QUESTION 312 You have a self-hosted Windows Communication Foundation (WCF) service. You need to configure the service to provide an X.509 certificate during authentication. What should you use to configure the service?

A. the Certificate property of the X509CertificateInitiatorServiceCredential class  
B. the SetCertificate method of the X509CertificateInitiatorServiceCredential class  
C. the SetCertificate method of the X509CertificateRecipientServiceCredential class  
D. the TrustedStoreLocation property of the X509CertificateRecipientServiceCredential class

Answer: C

QUESTION 313 You are integrating a Windows Communication Foundation (WCF) service within an enterprise wide Service Oriented Architecture (SOA). Your service has the following service contract:

```
[ServiceContract] public class CreditCardConfirmationService { [OperationContract] boolean ConfirmCreditCard(string ccNumber); double OrderAmount(int orderNumber); }
```

You need to allow the code in the ConfirmCreditCard method to participate automatically in existing transactions. If there is no existing transaction, a new transaction must be created automatically. What should you do?

A. Inside the ConfirmCreditCard method, surround the code that must participate in the transaction with a using(new TransactionScope()) block.  
B. Inside the ConfirmCreditCard method, surround the code that must participate in the transaction with a using(new CommittableTransaction()) block.  
C. Add an [OperationBehavior(TransactionScopeRequired=true)] attribute to the ConfirmCreditCard method.  
D. Add an [OperationBehavior(TransactionAutoComplete=true)] attribute to the ConfirmCreditCard method.

Answer: C

QUESTION 314 A Windows Communication Foundation (WCF) service sends notifications when the service is started and stopped. You need to implement a client that logs these notifications. Which class should you use?

A. AnnouncementService  
B. AnnouncementClient  
C. DiscoveryClient  
D. HttpListener

Answer: A

QUESTION 315 You are developing a client that sends several types of SOAP messages to a Windows Communication Foundation (WCF) service method named PostData. PostData is currently defined as follows:

```
[OperationContract] void PostData(Order data);
```

You need to modify PostData so that it can receive any SOAP message. Which code segment should you use?

A. [OperationContract(IsOneWay=true, Action="v", ReplyAction="void PostData(Order data);")]  
B. [OperationContract(IsOneWay=true, Action="v", ReplyAction=".")] addPostData(BodyWriter data);  
C. [OperationContract] void PostData(BodyWriter data);  
D. [OperationContract] void PostData(Message data);

Answer: D

QUESTION 316 A Windows Communication Foundation (WCF) client and service share the following service contract interface.

```
[ServiceContract] public
```

interface IContosoService {[OperationContract]void SavePerson(Person person);}They also use the following binding.  
NetTcpBinding binding new NetTcpBinding { TransactionFlow = true };The client calls the service with the following codeusing  
(TransactionScope ts = new TransactionScope(TransactionScopeOption.Required)){ IContosoService client =  
factoryCreateChannelO;client SavePerson(person);Console.WriteLine(TransactionCurrentTransactionInformation.  
DistributedIdIdentifier);ts.CompleteO;}The service has the following implementation for SavePersonpublic void IContosoService  
SavePerson(Person person){ person.SaveO;Console.WriteLine(TransactionCurrentTransactionInformation.DistributedIdIdentifier);}  
The distributed identifiers do not match on the client and the serverYou need to ensure that the client and server enlist in the same  
distributed transactionWhat should you do? A. Add the following attributes to the SavePerson operation on IContosoService.  
[OperationBehavior(TransactionScope.Required = true)][TransactionFlow(TransactionFlowOption.Mandatory)]B. Add the  
following attributes to the SavePerson operation on IContosoService [TransactionFlow(TransactionFlowOption.Mandatory)]  
[OperationBehavior(TransactionScope.Required = true)]C. Add the following attribute to the SavePerson operation on  
IContosoService[OperationBehavior(TransactionScope.Required = true)]Add the following attribute to the implementation of  
SavePerson.[TransactionFlow(TransactionFlowOption.Allowed)]D. Add the following attribute to the SavePerson operation on  
IContosoService[TransactionFlow(TransactionFlowOption.Allowed)] Add the following attribute to the implementation of  
SavePerson. [OperationBehavior(TransactionScope.Required = true)] Answer: D QUESTION 317A Windows Communication  
Foundation (WCF) client uses the following service contract. (Line numbers are included for reference only.)01 [ServiceContract]02  
public interface IService03 {04 [OperationContract]05 string Operation1();06 [OperationContract]07 string Operation2();  
08 }You need to ensure that all calls to Operation1 and Operation2 from the client are encrypted and signed. What should you do?  
A. Set the ProtectionLevel property in line 01 to EncryptAndSign.B. Set the ProtectionLevel property in line 04 and line 06 to  
Sign.C. Add a SecurityCriticalAttribute for each operation.D. Add a SecuritySafeCriticalAttribute for each operation. Answer:  
A QUESTION 318You are creating a Windows Communication Foundation (WCF) service that implements operations in a  
RESTful manner. You need to add a delete operation. You implement the delete method as follows:void DeleteItems(string id);You  
need to configure WCF to call this method when the client calls the service with the HTTP DELETE operation. What should you  
do? A. Add the WebInvoke(UriTemplate="/Items/{id}", Method="DELETE") attribute to the operationB. Add the HttpDelete  
attribute to the operationC. Replace the string parameter with a RemovedActivityAction parameterD. Replace the return type  
with RemovedActivityAction. Answer: A QUESTION 319A WCF service code is implemented as follows. (Line numbers are  
included for reference only)01 [ServiceContract]02 [ServiceBehavior(InstanceContextMode =03 InstanceContextModeSingle)]04  
public class CalculatorService05 {06 [OperationContract]07 public double Calculate(double op1, string op. double op2)08 {24 }25 }  
You need to increase the rate by which clients get the required response from the service.What e two possible ways to achieve this  
goal? (Each correct answer presents a complete sokiion Choose two.) A. Change the service behavior to the following:  
[ServiceBehavior(InstanceContextMode=InstanceContextMode.Single, ConcurrencyMode=ConcurrencyMode.Multiple)]B.  
Change the service behavior to the following.[ServiceBehavior(InstanceContextMode=InstanceContextMode.PerCall)]C. Require  
the clients use threads, the Parallel Task Library, or other mechanism to issue service calls in parallel.D. Require the clients to use  
async operations when calling the service. Answer: AB QUESTION 320You are developing a windows Communication Foundation  
(WCF) service that will be hosted in Microsoft Internet Information Services (IIS) 7.0.The service must be hosted in an IIS  
application named Info. You need to enable this service to be hosted in IIS by changing the web.config fileWhich XML segment  
should you add to the web.config file?

```
A. <serviceHostingEnvironment>  
  <transportConfigurationTypes>  
    <add name="Info.svc" transportConfigurationType="FileNotRequired" />  
  </transportConfigurationTypes>  
</serviceHostingEnvironment>  
B. <serviceHostingEnvironment>  
  <serviceActivations>  
    <add relativeAddress="Info.svc" service="Info" />  
  </serviceActivations>  
  <transportConfigurationTypes>  
    <add name="Info" transportConfigurationType="Info.svc" />  
  </transportConfigurationTypes>  
</serviceHostingEnvironment>  
C. <serviceHostingEnvironment>  
  <serviceActivations>  
    <add relativeAddress="Info" service="Info.svc" />  
  </serviceActivations>  
</serviceHostingEnvironment>
```

A. Option AB. Option BC. Option CD. Option D Answer: B Braindump2go Promise All 70-513 Questions and Answers are the Latest Updated,we aim to provide latest and guaranteed questions for all certifications.You just need to be braved in trying then we will help you arrange all left things! 100% Pass All Exams you want Or Full Money Back! Do yo want to have a try on passing 70-513?
