QUESTION 181Drag and Drop QuestionYou have a SharePoint Server 2013 server farm.You plan to monitor the following:- Web page performance- Crawl database fragmentationYou need to identify which tools to use to monitor the farm.Which tools should you identify? (To answer, drag the appropriate tools the correct monitoring objectives. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 182You have a SharePoint Server 2013 server farm that contains a web application.A user receives an application error message that includes a Correlations.You need to identify the cause of the error.What should you do? A. Run the Get-SPDiagnosticConflictcmdlet.B. Review the Internet Information Services (IIS) logs.C. Run the Get-SPLogEventcmdlet.D. Review problems and solutions in the SharePoint Health Analyzer. Answer: C QUESTION 183You have a SharePoint Server 2013 server farm.You need to ensure that users can use the Newsfeed app on their My Site to aggregate user actions and system activities. Which type of cache should you configure? A. An output cacheB. An object cacheC. A BLOB cacheD. A distributed cache Answer: DExplanation:SharePoint 2013, makes use of distributed cache to cache newsfeeds, microblogging, conversations, security trimming, OneNote client access, and even keeps the FedAuth cookie for claims based authentication on the server side, so it's more secure, load balancer friendly, and works with webkit-based browsers that like to chop off your cookies at 64kb. QUESTION 184 Drag and Drop QuestionYou plan to deploy a SharePoint Server 2013 server farm.Three users named User1, User2, and User3 will perform administrative tasks.You need to identify to which group the users must be assigned to ensure that the users can perform the following tasks:- User1 must be able to configure application domains. - User2 must be able to organize enterprise keywords. - User3 must be able to manage blocked file types.The solution must minimize the number of privileges assigned to each user.To which group should you assign each user? (To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 185You have a SharePoint Server 2013 server farm.You need to configure the People Picker control to display only users who are members of the current site collection.Which tool should you use? A. Central AdministrationB. PsconfigC. Internet Information Services (IIS) ManagerD. Stsadm Answer: DExplanation:You configure the People Picker web control at the zone level for a farm by using the Stsadmsetproperty operation. By configuring the settings for the control, you can filter and restrict the results that are displayed when a user searches for a user, group, or claim. Those settings will apply to every site within the site collection. QUESTION 186A SharePoint environment contains a single web application at http://app1. Users access a site collection under the web application by using the URL http://portal.contoso.com.You need to ensure that the site collection is also accessible at http://collaboration.contoso.com.What should you do? A. Run the New-SPSite Windows PowerShell cmdlet.B. Run the Set-SPSiteUrl Windows PowerShell cmdlet.C. Add collaboration.contoso.com as an alternate access mapping for the web application.D. Extend the web application and add collaboration.contoso.com to the Intranet Zone. Answer: BExplanation:The Set-SPSiteUrl cmdlet adds or changes an URL mapping for the site. The Set-SPSiteUrl cmdlet only applies to the root site collection for a host name that is, http://www.contoso.com. This cmdlet cannot be directly run against a managed path site collection underneath the root that is, http://www.contoso.com/sites/test. QUESTION 187Drag and Drop QuestionYou have a SharePoint Server 2013 server farm that contains a single server. The farm has a User Profile Service Application named App1.You need to configure delegated administration for the farm.The solution must meet the following requirements:- A user named User1 must be able to manage audiences for App1. - A user named User2 must be able to create web applications. - The number of assigned permissions must be minimized.To which group should you assign each user? (To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 188Drag and Drop QuestionContoso, Ltd. Recently merged with Fabrikam, Inc. Each company has an Active Directory Domain Services (AD RS) domain. You are managing the SharePoint environment in each domain.You need to enable users in the Fabrikam.com domain to access the Contoso SharePointfarm but prevent users in the Contoso.com domain from accessing resources in theFabrikam SharePoint farm event if they have been explicitly granted access to a site.

Answer:

QUESTION 189Hotspot QuestionYou have a SharePoint server 2013 server farm.Users report that the past week, some pages were slow to render.You need to identify the 10 pages in the farm that take the longest to load.Which link should you select? (To answer, select the appropriate link in the answer area.)

Answer:

QUESTION 190A company has a SharePoint environment that contains two SharePoint servers and a server that runs Microsoft SQL Server.A web application stores content in a single content database. All three servers are configured to meet or exceed the minimum hardware and software requirements. The SharePoint environment is primarily used for team collaboration and document storage. All of the SharePoint Servers must be able to respond to user requests. Web traffic must be assigned to the server with the lowest health threshold value.You need to configure the SharePoint farm.Which service should you use? A.   Request Management B.   Microsoft Network Load Balancer (NLB)C.   Microsoft SharePoint Foundation Subscription SettingsD.   Document Conversions Load BalancerE.   Work Management Answer: AExplanation:Configure Request Manager in SharePoint Server 2013 Request Manager is functionality in SharePoint Server 2013 that enables administrators to manage incoming requests and determine how SharePoint Server 2013 routes these requests.The front-end web server filtering process follows these steps:1. The routing pool

is either the current front-end web server or one or more front-end web servers that request routing selects.2. All matching rules are checked to find the smallest health threshold value.3. Remove front-end web servers in the routing pool that have health scores greater than or equal to the smallest health threshold value.https://technet.microsoft.com/en-us/library/jj712708.aspx Latest 70-331 Questions and Answers from Microsoft Exam Center Offered by Braindump2go for Free Share Now!
