The financial database has the following characteristics:- A data file of 2 terabytes is located on a dedicated LUN (drive D). - A transaction log of 10 GB is located on a dedicated LUN (drive E).- Drive D has 1 terabyte of free disk space.- Drive E has 5 GB of free disk space. The database is continually modified by users during business hours from Monday through Friday between 09:00 hours and 17:00 hours. Five percent of the existing data is modified each day. The Finance department loads large CSV files into a number of tables each business day at 11:15 hours and 15:15 hours by using the BCP or BULK INSERT commands. Each data load adds 3 GB of data to the database. These data load operations must occur in the minimum amount of time. A full database backup is performed every Sunday at 10:00 hours. Backup operations will be performed every two hours (11:00, 13:00, 15:00, and 17:00) during business hours. You need to ensure that your backup will continue if any invalid checksum is encountered. Which backup option should you use? A. STANDBY B. Differential C. FULL D. CHECKSUM E. BULK\_LOGGED F. CONTINUE\_AFTER\_ERROR G. SIMPLE H. DBO\_ONLY I. COPY\_ONLY J. SKIP K. RESTART L. The database is modified by users only from Monday through Friday from 09:00 hours to 17:00 hours. Users modify more than 30 percent of the data in the database during the week. Backups are performed as shown in the following schedule:The Finance department plans to execute a batch process every Saturday at 09:00 hours. This batch process will take a maximum of 8 hours to complete. The batch process will update three tables that are 10 GB in size. The batch process will update these tables multiple times. When the batch process completes, the Finance department runs a report to find out whether the batch process has completed correctly. You need to ensure that if the Finance department disapproves the batch process, the batch operation can be rolled back in the minimum amount of time. What should you do on Saturday?

Type	Frequency
Full	Sunday at 20:00 hours
Differential	Monday through Friday at 20:00 hours
Log	Monday through Friday between 08:00 hours and 18:00 hours

A. Perform a differential backup at 08:59 hours.B. Record the LSN of the transaction log at 08:59 hours. Perform a transaction log backup at 17:01 hours.C. Create a database snapshot at 08:59 hours.D. Record the LSN of the transaction log at 08:59 hours. Perform a transaction log backup at 08:59 hours.E. Create a marked transaction in the transaction log at 08:59 hours. Perform a transaction log backup at 17:01 hours.F. Create a marked transaction in the transaction log at 08:59 hours. Perform a transaction log backup at 08:59 hours. Answer: C QUESTION 30You administer a Microsoft SQL Server 2012 instance. The instance contains a database that supports a retail sales application. The application generates hundreds of transactions per second and is online 24 hours per day and 7 days per week. You plan to define a backup strategy for the database. You need to ensure that the following requirements are met:- No more than 5 minutes worth of transactions are lost. - Data can be recovered by using the minimum amount of administrative effort.What should you do? Choose all that apply. A. Configure the database to use the SIMPLE recovery model.B. Create a DIFFERENTIAL database backup every 4 hours.C. Create a LOG backup every 5 minutes.D. Configure the database to use the FULL recovery model.E. Create a FULL database backup every 24 hours.F. Create a DIFFERENTIAL database backup every 24 hours.
