You get an order from your company CIO to identify whether a database integrity check (DBCC CHECKDB) was run for a particular database. Which log file should you examine? A. log.trcB. default.trcC. ERRORLOGD. SQLAGENT Answer: C QUESTION 32You are the administrator of a SQL Server 2008 instance. Users report that they are unable to connect to the named instances. You check and verify that they can only connect to the default instance. You also ensure that all SQL Server instances run normally. You have to start the service which is required to connect to the named instances. Which service should you start? A. ServerB. SQL Server AgentC. SQL Server BrowserD. SQL Active Directory Helper Answer: C QUESTION 33You are the administrator of a SQL Server 2008 instance. There are user-defined stored procedures. You have to ensure two things. First the names of all user-defined stored procedures must contain the prefix usp_ on all instances; secondly stored procedures wich do not contain this prefix cannot be created by you. What should you do to ensure these two? A. You should create a policy that targets the name of the stored procedure that is evaluated on change.B. You should create a policy that targets the name of the stored procedure that is evaluated on demand.C. You should create a condition that targets the name of stored procedure that is evaluated on demand.D. You should create a condition that targets the name of the stored procedure that is evaluated on change. Answer: A QUESTION 34You are the administrator of a SQL Server 2008 instance. A new SQL Agent job has been created by you. The job includes a Windows PowerShell job step which transfer data between servers by using the SQLCmd utility. If the job fails, you have to make sure that an operator named ReactGroup is informed by receiving an e-mail. What action should you perform to achieve this goal? A. First you should enable Notifications. Direct the Notification to the ReactGroup operator on job failure after you create the ReactGroup operator.B. First you should enable Notifications. Direct the Notification to the ReactGroup operator on failure of the Powershell job step after you create the ReactGroup operator.C. First you should assign the ReactGroup operator as the failsafe operator. Then enable the job after you create the ReactGroup operator.D. First you should configure the job step proxy account to use the ReactGroup operator account after you create the ReactGroup operator. At last choose the proxy account for the e-mail profile. Answer: A QUESTION 35 You are the administrator of a SQL Server 2008 instance. There is a stored procedure. The stored procedure implements a database maintenance process.A SQL Server Agent job should be created to that runs the stored procedure. Besides this, You have to make sure that after it is completed successfully, the job is removed. What should you do? A. You should create a job which is assigned to the Database Maintenance categoryB. You should create an Alert which will run another to delete the maintenance job.C. You should create a job. You schedule the job to run only once.D. You should create a job. The job uses the Automatically delete job option Answer: D QUESTION 36You are the administrator of a SQL Server 2008 instance which contains multiple Agent jobs. The jobs run each job on each day of the week by using seven shared schedules. You have to make sure that a job named Job4 doesn't run Wednesday. Which action should you perform to achieve this goal? A. You should remove the schedule for Wednesday from Job4.B. You should add a new Job4 schedule for Wednesday and disable it.C. You should delete the schedule for Wednesday.D. You should disable the schedule for Wednesday. Answer: A QUESTION 37You are a database developer for your company. You use the following Transact-SQL code.SELECT e.Resume,j.EmployeeID FROMJobCandidate j, Employee eWHERE j.EmployeeID =* e.EmployeeIDYou need to rewrite this code to be ANSI compliant. How should you rewrite the code? A. SELECT e.Resume, j.EmployeeID FROM JobCandidate AS j LEFT OUTER JOIN Employee AS eON EmployeeID = e.EmployeeIDB. SELECT e.Resume, j.EmployeeID FROM JobCandidate AS jFULL OUTER JOIN Employee AS eON EmployeeID = e.EmployeeIDC. SELECT e.Resume, j.EmployeeID FROM JobCandidate AS j RIGHT OUTER JOIN Employee AS eON EmployeeID =

e.EmployeeIDD.   SELECT e.Resume, j.EmployeeID FROM JobCandidate AS j CROSS JOIN Employee AS e Answer: C QUESTION 38You are the administrator of a SQL Server 2008 instance. There is a management data warehouse that uses the data collector to collect performance data. You intend to maintain the management data. You want to implement a data collection process. The process can gather and upload data in the management data warehouse on different schedules. Which process should you implement? A.   You should create a cached data collectionB.   You should create an on-demand non-cached data collectionC.   You should create a scheduled non-cached data collectionD.   You should create two different SQL Agent jobs that are scheduled stimultaneously Answer: A QUESTION 39You are the administrator of a remote SQL Server 2008 instance.You notice that the application has a poor performance. On the remote SQL Server instance, you capture a workload of the remote instance to a trace table by using SQL Profiler.You have to use the Database Engine Tuning Advisor to analyze the workload of the remote SQL Server instance on a local SQL Server instance. Which action should you perform to achieve this goal? A.   You should recapture the workload by using the data collector.B.   You should enable the XP_MSVER stored procedure on the local server.C.   You should enable the XP_MSVER stored procedure on the remote serverD.   You should recapture the workload to a trace file by using SQL Profiler. Answer: D QUESTION 40You are the administrator of a SQL Server 2008 instance. According to the company requirement, you have to move the application from Microsoft SQL Server 2000 to Microsoft SQL Server 2008. You have to monitor the SQL Server instance to record the use of features. These features will be discontinued. What should you do? A.   The SQL Server 2008 Upgrade Advisor should be used.B.   The SQL Server Profiler which captures the SQL:BatchCompleted and Exception event classes should be used.C.   A SQL server-side trace that captures the Deprecation Announcement and Deprecation Final Support event classes should be usedD.   A SQL server-side trace that captures the SQL:BatchCompleted and Exception event classes should be used. Answer: C   100% Full Money Back Guarantee Promised By Braindump2go to All 70-432 Exam Candiates: Braindump2go is confident that our NEW UPDATED 70-432 Exam Questions and Answers are changed with Microsoft Official Exam Center, If you cannot PASS 70-432 Exam, nevermind, we will return your full money back!
