2016 NEW 70-696 Exam Questions Released Today! Exam Code: 70-696 Exam Name: Managing Enterprise Devices and Apps Certification Provider: Microsoft Corresponding Certification: MCSE: Enterprise Devices and Apps 2016 NEW 70-696 Study Guides: 1. Deploy and manage virtual applications 2. Deploy and manage desktop and mobile applications 3. Plan and implement software updates 4. Manage compliance and Endpoint Protection settings 5. Manage Configuration Manager clients 6. Manage inventory using Configuration Manager 7. Provision and manage mobile devices QUESTION 81 Hotspot Question Your network contains one Active Directory forest named contoso.com. The forest contains a deployment of Microsoft System Center 2012 R2 Configuration Manager. Configuration Manager has the client settings configured as shown in the following table:

Policy name	Priority
Policy1	1
Policy2	2
Policy3	3

Policy1, Policy2, and Policy3 are deployed to a collection named Collection1. You need to configure the clients in Collection1 to have a client policy polling interval of 30 minutes. What command should you run? To answer, select the appropriate options in the answer area.

Explanation: [https://technet.microsoft.com/en-us/library/jj821742\(v=sc.20\).aspx](https://technet.microsoft.com/en-us/library/jj821742(v=sc.20).aspx) QUESTION 82 You manage a deployment of Microsoft System Center 2012 R2 Configuration Manager. All client computers have the Configuration Manager client installed. Users are members of the local Administrators group on their respective computer. You are preparing the documentation for the support staff to remediate client issues. You need to identify which issues will be resolved by auto-remediation. Which three issues should you identify? Each correct answer presents part of the solution. A. The WMI service was stopped by a user. B. The WMI service was disabled by a user. C. The SMS Agent Host service was removed by a user. D. The Configuration Manager scheduled tasks were deleted by a user. E. The Configuration Manager scheduled tasks were disabled by a user. F. The SMS Agent Host service was stopped by a user. Answer: ABF QUESTION 83 You manage a deployment of Microsoft System Center 2012 R2 Configuration Manager. From the Configuration Manager console, you discover that three client computers failed the client check. You identify that the issue is related to WMI service corruption. You manually repair WMI on the client computers. You need to trigger a client health auto-remediation on the three client computers as soon as possible. What should you do? A. On the client computers, run the Machine Policy Retrieval & Evaluation Cycle action. B. On the client computers, start a Configuration Manager Health Evaluation scheduled task. C. From the Configuration Manager console, restart the SMS\_SITE\_SYSTEM\_STATUS\_SUMMARIZER component. D. From the Configuration Manager console, schedule a client status update. Answer: B QUESTION 84 Drag and Drop Question You have a multi-site deployment of Microsoft System Center 2012 R2 Configuration Manager. You plan to deploy the Configuration Manager client to all client computers in all sites as part of an operating system image. You need to prepare the reference image. Which three actions should you perform in sequence before you generalize the image? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

**Actions**

Run `client.msi` and specify the `RESETKEYINFORMATION` parameter.

Stop the SMS Agent Host service.

**Answer Area**

Run `comsetup.exe` and specify the `/source` parameter.

Stop the `SMS_EXECUTIVE` service.

Specify the `RESETKEYINFORMATION` parameter.

QUESTION 87 Hotspot Question You create a VPN profile by using Microsoft System Center 2012 R2 Configuration Manager as shown in the exhibit. (Click the Exhibit button.)

Use the drop-down menus to select the answer choice that completes each statement.

**Answer Area**

Clients that establish a VPN connection by using the Contoso VPN profile will **answer choice**

be prevented from accessing resources on the Internet.

always use the VPN to connect to the 172.28.0.0/24 network ID.

The VPN connection will use **answer choice**

TCP port 443

TCP port 1723

UDP port 1701

UDP port 500

Answer:

**Answer Area**

Clients that establish a VPN connection by using the Contoso VPN profile will **answer choice**

be prevented from accessing resources on the Internet.

always use the VPN to connect to the 172.28.0.0/24 network ID.

The VPN connection will use **answer choice**

TCP port 443

TCP port 1723

UDP port 1701

UDP port 500

QUESTION 88 Hotspot Question Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager. You plan to manage Android devices by using Configuration Manager. You are evaluating whether to use the Exchange Server connector or Windows Intune to manage the Android devices. You need to identify which management features are available for the Android devices. What should you identify? To answer, select the available management features for the Exchange Server connector and for Windows Intune in the answer area.

Management feature	Available with the Exchange Server connector	Available with Windows Intune
Automatic device discovery	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Remote wipe	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Software deployment	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Answer:

Management feature	Available with the Exchange Server connector	Available with Windows Intune
Automatic device discovery	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Remote wipe	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Software deployment	<input type="checkbox"/>	<input checked="" type="checkbox"/>

QUESTION 89 Your network contains a Microsoft System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) environment. You deploy a Microsoft Office 2010 package to all client computers by using Configuration Manager. Your company purchases Office 2013. You need to ensure that all users can install Office 2013 from the Application Catalog. What should you do?  
 A. Deploy a new application for Office 2013. B. Deploy a new package for Office 2013. C. Deploy Office 2013 by using a Group Policy Object (GPO). D. Update the Office 2010 source file and redeploy the package.  
 Answer: A  
 QUESTION 90 Your company has 120,000 client computers. You plan to deploy Microsoft System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) to the computers. You need to install Configuration Manager by using the fewest number of sites possible. Which site configuration should you use?  
 A. two individual stand-alone primary sites B. a single primary site and four secondary sites C. a stand-alone primary site D. a Central Administration site and two primary sites  
 Answer: C  
 Explanation: You can deploy Configuration Manager as a single stand-alone primary site, or as multiple sites in a hierarchy.
