAK) proxy on a domain controller in the Paris office B. a cross-forest trust relationship C. Active Directory-Based Activation (ADBA) in the fr.proseware.com forest D. a service location (SRV) record in the fr.proseware.com domain Answer: D QUESTION 39 You need to capture the SOE image. You deploy Windows 8.1 Enterprise and all of the required applications to a new client computer in the New York City office. What should you do next? A. Run sysprep.exe /unattend:sysprep.xml. B. Create a Windows Deployment Services (WDS) capture image. C. Run sysprep.exe /oobe. D. Create a Configuration Manager capture task sequence. Answer: C QUESTION 40 Hotspot Question You are planning for the deployment of the new SOE image to the Paris office computers. You need to identify the minimum number of boot and install images required to meet the technical requirements. What should you identify? To answer, select the appropriate number for each image type in the answer area.

Boot images: 0 1 2 3

Install images: 0 1 2 3

Answer:

QUESTION 41 You need to identify the correct configuration pass to modify in an answer file for the client computers in the Paris office. Which configuration pass should you identify? A. auditUser B. generalize C. offlineServicing D. oobeSystem
 Answer: D
 Explanation: [https://technet.microsoft.com/en-gb/library/cc749307\(v=ws.10\).aspx](https://technet.microsoft.com/en-gb/library/cc749307(v=ws.10).aspx) Question Set 1 QUESTION 42 Drag and Drop Question You are planning the deployment of new applications for users in several departments. You have three user groups. The groups are shown in the following table.

Group	Restrictions
Finance	The client computers in the finance department are very old. There are no plans to upgrade the computers. The finance department computers may not have sufficient hardware resources to run some of the new applications.
Human resources	An application for the human resources department must run only when the client computers in the human resources department are connected to the internal network. The application must be executed locally.

You need to identify the appropriate application delivery method for each department. Which application delivery methods should you identify? To answer, drag the appropriate application delivery methods to the correct departments. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Group	Restrictions
Finance	The client computers in the finance department are very old. There are no plans to upgrade the computers. The finance department computers may not have sufficient hardware resources to run some of the new applications.
Human resources	An application for the human resources department must run only when the client computers in the human resources department are connected to the internal network. The application must be executed locally.
