Use of formal techniques requires expensive training B. Only experience can ensure all functionality is covered C. Tests based on experience and intuition can supplement formal techniques D. Formal techniques require the use of expensive tools Answer: C QUESTION 239 Which of the following test design techniques is classified as a structure-based (white box) technique? A. Exploratory testing B. Decision table testing C. State transition testing D. Statement testing Answer: D QUESTION 240 Why is independent testing important? A. Because independent testers make fewer assumptions than developers B. Because independent testers are isolated from the development team C. Because independent testers can verify assumptions made during specification and implementation of the system D. Because independent testers have a greater sense of responsibility for quality than developers Answer: C QUESTION 241 Which statement BEST describes when test planning should be performed? A. Test planning is performed only once, at the beginning of the life cycle, and generates a Master Test Plan B. Test planning is performed at the beginning of the life cycle and again at the beginning of test execution C. Test planning is performed at the beginning of the life cycle and again at every test level D. Test planning is performed continuously in all life cycle processes and activities Answer: D QUESTION 242 Refer to the exhibit. The following test cases need to be run, but time is limited, and it is possible that not all will be completed before the end of the test window

#	Description	Priority	Note
a	Re-test defect no 52	Low	Re-test
b	Ability to amend transaction type	High	
c	Re-test defect no 26	High	Re-test
d	Run regression test script	Medium	Regression
e	Print monthly sales figures for previous month	Medium	
f	Print special invoices for previous month	Low	
g	Reprint selected previous sales figures	High	Must be run after item e
h	Account administrator able to amend any previous month's sales figures	Low	
i	Print year-to-date figures	Medium	

The first activity is to run any re-tests, followed by the regression test script. Users have supplied their priority order to tests. Which of the following gives an appropriate test execution schedule, taking account of the prioritisation and other constraints? A. b, c, g, d, e, i, a, f, h B. a, c, d, b, g, e, i, f, h C. c, a, d, b, e, g, i, h, f D. d, c, a, e, b, g, i, f, h Answer: C QUESTION 243 Which of the following factors will MOST affect the testing effort required to test a software product? A. The number of staff available to execute tests B. The level of detail in the test plan C. The requirements for reliability and security in the product D. The test estimation method used Answer: C QUESTION 244 Which of the following metrics could be used to monitor progress along with test preparation and execution? A. The total number of tests planned B. The total number of requirements to be tested C. The failure rate in testing already completed D. The number of testers used for test execution so far Answer: C QUESTION 245 Test objectives for systems testing of a safety critical system include completion of all outstanding defect correction. Regression testing is required following defect correction at all test levels. Which TWO of the following metrics would be MOST suitable for determining whether the test objective has been met? (a) Regression tests run and passed in systems testing (b) Incidents closed in systems testing (c) Planned tests run and passed in system testing (d) Planned tests run and passed at all levels of testing (e) Incidents raised and closed at all levels of testing A. a and e B. b and c C. d and e D. a and b Answer: A QUESTION 246 Test script TransVal 3.1 tests transaction validation via screen TRN 003B. According to the specification (PID ver 1.3 10b iv) the validation screen should not accept future dated transactions. Test script TransVal 3.1 passes. Test script eod 1.4 tests end of day processing and is run after the execution of TransVal 3.1 using data entered during that test Which of the following is the BEST detail on an incident report? A. Title. End of Day failure.. Reproducible. Yes. Description. Script eod 1.4 fails when the first transaction of the day is a future dated transaction. Screen shot of the failure attached. B. Title. Transaction input screen validation.. Reproducible. Yes. Description. Script eod 1.4 fails . Screen shot of the failure attached. Validation of transaction entry on screen TRN-003B should not allow future dated transactions ?see PID ver 1.3 para 10b iv. C. Title. Screen TRN-003B validation of transaction date.. Reproducible. No. Description. When a future dated transaction is processed by the end of day process, a failure can occur. This does not always happen. Screen shot of the failure attached. D. Title. Screen TRN-003B validation of transaction date.

Reproducible. Yes. Description. Script eod 1.4 fails when the first transaction of the day is a future dated transaction. Screen shot of the failure attached. Validation of transaction entry on screen TRN-003B should not allow future dated transactions ?see PID ver 1.3 para 10b iv. Answer: D QUESTION 247 Which TWO of the following test tools would be classified as test execution tools?(a) Test data preparation tools(b) Test harness(c) Review tools(d) Test comparators(e) Configuration management tools A. a and bB. c and dC. c and eD. b and d Answer: D QUESTION 248 Which of the following is a consideration when deploying test execution tools? A. Data-driven testing cannot be used with test execution toolsB. Recorded manual tests may become unstable in useC. Keyword-driven testing cannot be used with test execution toolsD. Expected results for tests are not required because the tool generates expected results Answer: B QUESTION 249 Which of the following correctly states a limitation in the use of static analysis tools? A. Static analysis tools can be applied to new code but cannot be applied to existing codeB. Static analysis tools can be used to enforce coding standardsC. Static analysis tools always generate large numbers of warning messages when applied to new code, even if the code meets coding standardsD. Static analysis tools do not generate warning messages when applied to existing code Answer: B QUESTION 250 What is the main reason for using a pilot project to introduce a testing tool into an organization? A. To identify the requirements for using a toolB. To make a selection between alternative toolsC. To assess whether the tool will be cost- effectiveD. To ensure the tools fits existing processes without change Answer: C QUESTION 251 Which of the following BEST describes the relationship between test planning and test execution? A. Test planning ensures the level of detail in test procedures is appropriate for test executionB. Test planning schedules test execution but does not assign resourcesC. Test planning defines the overall approach to testing but does not schedule specific activities such as test executionD. Test planning identifies test objectives related to scope and risk but does not define the level of detail for test procedures used in test execution Answer: A !!!RECOMMEND!!! 1.|2017 New CTFL_001 Exam Dumps (PDF & VCE) 275Q&As Download: <https://www.braindump2go.com/ctfl-001.html> 2.|2017 New CTFL_001 Study Guide Video: YouTube Video: [YouTube.com/watch?v=rw1rLMUKTt8](https://www.youtube.com/watch?v=rw1rLMUKTt8)
