2017 Sep New 70-398 Exam Dumps with PDF and VCE Free Updated Today! Following are some new 70-398 Questions:1.[2017 New 70-398 Exam Dumps (PDF & VCE) 41Q&As Download:<https://www.braindump2go.com/70-398.html> 2.[2017 New 70-398 Exam Questions & Answers Download:<https://drive.google.com/drive/folders/0B75b5xYLjSSNSzdxYTQ2Z1FmRU0?usp=sharing> QUESTION 31 Overview Background Blue Yonder Airlines provides regional commercial jet services in the continental United States. The company also designs, manufactures, and sells custom parts for jet aircraft. The custom parts business is growing rapidly. Blue Yonder airlines has developed a new part that will help airlines comply with new safety regulations. The company has a backlog of customers that would like to purchase the part. The Sales department has 500 users and the Engineering department has 200 users. All employees work eight hour shifts. The Sales and Engineering teams cannot effectively collaborate on projects. This has resulted in missed deadlines for releasing new products to manufacturing. Mobile device management Blue Yonder Airlines has a subscription to Microsoft Intune for Mobile Device Management (MDM). The subscription includes the MDM Authority and Terms and Conditions components. The company has deployed the Network Device Enrollment service, Enterprise Certification Authority, and the Intune Certificate Connector. Blue Yonder Airlines has an on-premises Microsoft Exchange environment. The company will use a combination of Intune and Azure RemoteApp for Mobile Application Management. Mobile devices for employees Blue Yonder Airlines plans to deploy mobile devices to the Sales and Engineering department employees for use while they are outside of the company network. The company plans to deploy the latest iOS devices for Sales department users and Windows 10 tablet devices for Engineering department users. You configure a Sales group for Sales department users and an Engineering group for Engineering department users. In Intune, you configure a computer device group for Windows 10 devices, and a mobile device group for iOS devices. You synchronize the Sales and Engineering groups with Azure Active Directory (AD). Network resources You have a network file share that is used by Engineering department users to collaborate on projects. The file share is configured with full control permissions. The company is concerned that users may be disrupted if they are suddenly denied access to the file share. Applications Inventory Management App Blue Yonder Airlines has developed a custom inventory management app. Sales department users must be able to access the app from enrolled mobile devices. The data that the app uses is considered confidential and must be encrypted. New product Sales App You procure a third-party app from a vendor to support new product sales. The data that the app uses is highly confidential. You must restrict access to the app and the app's data to only Engineering department users. The app has been signed by using a Blue Airlines certificate. This certificate is not trusted by devices that run Windows 10. Product Request Program App The company has developed the Product Request Program app as a 32-bit Windows application. The application allows the company to manage the sales fulfillment process. It is also used to record customer requests for new parts and services. You plan to publish the Product Request Program app in Azure RemoteApp and configure access for users in the Engineering and Sales departments. This app is not compatible with the iOS platform and cannot be published by using Intune. You create a virtual machine in Azure that runs Windows Server 2012 R2. You install the Product Request Program app on the virtual machine. Business Requirements You must ensure that the Sales and Engineering teams can share documents and collaborate effectively. Any collaboration solution must be highly available and must be accessible from the internet. You must restrict access to any shared files to prevent access. You must restrict permissions to the Engineering file share. You must monitor access to the file share. You must provide users in the Sales and Engineering departments access to the following resources: Corporate email File Shares hosted in Microsoft SharePoint Online The Product Request Program app Technical Requirements You have the following technical requirements: Allow all Sales department users to enroll iOS devices for device management and enable encrypted notifications to the devices. Employees must be able to access company resources without having to manually install certificates or using an out-of-band process. Employees must only access corporate resources from devices that comply with the company's security policies. Mobile device protection policies All devices must include a trusted build and must comply with Blue Yonder Airlines password complexity rules. You must clear all corporate data from a mobile device when the number of repeated log on failures is more than 10. All devices must be protected from data loss in the event that a device is lost or damaged. Data that is considered confidential must be encrypted on devices. Additional technical requirements for Engineering department users and devices Users must not be challenged for credentials after they initially enroll a device in Intune. Users must be able to access corporate email on enrolled Windows 10 devices. Devices must be automatically updated when an update is available. You must configure the Intune agent to prompt for restart no more than one time during normal business hours. System restarts to complete update installations must occur outside of normal business hours. Problem Statements Sales and Engineering teams Sales and Engineering department users report that it is difficult to share documents and collaborate on new projects. Blue Yonder Airlines has an urgent need to improve

collaboration between the Sales department and Engineering department. Any collaboration solution must be highly available and accessible from the Internet. Engineering department users report that Intune prompts them to restart their Windows 10 devices every 30 minutes when an update is available for installation. The prompts are disruptive to users. Security issues The Blue Yonder Airlines Security team has detected a vulnerability in Windows 10 devices. Microsoft has released a patch to address the vulnerability. The Security department has issued a service announcement. They request that you deploy the patch to all Windows 10 devices managed by Microsoft Intune. Drag and Drop Question You need to configure the phones for the Sales department users. In the Intune administration portal, which three steps should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Create a certificate signing request for the vendor.
- Issue a Blue Yonder push notification certificate.
- Get push notification service certificate from the vendor.
- Create a certificate signing request for Blue Yonder.
- Upload the Blue Yonder push notification certificate to Intune.
- Upload the vendor push notification certificate to Intune.

Answer Area

Sequence

Answer:

Actions

- Issue a Blue Yonder push notification certificate.
- Create a certificate signing request for Blue Yonder.
- Upload the Blue Yonder push notification certificate to Intune.

Answer Area

Sequence

- Create a certificate signing request for the vendor.
- Get push notification service certificate from the vendor.
- Upload the vendor push notification certificate to Intune.

The Security department has issued a service announcement. They request that you deploy the patch to all Windows 10 devices managed by Microsoft Intune. Drag and Drop Question You need to configure the mobile devices for the Engineering department users. In the Microsoft Intune administration portal, which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

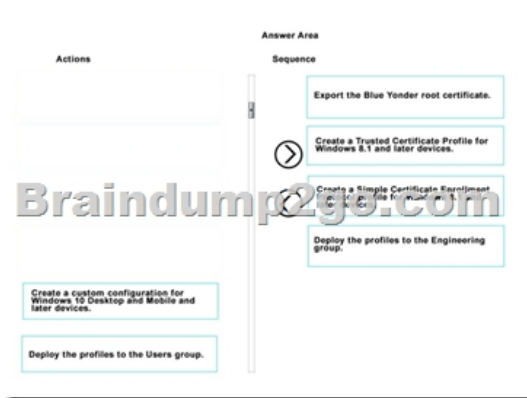

The screenshot shows a drag-and-drop question in the Microsoft Intune administration portal. On the left, under the heading "Actions", there are five items in a list box:

- Create a Trusted Certificate Profile for Windows 8.1 and later devices.
- Export the Blue Yonder root certificate.
- Create a Simple Certificate Enrollment Protocol profile for Windows 8.1 and later devices.
- Create a custom configuration for Windows 10 Desktop and Mobile and later devices.
- Deploy the profiles to the Users group.

On the right, under the heading "Answer Area", there is a "Sequence" list box containing four items in the correct order:

- Export the Blue Yonder root certificate.
- Create a Simple Certificate Enrollment Protocol profile for Windows 8.1 and later devices.
- Create a Trusted Certificate Profile for Windows 8.1 and later devices.
- Deploy the profiles to the Users group.

Background Blue Yonder Airlines provides regional commercial jet services in the continental United States. The company also designs, manufactures, and sells custom parts for jet aircraft. The custom parts business is growing rapidly. Blue Yonder airlines has developed a new part that will help airlines comply with new safety regulations. The company has a backlog of customers that would like to purchase the part. The Sales department has 500 users and the Engineering department has 200 users. All employees work eight hour shifts. The Sales and Engineering teams cannot effectively collaborate on projects. This has resulted in missed deadlines for releasing new products to manufacturing.

Mobile device management Blue Yonder Airlines has a subscription to Microsoft Intune for Mobile Device Management (MDM). The subscription includes the MDM Authority and Terms and Conditions components. The company has deployed the Network Device Enrollment service, Enterprise Certification Authority, and the Intune Certificate Connector. Blue Yonder Airlines has an on-premises Microsoft Exchange environment. The company will use a combination of Intune and Azure RemoteApp for Mobile Application Management.

Mobile devices for employees Blue Yonder Airlines plans to deploy mobile devices to the Sales and Engineering department employees for use while they are outside of the company network. The company plans to deploy the latest iOS devices for Sales department users and Windows 10 tablet devices for Engineering department users. You configure a Sales group for Sales department users and an Engineering group for Engineering department users. In Intune, you configure a computer device group for Windows 10 devices, and a mobile device group for iOS devices. You synchronize the Sales and Engineering groups with Azure Active Directory (AD).

Network resources You have a network file share that is used by Engineering department users to collaborate on projects. The file share is configured with full control permissions. The company is concerned that users may be disrupted if they are suddenly denied access to the file share.

Applications Inventory Management App Blue Yonder Airlines has developed a custom inventory management app. Sales department users must be able to access the app from enrolled mobile devices. The data that the app uses is considered confidential and must be encrypted.

New product Sales App You procure a third-party app from a vendor to support new product sales. The data that the app uses is highly confidential. You must restrict access to the app and the app's data to only Engineering department users. The app has been signed by using a Blue Airlines certificate. This certificate is not trusted by devices that run Windows 10.

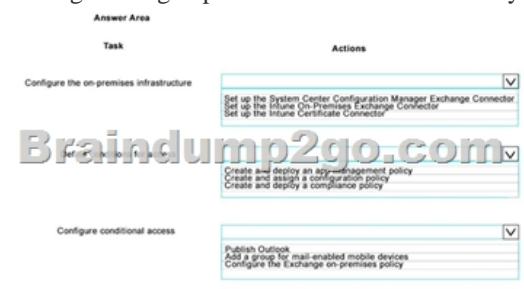

Product Request Program App The company has developed the Product Request Program app as a 32-bit Windows application. The application allows the company to manage the sales fulfillment process. It is also used to record customer requests for new parts and services. You plan to publish the Product Request Program app in Azure RemoteApp and configure access for users in the Engineering and Sales departments. This app is not compatible with the iOS platform and cannot be published by using Intune. You create a virtual machine in Azure that runs Windows Server 2012 R2. You install the Product Request Program app on the virtual machine.

Business Requirements You must ensure that the Sales and Engineering teams can share documents and collaborate effectively. Any collaboration solution must be highly available and must be accessible from the internet. You must restrict access to any shared files to prevent access. You must restrict permissions to the Engineering file share. You must monitor access to the file share. You must provide users in the Sales and Engineering departments access to the following resources: Corporate email File Shares hosted in Microsoft SharePoint Online The Product Request Program app

Technical Requirements You have the following technical requirements: Allow all Sales department users to enroll iOS devices for device management and enable encrypted notifications to the devices. Employees must be able to access company resources without having to manually install certificates or using an out-of-band process. Employees must only access corporate resources from devices that comply with the company's security policies.

Mobile device protection policies All devices must include a trusted build and must comply with Blue Yonder Airlines password complexity rules. You must clear all corporate data from a mobile device when the number of repeated log on failures is

more than 10. All devices must be protected from data loss in the event that a device is lost or damaged. Data that is considered confidential must be encrypted on devices. Additional technical requirements for Engineering department users and devices Users must not be challenged for credentials after they initially enroll a device in Intune. Users must be able to access corporate email on enrolled Windows 10 devices. Devices must be automatically updated when an update is available. Hotspot Question You need to configure access to the custom inventory app for Sales department users. Which action should you perform to complete each task? To answer, select the appropriate action for each task in the answer area.

Answer Area  
Task

Publish the app in Intune.

Braindu

Enable installation of the encrypted app.

Answer:

Answer Area	Task	Actions
	Publish the app in Intune.	<ul style="list-style-type: none"><li>Create a link to the app in Intune.</li><li>Create a link to the app on the blueyonder.com website.</li><li>Upload the app installation files to the blueyonder.com website.</li><li>Upload the app installation files to the Intune cloud storage space.</li></ul>
	Enable installation of the encrypted app.	<ul style="list-style-type: none"><li>Create a Mobile App Management policy for All Devices.</li><li>Create a Mobile App Management policy for iOS devices.</li><li>Create a compliance policy for All devices and deploy it to the Sales group.</li><li>Create a configuration policy for iOS devices and deploy it to the Sales group.</li></ul>
