The root site collections of the web applications host the company intranet site, My Sites, and a Document Center.SharePoint is configured to restrict the default file types, which prevents users from uploading Microsoft Outlook Personal Folder (.pst) files.The company plans to require employees to maintain copies of their .pst files in their My Site libraries.You need to ensure that employees can upload .pst files to My Site libraries.In which location should you remove .pst files from the blocked file types? A. The File Types area of the Search service application section of Central AdministrationB. The General Security page in the site settings for the site collectionC. The Blocked File Types page in the site settings for the site collectionD. The General Security section of the Security page of Central Administration Answer: D QUESTION 67Drag and Drop QuestionA company has an Active Directory Domain Services (AD DS) domain and a SharePoint environment. The SharePoint environment includes a team site for each department.All domain users have Read permissions on the root site. Currently only Human Resources department members have access to the Human Resources team site.You have the following requirements for the Human Resources site:- Employees who are not members of the Human Resources department can view only content that is not marked as sensitive.- Human Resources department members can view all content.You need to configure permissions for the Human Resources site.Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Assign the Limited Access permission level on the sensitive content to all users who are not members of the Human Resources department.

Configure the sensitive content in the Human Resources site to break inheritance from the parent site.

Configure the Human Resources site to inherit permissions from the root site.

Remove the Read permission level on the sensitive content from users who are not members of the Human Resources department.

Answer Area

Answer:

Assign the Limited Access permission level on the sensitive content to all users who are not members of the Human Resources department.

Configure the sensitive content in the Human Resources site to break inheritance from the parent site.

Configure the Human Resources site to inherit permissions from the root site.

Remove the Read permission level on the sensitive content from users who are not members of the Human Resources department.

QUESTION 69 Hotspot Question You are managing a SharePoint document library app named App1. You need to stop inheritance for App1. On which page should you modify this setting? (To answer, select the appropriate page link in the answer area.) App1 › Settings

List Information

Name: App1
Web Address: http://server/my/personal/administrator/App1/Forms/AllItems
Description:

General Settings

- List name, description and navigation
- Versioning settings
- Advanced settings
- Validation settings
- Column default value settings
- Rating settings
- Audience targeting settings
- Form settings

Answer: App1 › Settings

List Information

Name: App1
Web Address: http://server/my/personal/administrator/App1/Forms/AllItems
Description:

General Settings

- List name, description and navigation
- Versioning settings
- Advanced settings
- Validation settings
- Column default value settings
- Rating settings
- Audience targeting settings
- Form settings

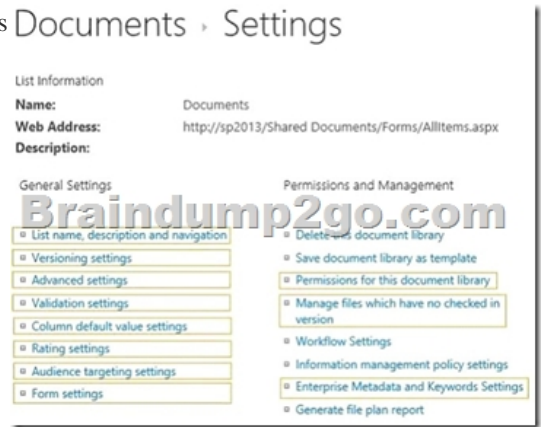

Permissions and Management

- Delete this document library
- Save document library as template
- Permissions for this document library
- Manage files which have no checked in version
- Enterprise Metadata and Keywords Settings

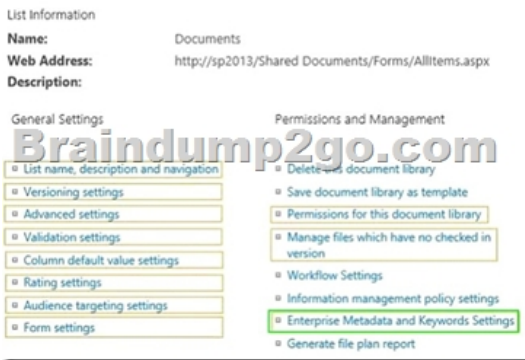

QUESTION 70 Contoso, Ltd. recently merged with Fabrikam, Inc. Each company has an Active Directory Domain Services (AD DS) domain. You are managing a SharePoint farm in the contoso.com domain. You need to enable users in the fabrikam.com domain to access the Contoso SharePoint farm and prevent users in the contoso.com domain from accessing resources in the fabrikam.com domain. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

A. Configure a two-way forest trust from the fabrikam.com domain to the contoso.com domain.
B. Add the fabrikam.com AD security groups to the SharePoint farm.
C. Configure a two-way forest trust from the contoso.com domain to the fabrikam.com domain.
D. Add the contoso.com AD security groups to the SharePoint farm.
E. Configure a one-way forest trust from the fabrikam.com domain to the contoso.com domain.
F. Configure a one-way forest trust from the contoso.com domain to the fabrikam.com domain.

QUESTION 71 Hotspot Question You are managing a SharePoint farm. All users in the farm have access to a document library app. You need to begin the process of enabling managed terms for the app. Which option should you select? (To answer, select the appropriate option in the answer area.)

Answer: Documents > Settings

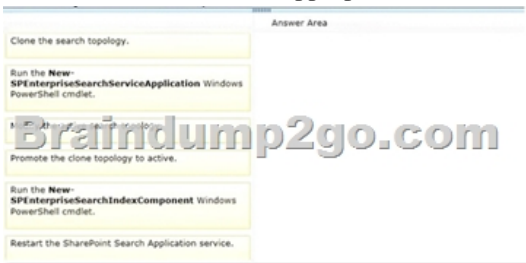

QUESTION 72 Drag and Drop Question You are managing a SharePoint site collection that contains a site for each department. Users in the Accounting department have the following requirements for the department SharePoint site: All group members must be able to create document workspaces, approve site content, and add group members. Group membership must be visible only to group members. Other users must not be able to request group membership. You need to meet the requirements of the Accounting department. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

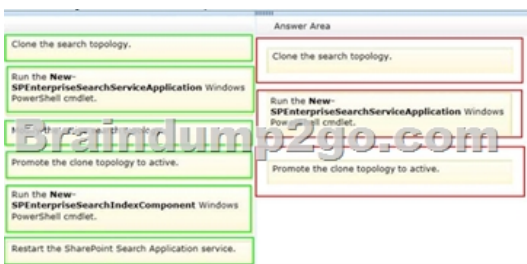

Answer:

Explanation: * Manage, but not create subsites. * Editing group membership, only available for existing members. QUESTION 73 You are configuring a query rule for a site in a SharePoint site collection. You need to promote specific search results during a defined date range only. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Configure actions for the rule. B. Configure query conditions for the rule. C. Add the rule with a source type. D. Add the rule without a source type. E. Configure publishing options for the rule. Answer: A, E Explanation: Without using any custom code, Search service application administrators, site collection administrators, and site owners can help searches respond to the intent of users by creating query rules. In a query rule, you specify conditions and correlated actions. When a query meets the conditions in a query rule, the search system performs the actions specified in the rule to improve the relevance of the search results, such as by narrowing results or changing the order in which results are displayed. For example, a query rule condition could be that a term in a query matches a particular term in a SharePoint term set, or that a query is frequently performed on a particular result source in a search system, such as videos. When the query rule condition is satisfied, a correlated action could be to show a specific item at the top of the search results. You can configure query rules for one or more result sources, and you can specify the time period during which the query rule is active. E: To make the query rule active during a particular time period, click Publishing, and then specify the period. Reference: Manage query rules in SharePoint Server 2013 QUESTION 74 Drag and Drop Question You are managing a SharePoint website. You need to add a search service component to the search topology. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation: * To make any changes to the search topology in a search installation that has items in the search index, you first have to create a new topology object. You modify this new topology object, a clone of the active topology, by adding or removing search components. After you have made the changes to the clone topology object, you make the clone the active topology. * SharePoint 2013 uses the web-based interface to show the current status of the topology. You change the topology by using Windows PowerShell. * The New-SPEnterpriseSearchServiceApplication adds a search service application to a farm. This cmdlet is used when the search functionality is first configured or when a new shared search application is added to a farm. SPEnterpriseSearchServiceApplication represents a self-contained aggregation of indexed content and properties available for search, and provides an anchor class for setting global search properties. A farm can include multiple search service applications.

QUESTION 75 Drag and Drop Question A SharePoint group named Accounting contains 50 user accounts. Group members plan to store documents in a SharePoint app. You need to ensure that only Accounting group members can store or view documents in the app. You must achieve this goal without affecting existing apps or permissions, and by using the least amount of administrative effort. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
