<https://drive.google.com/drive/folders/0B75b5xYLjSSNaE94Q1l6MVFBbWM?usp=sharing>QUESTION 285Which two methods does VMware NSX offer to integrate with third-party partners? (Choose two)A. Integration ManagerB. Service ChainingC. VMware NSX APIs.D. Universal Synchronization ServiceAnswer: ACEExplanation:

<https://docs.vmware.com/en/VMware-NSX-forvSphere/6.3/com.vmware.nsx.admin.doc/GUID-EA477D96-E2D3-488B-90AA-2F19B4AE327D.html#GUID-EA477D96-E2D3-488B-90AA-2F19B4AE327D>QUESTION 286Which load balancing algorithm is only available on a vSphere Distributed Switch?A. Route Based on Source MAC HashB. Route Based on Originating Virtual PortC. Route Based on IP HashD. Route Based on Physical NIC LoadAnswer: DExplanation:

<https://docs.vmware.com/en/VMware-vSphere/6.5/com.vmware.vsphere.networking.doc/GUID-959E1CFE-2AE4-4A67-B4D4-2D2E13765715.html>QUESTION 287Which action is not an option for adding Virtual Machines to a Security Group?A. Adding Virtual Machines to a Security Group and nesting it within another Security Group.B. Defining Dynamic Membership in the Security Group.C. Adding Virtual Machines to a Security Policy and associating it with a Security Group.D. Selecting objects to include within a Security Group.Answer: CQUESTION 288From the NSX Edge CLI, which command would show VIP statistics?A. show service loadbalancer poolB. show service loadbalancer virtualC. show service loadbalancer monitorD. show service loadbalancerAnswer: BExplanation:

[https://kb.vmware.com/selfservice/microsites/search.do?language=en\\_US&cmd=displayKC&externalId=2122708](https://kb.vmware.com/selfservice/microsites/search.do?language=en_US&cmd=displayKC&externalId=2122708)QUESTION 289An NSX administrator notices that when configuring Flow Monitoring, the graphs do not include the IPFix flows. Where are these flows displayed?A. In the IPFix collector's interfaceB. In the Flow Monitor UIC. In the vRealize Operations UID. In the IPFix tab of the NSX Manager UIAnswer: AExplanation:

<https://docs.vmware.com/en/VMware-NSX-forvSphere/6.3/com.vmware.nsx.admin.doc/GUID-4C085DAE-A671-44A3-B9D1-62BC7966B388.html>QUESTION 290An administrator is deploying NSX in a Cross-vCenter configuration across three data centers located 100 miles apart Datacenter-1 and Datacenter-3 already have NSX deployed locally and Datacenter-2 does not have NSX deployed yet.What is the correct order of steps to configure all three data centers for this solution?A. 1 Remove the NSX manager from Datacenter-1 and Datacenter-3 2 Reinstall all three NSX managers at the same time3 Deploy a universal transport zone4 Deploy a universal distributed logical routerB. 1 Deploy an NSX manager at Datacenter-2 2 Change the roles of the NSX managers in Datacenter-1 and Datacenter-3 to Transit Mode 3 Deploy a universal transport zone4 Configure the Primary and Secondary roles on all three NSX managersC. 1 Deploy an NSX manager in Datacenter 2 2 Update the NSX manager role in Datacenter-1 to Primary 3 Update the roles in Datacenter-2 and Datacenter-3 to Secondary 4 Deploy a universal transport zoneD. 1 Deploy the NSX manager at Datacenter-2 2 Update the NSX manager role in Datacenter-1 to Primary 3 Deploy a universal transport zone4 Deploy a universal distributed logical routerAnswer: DQUESTION 291A security administrator needs to create a Security Group based on an Active Directory group. However, AD Groups are not available as an option. What must the administrator configure before AD Groups are available?A. Guest Introspection virtual machines must be joined to the domainB. Inventory Service must be registered with a domain accountC. NSX Manager must be registered with Active DirectoryD. NSX Controller must be registered with Active DirectoryAnswer: CQUESTION 292What is one of the benefits of a spine-leaf network topology?A. A loop prevention protocol is not requiredB. Automatic propagation of security policies to all nodesC. Allows for VXI ANs to be defined in traditional network topologyD. Network virtualization relies on spine leaf topologies to create logical switchesAnswer: DQUESTION 293What is the most restrictive NSX role that can be used to create and publish security policies and install virtual appliances?A. Security AdministratorB. NSX AdministratorC. AuditorD. Enterprise AdministratorAnswer: DQUESTION 294In a Cross-vCenter NSX deployment, what are two requirements that must be met in order for an administrator to deploy both universal logical switches and local logical switches within the same vCenter instance? (Choose two.)A. A universal distributed logical router must be createdB. A logical distributed router must be createdC. A universal transport zone must be created.D. A local transport zone must be createdAnswer: CDEExplanation:

<https://docs.vmware.com/en/VMware-NSX-forvSphere/6.3/com.vmware.nsx.cross-vcenter-install.doc/GUID-7F76BB1E-7E36-4E9DB8C2-798100E62192.html>QUESTION 295The fact that NSX Data Security has visibility into sensitive data provides which two benefits? (Choose two)A. It helps address compliance and risk management requirements.B. It acts as a forensic tool to analyze

TCP and UDP connections between virtual machinesC. It is able to trace packets between a source and destination without requiring access to the guestOSD. It eliminates the typical agent footprint that exists with legacy software agentsAnswer: AB-nsx-guide/!!!RECOMMEND!!!1.|2017 New 2V0-642 Exam Dumps (PDF & VCE) 313Q&As Download:
