2016/09 Microsoft New 70-533: Implementing Microsoft Azure Infrastructure Solutions Exam Questions Updated Today! Free Instant Download 70-533 Exam Dumps (PDF & VCE) 145 Q&As from Braindump2go.com Today! 100% Real Exam Questions! 100% Exam Pass Guaranteed! 1. | 2016/09 New 70-533 Exam Dumps (PDF & VCE) 145Q&As Download: <http://www.braindump2go.com/70-533.html> 2. | 2016/09 New 70-533 Exam Questions & Answers: <https://drive.google.com/folderview?id=0B75b5xYLjSSNfjZVVmtFSVhfTExxZGdPTWFRUWNNoRWgzbfJ0NWtWMnhXZnBLWU1ZRWdhckk&usp=sharing> QUESTION 31 Hotspot Question You manage an Azure subscription. You develop a storage plan with the following requirements:- Database backup files that are generated once per year are retained for ten years. - High performance system telemetry logs are created constantly and processed for analysis every month. In the table below, identify the storage redundancy type that must be used. Make only one selection in each column.

Redundancy	DB Backups	Telemetry Logs
Locally redundant storage (LRS)	<input type="radio"/>	<input type="radio"/>
Zone-redundant storage (ZRS)	<input type="radio"/>	<input type="radio"/>
Geo-redundant storage (GRS)	<input type="radio"/>	<input type="radio"/>
Read-access geo-redundant storage (RA-GRS)	<input type="radio"/>	<input type="radio"/>

Answer:

Redundancy	DB Backups	Telemetry Logs
Locally redundant storage (LRS)	<input type="radio"/>	<input checked="" type="radio"/>
Zone-redundant storage (ZRS)	<input type="radio"/>	<input type="radio"/>
Geo-redundant storage (GRS)	<input checked="" type="radio"/>	<input type="radio"/>
Read-access geo-redundant storage (RA-GRS)	<input type="radio"/>	<input type="radio"/>

QUESTION 32 You administer an Azure Storage account with a blob container. You enable Storage account logging for read, write and delete requests. You need to reduce the costs associated with storing the logs. What should you do? A. Execute Delete Blob requests over https. B. Create an export job for your container. C. Set up a retention policy. D. Execute Delete Blob requests over http. Answer: C Explanation: To ease the management of your logs, we have provided the functionality of retention policy which will automatically cleanup 'old' logs without you being charged for the cleanup. It is recommended that you set a retention policy for logs such that your analytics data will be within the 20TB limit allowed for analytics data (logs and metrics combined).

QUESTION 33 You administer an Azure Storage account named contosostorage. The account has a blob container to store image files. A user reports being unable to access an image file. You need to ensure that anonymous users can successfully read image files from the container. Which log entry should you use to verify access?

A. Option AB. Option BC. Option CD. Option D Answer: A Explanation:

<http://blogs.msdn.com/b/windowsazurestorage/archive/2011/08/03/windows-azure-storage-logging-using-logs-to-track-storage-requirements.aspx> QUESTION 34 Hotspot Question You have an Azure SQL Database named Contosodb. Contosodb is running in the Standard/S2 tier and has a service level objective of 99 percent. You review the service tiers in Microsoft Azure SQL Database as well as the results of running performance queries for the usage of the database for the past week as shown in the exhibits. (Click the Exhibits button.)

Average CPU Utilization In Percent	Maximum CPU Physical Data	Average Log Write	Maximum Log Write
23.4	93.1	21.0	48.0

Fit Percent	Log Write Fit Percent	Physical Data Read Fit Percent
93.1	21.0	48.0

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

- The database can be moved to the Basic tier without compromising performance.
- The database can be moved to the Standard/S2 tier without compromising performance.
- The database must be moved to the Premium/P1 tier to satisfy the service level objective.

Answer:

	Yes	No
The database can be moved to the Basic tier without compromising performance.	<input type="radio"/>	<input checked="" type="radio"/>
The database can be moved to the Standard/S2 tier without compromising performance.	<input checked="" type="radio"/>	<input type="radio"/>
The database must be moved to the Premium/P1 tier to satisfy the service level objective.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 35 Your company is launching a public website that allows users to stream videos. You upload multiple video files to an Azure storage container. You need to give anonymous users read access to all of the video files in the storage container. What should you do? A. Edit each blob's metadata and set the access policy to Public Blob. B. Edit the container metadata and set the access policy to Public Container. C. Move the files into a container sub-directory and set the directory access level to Public Blob. D. Edit the container metadata and set the access policy to Public Blob. Answer: C !!!RECOMMEND!!!
