QUESTION 101 Where should a Citrix Engineer import a self-signed hypervisor host certificate in order to use a host connection URL in a XenDesktop/vSphere deployment? A. Personal B. Trusted People C. Enterprise Trust D. Trusted Root Certificate Authorities Answer: B QUESTION 102 A Citrix Engineer must ensure that evaluation licenses are replaced with XenDesktop Enterprise licenses already imported to the Citrix License Server. Which step must the engineer take to ensure that XenDesktop can be fully licensed? A. Restart the License Server. B. Update the license policy in Citrix Studio. C. Change the product version in Citrix Studio. D. Change the product version on the License Server. Answer: C QUESTION 103 Which two of the listed elements does a Citrix Engineer need to verify when adding a Delivery Controller to an existing XenDesktop site? (Choose two.) A. Citrix Policies B. Windows Firewall C. Database platform version D. Site database permissions E. OS version of Server and Desktop OS machines Answer: BD QUESTION 104 Scenario: A Citrix Engineer is using the XenApp Services Support URL to enable support for legacy clients. The services URL is configured with explicit authentication. The engineer needs to configure StoreFront to support pass-through for a new group of legacy clients. How could the engineer configure pass-through authentication for the new group of legacy clients while maintaining explicit authentication for existing legacy clients? A. Add the pass-through authentication method in the site configuration file. B. Change the services support site authentication method to pass-through. C. Create a new store and set pass-through authentication as the 'LogonMethod' on the services URL. D. Add the pass-through authentication method to the legacy services URL using the StoreFront console. Answer: C QUESTION 105 A Citrix Engineer is in the process of setting up a remote access solution using self-signed certificates. To help ensure a secure remote connection, the engineer must install a Root certificate on the _____ and _____. (Choose the two correct options to complete the sentence.) A. endpoint device B. StoreFront server C. Domain Controllers D. Delivery Controllers Answer: AB QUESTION 106 Which two options would a Citrix Engineer select when using the XenDesktop Setup Wizard to deploy streamed desktop OS machines? (Choose two.) A. Delivery Group B. Device Collection C. vDisk in Private Mode D. vDisk in Standard Mode Answer: BD QUESTION 107 Scenario: A Citrix Engineer needs to implement HDX Flash Redirection for virtual desktops in a XenDesktop environment. HDX Flash policies are configured to use both client-side rendering and client-side content fetching. The engineer tests the Flash redirection functionality by viewing an online Flash video on the virtual desktop and checking the results in Citrix Director. Citrix Director displays that client-side rendering is being used with server-side content fetching. What does the engineer need to do to make sure both rendering and content fetching are completed on the client? A. Install Flash on the client device. B. Configure the Flash latency threshold to 50 ms. C. Enable direct Internet access for the client device. D. Disable server-side content fetching on the client device. Answer: C QUESTION 108 A Citrix Engineer must use the XenDesktop Setup Wizard to provision 50 desktops. Which machine catalog type should the engineer select to implement hosted shared desktops? A. Physical machine catalog B. Remote PC Access machine catalog C. Windows Server Operating System machine catalog D. Windows Desktop Operating System machine catalog Answer: C QUESTION 109 Scenario: A Citrix Engineer has updated the XenDesktop master image, which the head office users connect to in order to use Personal vDisk. When testing the new image, the engineer discovers that the Personal vDisk feature stopped working. What could the engineer do to prevent this issue from occurring

during future updates? A. Ensure that the Update Inventory process is NOT interrupted. B. Ensure the master image and Personal vDisk are on the same storage type. C. Ensure that neither updates nor applications are placing binaries in the administrator user profile. D. Ensure that the installed data on the Personal vDisk does NOT exceed more than 50% of the vDisk size. Answer: A

QUESTION 110 Scenario: A Citrix Engineer needs to deploy XenDesktop to deliver a pool of 100 virtual desktops to users. The engineer needs to maintain a single shared image for all 100 virtual desktops. The engineer also needs to ensure that users assigned to these pooled desktops have the capability to customize their desktops and to install applications permanently. Additionally, the storage platform does NOT have thin-provisioning capabilities. Which two technologies should the engineer implement to meet the above requirements? (Choose two.) A. Personal vDisk B. Remote PC Access C. Provisioning Services D. Citrix Profile Management E. Machine Creation Services Answer: AC
