SIMULATIONThis is a lab or performance-based testing (PBT) section.The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.Please, note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.To start the lab You may start lab by clicking the Next buttonTasksClick to expand each objectiveasTo connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.You need to deploy an Azure load balancer named lb1016 to your Azure subscription. The solution must meet the following requirements:- Support the load balancing of IP traffic from the Internet to Azure virtual machines connected to VNET1016subnet0.- Provide a Service Level Agreement (SLA) of 99.99 percent availability for the Azure virtual machines.- Minimize Azure-related costs.What should you do from the Azure portal?To complete this task, you do NOT need to wait for the deployment to complete. Once the deployment starts in Azure, you can move to the next task.**A. See below explanation**Answer: AExplanation:Step 1:On the top left-hand side of the screen, click Create a resource > Networking > Load Balancer.Step 2:In the Create a load balancer page enter these values for the load balancer:myLoadBalancer - for the name of the load balancer.Internal - for the type of the load balancer.Basic - for SKU version.Microsoft guarantees that apps running in a customer subscription will be available 99.99% of the time. VNET1016subnet0 - for subnet that you choose from the list of existing subnets. Step 3: Accept the default values for the other settings and click Create to create the load balancer.New Question

The solution must maximize the IP address space available to Azure virtual machines.What should you do from the Azure portal before you create the ExpressRoute and the VPN gateway?**A. See below explanation**Answer: AExplanation:We need to create a Gateway subnetStep 1:Go to More Services > Virtual NetworksStep 2:Then click on the VNET1017, and click on subnets. Then click on gateway subnet.Step 3:In the next window define the subnet for the gateway and click OK. It is recommended to use /28 or /27 for gateway subnet.As we want to maximize the IP address space we should use /27.

exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But,

you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please, note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start lab by clicking the Next button Tasks Click to expand each objective as To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. You plan to grant the members of a new Azure AD group named corp7509086 the rights to delegate administrative access to any resource in the resource group named corp7509086. You need to create the Azure AD group, and then to assign the correct role to the group. The solution must use the principle of least privilege and minimize the number of role assignments. What should you do from the Azure portal? **A. See below explanation** Answer: A Explanation: Step 1: Click Resource groups from the menu of services to access the Resource Groups blade Step 2: Click Add (+) to create a new resource group. The Create Resource Group blade appears. Enter corp7509086 as the Resource group name, and click the Create button. Step 3: Select Create. Your group is created and ready for you to add members. Now we need to assign a role to this resource group scope. Step 4: Choose the newly created Resource group, and Access control (IAM) to see the current list of role assignments at the resource group scope. Click +Add to open the Add permissions pane. Step 5: In the Role drop-down list, select a role Delegate administration, and select Assign access to: resource group corp7509086 References:

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please, note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab You may start lab by clicking the Next button Tasks Click to expand each objective To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar. Instructions Performance Based Lab This type of question asks you to perform tasks in a virtual environment. The screen for this type of question includes a virtual machine window and a tasks pane. The window is a remotely connected live environment where you perform tasks on real software and applications. On the right is a Tasks pane that lists the tasks you need to perform in the lab. Each task can be expanded or collapsed using the ?+? or ?-? symbols. A checkbox is provided for each task. This is provided for convenience, so you can mark each task as you complete it. Tasks Click to expand each objective - Configure servers Add the ?Print and Document Services? role to server LON-SVR1, installing any required management features and enabling both Print and LPD Services. + Configure file and share access When you are finished performing all the tasks, click the ?Next? button. Note that you cannot return to the lab once you click the ?Next? button. Scoring occurs in the background while you complete the rest of the exam. Comments Once the exam completes, the comment period will begin and you will have the opportunity to provide comments to Microsoft about the exam questions. To launch the comment period, click the ?Finish? and then ?Comment? buttons. To skip the comment period and the exam, click Exit. You can navigate to a question from the Review screen to provide a comment. Please, see the Review Screen tab in the Review Screen help Menu (which can be accessed from the Review Screen) for details on accessing questions from the Review Screen. To comment on a question, navigate to that question and click the Give Feedback icon. When you have entered your comment in the comment window, click Submit to close the window. To navigate to the Review screen again, click the Review button. You may navigate through all questions using the Next and Previous buttons. To skip commenting, go to the Review Screen by selecting the Review Screen button in the upper left-hand corner and from the Review Screen, select ?Finished?. Controls Available For any question, one or more of the following controls might be available. Keyboard Shortcuts Available Exam features may be accessed using keyboard shortcuts. The following table describes the keyboard shortcuts that are available during this exam. Some keyboard shortcuts require that you press two or more keys at the same time. These keys are separated by a plus sign (+) in the table below. You need to prevent remote users from publishing via FTP to a function app named FunctionApp1d7509087fa. Remote users must be able to publish via FTPS. What should you do from the Azure portal? **A. See below explanation** Answer: A Explanation: Step 1: Locate and select the function app FunctionApp1d7509087fa. Step 2: Select Application Settings > FTP Access, change FTP access to FTPS Only, and click Save. References: <https://blogs.msdn.microsoft.com/appserviceteam/2018/05/08/web-apps-making-changes-to-ftp-deployments/> New Question SIMULATION The following section of the exam is a lab. To skip commenting, go to the Review Screen by selecting the Review Screen button in the upper left-hand corner and from the Review Screen, select 'Finished'. Controls Available

For any question, one or more of the following controls might be available. Keyboard Shortcuts Available

Exam features may be accessed using keyboard shortcuts. The following table describes the keyboard shortcuts that are available during this exam. Some keyboard shortcuts require that you press two or more keys at the same time. These keys are separated by a plus sign (+) in the table below. You recently deployed a web app named homepagelod7509087. You need to back up the code used for the web app and to store the code in the homepagelod7509087 storage account. The solution must ensure that a new backup is created daily. What should you do from the Azure portal?

A. See below explanation

Answer: A

Explanation:

Step 1: Locate and select the web app homepagelod7509087, select Backups. The Backups page is displayed.

Step 2: In the Backup page, Click Configure.

Step 3: In the Backup Configuration page, click Storage: Not configured to configure a storage account.

Step 4: Choose your backup destination by selecting a Storage Account and Container. Select the homepagelod7509087 storage account.

Step 5: In the Backup Configuration page that is still left open, select Scheduled backup On, and configure daily backups.

Step 6: In the Backup Configuration page, click Save.

Step 7: In the Backups page, click Backup.
