QUESTION 101 Drag and Drop Question You are managing a SharePoint search topology. You need to index custom entity extractor types (tokenized content) in unstructured documents. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

- Create a comma-separated word extraction dictionary.
- Modify the search service to include the extraction dictionary.
- Import the file by running the **Set-SPEnterpriseSearchCrawlContentSource** Windows PowerShell cmdlet.
- Import the file by running the **Import-SPEnterpriseSearchCustomExtractionDictionary** Windows PowerShell cmdlet.
- Modify the search schema to include the extraction dictionary.
- Create a tab-separated word part extraction dictionary.
- Create a comma-separated word part extraction dictionary.
- Create a tab-separated word extraction dictionary.

Answer:

Answer Area

Create a comma-separated word extraction dictionary.

Import the file by running the **Import-SPEnterpriseSearchCustomExtractionDictionary** Windows PowerShell cmdlet.

Modify the search schema to include the extraction dictionary.

Modify the search service to include the extraction dictionary.

Import the file by running the **Set-SPEnterpriseSearchCrawlContentSource** Windows PowerShell cmdlet.

Import the file by running the **Import-SPEnterpriseSearchCustomExtractionDictionary** Windows PowerShell cmdlet.

Modify the search schema to include the extraction dictionary.

Create a tab-separated word part extraction dictionary.

Create a comma-separated word part extraction dictionary.

Create a tab-separated word extraction dictionary.

QUESTION 102 Hotspot Question A company has a SharePoint farm. The environment contains a server-based virus scanner. You need to configure the SharePoint farm to clean infected documents when users open documents or save documents to their computers. How should you configure the antivirus settings? (To answer, select the appropriate check boxes in the answer area.)

Antivirus Settings
Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents.

Scan documents on upload

Scan documents on download

Allow users to download infected documents

Attempt to clean infected documents

Answer:

Antivirus Settings
Specify when you want documents stored in document libraries and lists to be virus scanned, and whether you want your virus scanner to attempt to clean infected documents.

Scan documents on upload

Scan documents on download

Allow users to download infected documents

Attempt to clean infected documents

QUESTION 103 You are managing a site collection in a SharePoint farm. You need to configure the minimum level of permissions necessary for users to manage lists in the site collection. What permission level should you configure? A. Contribute B. View Only C. Edit D. Read
Answer: C

QUESTION 104 You are managing a SharePoint farm. The SharePoint databases are configured to run on a dedicated instance of Microsoft SQL Server 2008 R2 Service Pack 1. You need to optimize query executions. What should you do? A. Set the maximum degree of parallelism for SQL Server instances to 0. B. Move the master database to a RAID 10 volume. C. Set the maximum degree of parallelism for SQL Server instances to 1. D. Set the maximum degree of parallelism for SQL Server instances to 32.
Answer: C
Explanation: Set max degree of parallelism (MAXDOP) to 1 for instances of SQL Server that host SharePoint databases to make sure that a single SQL Server process serves each request. Important: Setting the max degree of parallelism to any other number can cause a less optimal query plan to be used that will decrease SharePoint Server 2013 performance. [http://technet.microsoft.com/en-us/library/hh292622\(v=office.15\).aspx](http://technet.microsoft.com/en-us/library/hh292622(v=office.15).aspx)

QUESTION 105 Drag and Drop Question You install and deploy a SharePoint 2013 farm, and then use the database-attach method to upgrade from a SharePoint 2010 farm to the SharePoint 2013 farm. You need to upgrade a SharePoint 2010 site collection to a SharePoint 2013 site collection. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer Area

Run a site collection health check.

Create an upgrade evaluation site.

Perform a site collection upgrade.

Change the self-service upgrade settings.

Verify that the upgrade was successful and the site works as expected.

Answer:

Answer Area

Run a site collection health check.

Create an upgrade evaluation site.

Perform a site collection upgrade.

Change the self-service upgrade settings.

Verify that the upgrade was successful and the site works as expected.

QUESTION 106 A SharePoint farm has a very large search index. Users report that search results are too broad. You need to ensure that properties can be used to refine search results. Which two options should you configure? (Each correct answer presents part of

the solution. Choose two.) A. SearchableB. QueryableC. Complete MatchingD. RetrievableE. RefinableF. Sortable
Answer: BEExplanation: To create a managed property, add type code to the name, and enable a managed property as a refiner1. Verify that the user account that performs this procedure is an administrator of the Search service application.2. In Central Administration, in the Application Management section, click Manage service applications.3. On the Manage Service Applications page, click the Search service application in which you want to create a managed property.4. On the Search Administration page, in the Quick Launch, under Queries and Results, click Search Schema.5. On the Managed Properties page, click New Managed Property.6. On the New Managed Property page, in the Property name box, in the Name and description section, type the name of the new managed property, followed by the appropriate type code. For an overview of type codes, see Type codes.7. In the Type section, select the appropriate data type.8. In the Main characteristics section, set the following selections:QueryableRefinable: Yes - active or Yes - latentYou can also specify additional settings in this section.9. In the Mappings to crawled properties section, click Add a mapping.10. In the Crawled property selection dialog box, find the crawled property that you want to map to the managed property in the list, or search for it by typing the name of the crawled property in the box, and then clicking Find.

The forest contains two domains named americas.contoso.com and europe.contoso.com. A single SharePoint farm is located in the americas.contoso.com domain and uses Kerberos authentication. Users in the europe.contoso.com domain cannot access the Excel Services application in the americas.contoso.com domain when using an external data source. You need to ensure that users in the europe.contoso.com domain can use the Excel Services application with external data sources. What should you do? A. Deploy a SharePoint farm in the europe.contoso.com domain. B. Configure Kerberos constrained delegation. C. Configure basic Kerberos delegation. D. Configure anonymous access in the SharePoint farm. Answer: BExplanation: NOT A

http://blogs.technet.com/b/excel_services_powerpivot_for_sharepoint_support_blog/archive/2013/11/06/excel-services-2010-amp-2013-kerberos-configuration.aspx

<http://sharepoint.stackexchange.com/questions/66145/how-to-setup-kerberos-constrained-delegation-for-sharepoint-excel-services-and-a>
[http://technet.microsoft.com/en-us/library/ee662541\(v=office.14\).aspx](http://technet.microsoft.com/en-us/library/ee662541(v=office.14).aspx) In most enterprise environments, Excel Calculation Services will be running on a different computer from the data source. This means that Kerberos delegation (constrained delegation is recommended) will be required to enable data connections that use Integrated Windows authentication. For more information about how to configure Kerberos constrained delegation for Excel Services, see Configure Kerberos authentication for SharePoint 2010 Products (white paper). QUESTION 108A company's SharePoint environment contains three web applications. The company must record the following information for each document in any of the three web applications: The date and time at which the document was last reviewed. Additional custom date and time information as requirements are identified. You have the following requirements: - Ensure that the current information is available when searching content and for refining search results. - Ensure that the additional custom date and time information can be assigned to content in all web applications. - Ensure that SharePoint users who are not farm administrators can record additional date and time information as required. You need to meet the requirements. What should you do? A. Create a column of data type Date and Time in a document library in each site collection. B. In Central Administration, create a term set with a term of data type Date and Time. C. Create a content type that uses a custom field of data type Date and Time in each site collection. D. Create a site column of data type Date and Time in each site collection. Answer: B

QUESTION 109Drag and Drop QuestionA company has a multi-tenant SharePoint environment that includes a web application named WebApp1. WebApp1 is not secure. The company plans to install SharePoint apps that allow all tenants access to custom applications. You need to ensure that WebApp1 can host the SharePoint apps over a secure URL. Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Answer Area

- Install the SSL certificate on the SharePoint servers.
- Configure IIS to bind the WebApp1 website to the SSL certificate.
- Configure the SSL certificate in Central Administration.
- Use claims-based authentication to secure user accounts.
- Create an SSL certificate.
- Configure IIS to use Kerberos authentication.

Answer:

QUESTION 110 Drag and Drop Question You are troubleshooting services in a SharePoint environment. The services have the following logging requirements:- Business Connectivity Services must have only the minimum logging level.- Word Automation Services must log all errors.- The Search service logs must log all activity. You need to apply the appropriate trace log diagnostic level for each service. Which diagnostic level should you apply to each service? (To answer, drag the appropriate levels to the correct service or services in the answer area. Each level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
