2017 Oct. New Citrix 1Y0-311 Exam Dumps with PDF and VCE Free Released Today! Following are some new 1Y0-311 Questions:

1. |2017 New 1Y0-311 Exam Dumps (PDF & VCE) 85Q&As Download: <https://www.braindump2go.com/1y0-311.html>

2. |2017 New 1Y0-311 Exam Questions & Answers Download: <https://drive.google.com/drive/folders/0B75b5xYLjSSNdHlIS2EyMGh6dzQ?usp=sharing>

QUESTION 51A Citrix XenApp Administrator needs to create a load balancing policy and apply it to several XenApp servers. Which two methods would require the administrator to use the least amount of effort to meet the requirements? (Choose two.)

A. Create a worker group and add targeted servers to it.

B. Create a load balancing policy and assign it to targeted servers.

C. Create a load balancing policy and assign it to the worker group.

D. Create a worker group and attach the load balancing policy to XenApp servers.

Answer: AC

QUESTION 52 Scenario: A Citrix Engineer needs to configure a baseline Citrix policy for a new user group in the XenApp and XenDesktop environment. The users are connecting from branch offices over a WAN connection. The NetScaler SD-WANs are supporting each of the WAN connections. The users are connecting to Windows Server 2012 R2 published desktops. The primary objective of the policies is to utilize the WAN link bandwidth as optimally as possible. Which two Citrix policy templates should the engineer use to accomplish this scenario? (Choose two.)

A. High Server Scalability

B. Optimized for CloudBridge

C. Optimized for WAN-Legacy OSD

D. Optimized for WANE

E. High Server Scalability-Legacy OS

Answer: AD

QUESTION 53 When should a Citrix Engineer utilize the Processes WhiteList feature of Workspace Environment Management (WEM)?

A. If specific administrators should be provided access to specific application or program processes

B. If specific application or program processes should always be available for launch

C. If specific users should NOT be able to launch specific application or program processes

D. If specific application or program processes should NEVER be available for launching

Answer: A

Explanation: <http://www.carlstalhood.com/workspace-environment-management/>

QUESTION 54 What is the recommended configuration for deployment different versions of Microsoft Office?

A. Create a distinct layer for each version.

B. Install Microsoft Office in an Elastic Layer.

C. Create one image template from all layers that contain Microsoft Office.

D. Install the latest version on the OS Layer and other versions on App Layers.

Answer: C

Explanation: https://www.citrix.com/content/dam/citrix/en_us/documents/products-solutions/deployment-guide-office-365-for-xenapp-and-xendesktop.pdf

QUESTION 55 How does Fast Logoff in a Workspace Environment Management (WEM) infrastructure optimize the logoff experience for users?

A. Improves roaming profile synchronization performance on logoff

B. Allows processes to continue running in the background while user sessions appear to log off quickly

C. Terminates hung application processes within 10 seconds of logging off

D. Notifies the Delivery Controllers that pooled desktops are ready for assignment on logoff

Answer: A

QUESTION 56 Scenario: A XenApp Administrator has configured Multi-stream ICA in an environment. A user reports performance issues and the administrator discovers that Multi-stream ICA is NOT active for that user's session. What should the administrator do to resolve this issue?

A. Change the color quality to 16-bit.

B. Ensure that port 1494 is available.

C. Adjust the progressive compression level.

D. Upgrade to the latest version of Citrix Receiver.

Answer: D

QUESTION 57 Scenario: An administrator is deploying a new server to host the latest Citrix Web Interface version. During a test, the administrator has NOT been able to authenticate and access the list of published applications. Which two actions must the administrator take to debug the Citrix Web Interface? (Choose two.)

A. Specify a valid path to generate a log file.

B. Edit the web.config file to enable the debug feature.

C. Use the Process Monitor tool to monitor the IIS processes.

D. Use the Windows Debug tool to generate and analyze a memory dump.

Answer: AB

QUESTION 58 Scenario: A Citrix Engineer is managing a XenApp and XenDesktop environment that has been built with the following site architecture:- The environment consists of one Site with three zones.- The Primary Zone is located in datacenter.- Satellite Zone 1 is located in datacenter.- Satellite Zone 2 is located in datacenter C.- Gateway A is in datacenter.- Gateway B is in datacenter.- A NetScaler Gateway has been set up in datacenter A and datacenter Each Gateway has access to all zones.- The StoreFront server group is located in the Primary Zone and enumerates all resources within the Site.- Delivery Controllers are configured in all three zones.- Application B is available in Satellite Zone 1 only.- Optimal Gateway Routing has been configured so that Gateway A is preferred for the Primary Zone and Satellite Zone 2; Gateway B is preferred for Satellite Zone 1. A user located near datacenter A logs in through NetScaler Gateway and attempts to launch Application B. Which behavior is expected in this scenario?

A. Resource enumeration occurs using Gateway B; the HDX connection is established using Gateway B.

B. Resource enumeration and the HDX connection are established using Gateway C.

C. Resource enumeration occurs using Gateway A; the HDX connections is established using Gateway A.

D. Resource enumeration and the HDX connection are established using Gateway D.

Answer: A

QUESTION 59 Scenario: A Citrix Engineer needs to complete the installation and setup of a

new Citrix Workspace Environment Management (WEM) infrastructure. As one of the final steps, the engineer needs to point the Administration Console to the existing Citrix Licensing Server. Which step should the engineer take to complete this task?

A. Select the 'Home' tab in the Administration Console ribbon, click 'Configure License server' and then enter the Citrix License Server details in the License server name field.

B. No steps are necessary as Licensing is configured during the installation and setup process.

C. Select the 'Home' tab in the Administration Console ribbon, click 'Advanced Settings' and then enter the Citrix License Server details in the License server name field.

D. Select the 'About' tab in the Administration Console ribbon, click 'Configure License server', and then enter the Citrix License Server details in the License server name field.

Answer: C

QUESTION 60

Scenario: A Citrix Engineer is managing a Provisioning Services Farm with the following specifications:- A single Farm with one Site, with two Provisioning Services servers deployed with 8 vCPU each, which are supporting a total of 500 target devices in production.- The ports and threads have been configured so that each server can stream concurrently to 250 devices each.- Due to an upcoming merger, 250 more target devices must be supported by the existing Provisioning Services farm.- The Provisioning Services servers must handle the extra capacity while aligning to Citrix leading practices for resiliency. Which step should the engineer perform to accomplish these requirements?

A. Isolate the Provisioning Services streaming traffic.

B. Add two additional Provisioning Services servers to the Site.

C. Maintain the existing configurations for the environment.

D. Add one additional Provisioning Services server to the Site.

Answer: A
