QUESTION 101You need to recommend a solution to meet the monitoring requirements for App2.What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.) A.   An aggregate rollup monitor B.   Service monitorsC.   A dependency rollup monitorD.   A distributed application Answer: DExplanation:"Ensure that the instances of the App2 hosted in Cloud1 are monitored from a graphical diagram that displays all of the components of App2"For which you will use a DA. QUESTION 102You need to implement a solution to meet the monitoring requirements for App1.Which template should you use? A.   TCP PortB.   Web Application Transaction MonitoringC.   Process MonitoringD.   Windows Service Answer: BExplanation:The Web Application Transaction Monitoring template lets you test a website or web-based application by sending requests over HTTP, validating their response, and measuring their performance. This can be a simple test to determine if the website is responding, or it can be a complex set of requests to simulate a user who is performing such actions as logging on to the site and browsing through a set of pages. QUESTION 103You need to recommend a solution to monitor the SharePoint Server 2010 server farm. The solution must meet the technical requirements. What should you include in the recommendation? A.   A distributed applicationB.   A synthetic transactionC.   A subscriptionD.   An event rule Answer: B QUESTION 104You need to recommend a solution to meet the compliance requirements for the new instance of App1 in the New York office.What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.) A.   A security templateB.   The Audit Collection Services (ACS)C.   A custom management packD.   The Process Pack for IT GRC Answer: DExplanation:The Process Pack for IT GRC is designed to facilitate compliance activities conducted by your organization's IT experts, auditors, accountants, attorneys and other compliance professionals. http://technet.microsoft.com/en-us/library/dd206732.aspxhttp://technet.microsoft.com/en-us/library/dd206732.aspx QUESTION 105 You need to make changes to the virtual machine template used to deploy web servers for App2. The changes must resolve the NLB issue. Which setting should you modify for the virtual machine template? A.   Application ProfilesB.   Guest OS ProfilesC. Capabilities ProfilesD.   Hardware Profiles Answer: DExplanation:http://technet.microsoft.com/en-us/library/hh335098.aspx Configure the network adapter to use a logical network with static IP address assignment, static MAC addresses, and, depending on the hypervisor that you want to deploy the service to, enable MAC address spoofing.If you are using a hardware profile, configure these settings in the hardware profile. QUESTION 106You need to implement a solution to meet the IM requirements for the help desk users.What should you do? A.   Create a Service Manager workflow.B.   Install Unified Communications Managed API 3.0 Runtime on LON-SM1.C.   Create an IM channel.D.   Install the Lync 2010 client on LON-SM1. Answer: DExplanation: http://technet.microsoft.com/en-us/library/hh495482.aspx QUESTION 107You need to recommend which Orchestrator integration packs must be deployed to reduce the amount of development effort required to deploy an instance of VMT1.Which Orchestrator integration packs should you recommend? A.   the System Center Integration Pack for System Center 2012 Virtual Machine Manager and the System Center Integration Pack for System Center 2012 Operations ManagerB.   the System Center Integration Pack for System Center 2012 Operations Manager and the System Center Integration Pack for System Center 2012 Service Manager C.   the System Center Integration Pack for System Center 2012 Service Manager and the System Center Integration Pack for System Center 2012 Configuration ManagerD.   the System Center Integration Pack for System Center 2012 Virtual Machine Manager and the System Center Integration Pack for System Center 2012 Service Manager Answer: D QUESTION 108Hotspot QuestionYou need to recommend a solution to meet the monitoring requirements for the database administrators.Which components should you recommend deploying in Operations Manager and SharePoint Server 2010?
