The OMS service map solution is deployed.Customers report that the website displays error messages and is very slow to load pages each day at 04:00. The company plans to use the OMS Service Map solution to investigate the issues.You need to recommend actions that the company should perform with OMS Service Map.Which three actions should you recommend? Each correct answer presents a complete solution.NOTE: Each correct selection is worth one point.A. View alerts that show critical CPU utilization.B. Install updates to the device that hosts the website.C. Create a backup of the web server.D. View the device that hosts the website.E. View the process that produced the alert.Answer: ADEExplanation:

https://docs.microsoft.com/en-us/azure/operations-management-suite/operations-management-suite- service-mapQUESTION 256You have business services that run on an on-premises mainframe server. You must provide an intermediary configuration to support existing business services and Azure. The business services cannot be rewritten. The business services are not exposed externally. You need to recommend an approach for accessing the business services. What should you recommend? A. Connect to the on-premises server by using a custom service in Azure. B. Expose the business services externally. C. Expose the business services to the Azure Service Bus by using a custom service that uses relay binding. D. Move all business service functionality to Azure. Answer: BExplanation:http://azure.microsoft.com/en-gb/documentation/articles/service-bus-dotnet-how-to-use-relay/ QUESTION 257You are designing an Azure solution. The network traffic for the solution must be securely distributed by providing the following features:- HTTPS protocol- Round robin routing- SSL offloadingYou need to recommend a load balancing option. What should you recommend?A. Azure Internet Load Balancer (ILB)B. Azure Load BalancerC. Azure Traffic ManagerD. Azure Application GatewayAnswer: DExplanation:

https://docs.microsoft.com/en-us/azure/application-gateway/application-gateway-introductionQUESTION 258You use a virtual network to extend an on-premises IT environment into the cloud. The virtual network has two virtual machines (VMs) that store sensitive data. The data must only be available using internal communication channels. Internet access to those VMs is not permitted. You need to ensure that the VMs cannot access Internet. Which two options should you recommend? Each correct answer presents a complete solution.NOTE: Each correct selection is worth one point.A. Azure ExpressRouteB. network interface (NIC) C. Source Network Address Translation (SNAT)D. Network Security Groups (NSG)Answer: ADExplanation:

## https://docs.microsoft.com/en-us/azure/expressroute/expressroute-introduction

https://reticent.net.nz/prevent-internet-access-from-azure-virtual-machines/QUESTION 259A company hosts a website and exposes web services on the company intranet. The intranet is secured by using a firewall. Company policies prohibit changes to firewall rules. Devices outside the firewall must be able to access the web services. You need to recommend an approach to enable inbound communication. What should you recommend? A. the Azure Access Control ServiceB. Windows Azure PackC. the Azure WCF RelayD. a web service in an Azure role that relays data to the internal web services Answer: CExplanation: https://docs.microsoft.com/en-us/azure/service-bus-relay/relay-what-is-itQUESTION 260A partner manages on-premises and

Azure environments. The partner deploys an on-premises solution that needs to use Azure services. The partner deploys a virtual appliance. All network traffic that is directed to a specific subnet must flow through the virtual appliance. You need to recommend solutions to manage network traffic. Which two options should you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point. Configure Azure Traffic Manager. Configure a routing table with forced tunneling. C. Implement an Azure virtual network. D. Implement Azure ExpressRoute. Answer: ADExplanation:

## https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-overview

https://docs.microsoft.com/en-us/azure/expressroute/expressroute-routingQUESTION 261You manage on-premises network and Azure virtual networks. You need a secure private connection between the on-premises networks and the Azure virtual networks. The connection must offer a redundant pair of cross connections to provide high availability.What should you recommend?A. virtual network peeringB. Azure Load BalancerC. VPN GatewayD. ExpressRouteAnswer: BExplanation:

https://docs.microsoft.com/en-us/azure/load-balancer/load-balancer-overviewQUESTION 262You are designing a solution that will aggregate and analyze data from Internet of Things (IoT) devices. The solution must meet the following requirements:- Store petabytes of data- Use shared access policies to provide service connections to the IoT event source.- Conduct analysis of data in

near real-time.- Provide ultra-low latency and highly scalable transaction processing. You need to recommend a technology. What should you recommend?A. Azure Data Lake StoreB. Azure Redis CacheC. Azure Time Series InsightsD. Azure Table storageAnswer: AExplanation: https://azure.microsoft.com/en-us/services/data-lake-store/QUESTION 263Your company uses Office 365 for all employees. The company plans to create a website where customers can view and register technical support cases. The solution must meet the following requirements:- Provision customer identities by using social media accounts.- Users must be able to access the website by using social media accounts including Facebook.- Employees of the customer service department must be able to access the site to read the cases and resolve them. You need to design an identity solution for the company. Which two actions should you recommend? Each correct answer presents part of the solution.NOTE: Each correct selection is worth one point.A. a custom policy to link internal store to the external storeB. a new Azure Active Directory (Azure AD) business-to-business (B2B) tenantC. an Azure SQL data sync to link the internal store to the external oneD. a new Azure Active Directory (Azure AD) business-to-consumer (B2C) tenantE. a new Azure Active Directory (Azure AD) tenantAnswer: AD Explanation:https://docs.microsoft.com/en-us/azure/active-directory-b2c/active-directory-b2c-overview https://docs.microsoft.com/en-us/azure/active-directory-b2c/active-directory-b2c-overview-customQUESTION 264Hotspot QuestionYou manage a solution in Azure. You plan to add several new features to the solution. You identify the following requirements:- The deployment technology must support load balancing and service discovery.- Trigger a Biztalk Server workflow to process Electronic Data Interchange (EDI) data. You need to identify which technical implementation is suitable for each functionality. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.
