QUESTION 135You need to recommend a management pack template to monitor the web applications that run on the Windows servers.Which management pack template should you recommend? A.   Web Application Transaction MonitoringB.   .NET Application Performance MonitoringC.   TCP PortD.   Process Monitoring Answer: ACase Study 6: Fabrikam, Inc (Questions 136 - Questions 145)OverviewFabrikam, Inc. is a resale company that has 3,000 employees.The company has a main office and a branch office. The main office is located in London. The branch office is located in Montreal. The offices connect to each other by using a WAN link. Each office connects directly to the Internet.Existing EnvironmentActive DirectoryThe network contains an Active Directory forest named fabrikam.com. The forest contains a single domain. All servers run Windows Server 2012 R2.The main office contains two domain controllers named LON-DC1 and LON-DC2. The branch office contains two domain controllers named MON-DC1 and MON-DC2. Each office is configured as an Active Directory site. The site in London uses an IP address space of 192.168.0.0/17. The site in Montreal uses an IP address space of 192168.128.0/17.System Center 2012 R2 InfrastructureFabrikam has a System Center 2012 R2 infrastructure. The infrastructure is configured as shown in the following table.

Server name	Role
LON-SQL1	The database server for System Center 2012 R2
LON-VMM1	A Virtual Machine Mana server that has all of the installed
LON-SM1	A Service Manager serve the features installed
LON-C	the features installed
LON-OM1	An Operations Manager server
LON-OM2	An Operations Manager server
MON-GW1	An Operations Manager
LON-AC1	An App Controller server
LON-DPM1	A Data Protection Mana server

LON-OM1, LON-OM2, and MON-GW1 are in the same management group. LON-OM1 and LON-OM2 have Windows Identity Foundation (WIF) installed.LON-VMM1 is configured for distributed key management.The Microsoft Monitoring Agent is installed on 20 servers in the London office and 15 servers in the Montreal office. The servers in the London office are configured to use LON- OM1 as a management server. The servers in the Montreal office are configured to use MON-GW1 as a management server. Operations Manager is used for server and application monitoring.Windows Server Update Services (WSUS) is installed on a server named LON-WSUS1.ApplicationsYou have an application named App1 that is an order tracing application. App1 is written in unmanaged code.Customers purchase products on the Fabrikam web site by using a web application named App2. App2 requires that users be authenticated. The check-out process for purchases has multiple steps.You have an application named App3 that is a three-tier accounting application. App3 currently runs on physical servers.Incident ManagementUsers enter incidents in Service Manager. When an incident is created, an incident event workflow is triggered to gather network information.RequirementsPlanned ChangesFabrikam plans to implement the following changes:- Deploy App3 as a VMM service named Service3- Monitor network devices by using Operations Manager. - Create Operations Manager reports by using Report Builder. - Replace App1 with a new Microsoft .NET Framework application. - Provide users with the ability to select an impact value of All computers for an incident- Modify the incident event workflow to be triggered when an incident is modified or created.Technical RequirementsFabrikam must meet the following technical requirements:- In the London office, discover only network devices that contain Vendor1 or Vendor2 in their description.- Monitor the availability of App2 from locations in Europe, North America, and Asia. - Use VMM to manage updates to the virtualization infrastructure. - Be able to view App1 performance monitoring event details.- Implement Operations Manager reporting.- Be able to view Service3 availability.- Back up the VMM encryption key. QUESTION 136You need to recommend a tool to view the performance monitoring results of App1.What should you recommend? A.   The Performance Monitor WizardB.   The Operations Manager web consoleC.   PerfViewD.   Visual Studio Authoring Extensions Answer: B Explanation:The answer is "B" because in the question it states;Operations Manager is used for server and application monitoring. http://technet.microsoft.com/en-us/library/hh298606.aspx QUESTION 137You need to recommend which configurations must be performed to meet the requirements forService3.What should you include in the recommendation? A.   Configure Global Service Monitor.B.   Integrate Operations Manager and VMM.C.   Create a Windows Events monitor.D.   Create a Windows Performance Counters monitor. Answer: BExplanation:http://technet.microsoft.com/en-us/library/hh427287.aspx QUESTION 138You need to implement the planned reporting changes after the Reporting server in the London office is deployed.What should you do? A. From the Operations Manager console, configure the Security settings.B.   From the Operations Manager Shell, run the Enable-SCOMOperationalDataReportingcmdlet.C.   From Microsoft SQL Server Reporting Services (SSRS), upload a report model (.smdl) file and select a data source.D.   From the Operations Manager console, configure the Reporting settings. Answer: D QUESTION 139Hotspot QuestionYou need to ensure that you can manage the updates to the virtualization infrastructure.You write the following Windows PowerShell script:

```
$User = Get-Credential
Add-SCUpdate... ...Credential $User
```

How should you complete the script? To answer, select the appropriate options in the answer area. **Answer Area**
