QUESTION 211 Drag and Drop Question You work on a SharePoint Enterprise Content Management (ECM) project. You develop the Litware Document Approval workflow that enables a group of people to review, approve, or reject documents and document changes. You need to assign the Litware Document Approval workflow to the Document content type. How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 212 You create a cloud-hosted SharePoint app. You must make the app available in the SharePoint Store for customers to install on their host webs. You need to keep the style and navigation of the app the same as the host web of the app after it is installed by any customer. What should you do? A. Add a reference to SP.UI.Controls.js on the host web. Pass the AppUrl parameter to the host web. Apply branding to the host web. B. Copy the CSS file from the app to the host web. Run the Chrome control to convert the CSS file to the host web format. Apply the styles contained in the CSS file to the host web. C. Use a Chrome control to find the differences in the styles between the host web and the app. Resolve all of the differences by using JavaScript. D. Add a reference to the SP.UI.Controls.js file located in the new /_layouts/15 directory. Pass the HostUrl parameter to the start page of the app. Use the Chrome control in JavaScript. Answer: B

QUESTION 213 Hotspot Question You develop a SharePoint-hosted app that is used by internal users to read and write data. The app has the following requirements: - The app must be able to find and display the products that are purchased most often by customers. - The app must be able to read product information from a custom SQL Server database by using an external list. - The app must be able to read from and write to the user profile. - The app must be able to make changes to lists by using the minimum permissions necessary. - The app must be able to read enterprise keywords. You need to configure permissions for the app. Which scopes and permissions should you use? (To answer, select the appropriate options from each drop-down list in the answer area.)

Answer:

QUESTION 214 Drag and Drop Question You create a solution to access data contained in SharePoint by using a client-side object model (CSOM). How should you complete the relevant code? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 215 Adventure Works uses a SharePoint publishing site to host their public-facing website at <http://www.adventureworks.com>. The website gives external users the ability to register and sign in to the site to buy Adventure Works products. You notice that publicly registered users see the SharePoint ribbon. You need to ensure that the SharePoint ribbon is available only to content authors and administrators. What should you do? A. Open the current site master page in SharePoint

Designer, place the SharePoint:SPSecurityTrimmedControl control around the div tag with the s4-ribbonrow ID. Set the PermissionsString to ManageSubWeb.B. Open the current site master page in SharePoint Designer, find a div tag with the s4-ribbonrow ID, and then remove all of the contents of the div.C. Open the current site master page in SharePoint Designer and then place the SharePoint:SPSecurityTrimmedControl control around the div tag with the 34-ribbonrow ID. Set the PermissionsString to AddAndCustomizePages.D. In the SharePoint project, add an Empty Element and then use the <HideCustomAction> tag to hide the ribbon. Answer: B QUESTION 216 Adventure Works uses a web design firm to design the user interface for an upcoming toy sales website, www.toys.adventureworks.com. The website is built by using a SharePoint publishing template. Adventure Works must implement the newly designed user interface for the site. The design firm provides a set of HTML, CSS, and JavaScript files. You need to create and publish a SharePoint master page by using the supplied files. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A. From the Master Pages section in SharePoint Designer, select Create New Master Page and then replace the master page contents with the contents of the HTML file. B. From SharePoint Designer, open the master page gallery. Right-click the new master page and then select Set as Default Master. C. From the Design Manager, map a network drive to the /_layouts/masterpage/ folder. Then, in Windows Explorer, copy all the UI elements provided by the design team to the network share. D. From the Edit Master Page section in Design Manager, select Convert an HTML File to a SharePoint Master Page to generate a master page from the HTML file provided by designer firm. E. Publish the master page. Then, from Site Settings, choose the Look and Feel section, and then select Master Page. Choose the master page and select OK. F. Preview the master page and select Snippets to get HTML segments of the SharePoint top navigation, quick launch, and body. Then, edit the master page by using Microsoft Notepad and replace the HTML with the new segments. Answer: BDE Explanation: Note: D, Not A: To convert the HTML file into a .master file- Browse to your publishing site. - In the upper-right corner of the page, choose Settings, and then choose Design Manager. - In Design Manager, in the left navigation pane, choose Edit Master Pages. - Choose Convert an HTML file to a SharePoint master page. - In the Select an Asset dialog box, browse to and select the HTML file that you want to convert. etc QUESTION 217 You have an app named TaskManagerApp that is published at <http://sharepoint.contoso.com/apps>. You need to remove the app and ensure that users will no longer be able to use the app. Which Windows PowerShell cmdlets should you run?

A. Option AB. Option BC. Option CD. Option D Answer: A QUESTION 218 Hotspot Question You develop an autohosted app for SharePoint. The app will access SharePoint data in the host web. You need to configure the minimum required data access permissions for the app. How should you configure permissions in the app manifest? (To answer, select the appropriate option from each drop-down list in the answer area.)

Scope	Permissions
Search	Write
Web	Manage
Workflow	Read
	Write

Answer:

Scope	Permissions
Search	Write
Web	Manage
Workflow	Read
	Write

QUESTION 219 You are creating a Web Part that will be deployed as a sandboxed solution. You need to ensure that the Web Part can write debugging information to the SharePoint trace logs. Which class should the logging component inherit? A. SPDelegate B. SPLog C. SPPersistedObject D. SPProxyOperation Answer: D Explanation: MNEMONIC RULE: "sandboxed solution needs SPProxyOperation" You can implement your full-trust functionality in classes that derive from the SPProxyOperation abstract

class and deploy the assembly to the global assembly cache. These classes expose a full-trust proxy that you can call from within the sandbox environment. Full-trust proxies can provide a useful way to expose logging and configuration functionality to sandboxed applications. Hybrid Approaches <http://msdn.microsoft.com/en-us/library/ff798433.aspx>

QUESTION 220 Your organization has a department named product testing. You are creating a new membership named Product Testing. You are adding a distribution list to the new membership.
