MB2-707 Dumps PDF&VCE Full Version Get: <http://www.braindump2go.com/mb2-707.html> QUESTION 21 You are configuring user access in Microsoft Dynamics CRM. You need each account to have a unique group of people who have write permissions to the account. What should you do? A. Have Dynamics CRM automatically create access teams for each record, and manually share the account with the appropriate B. Create an owner team, and assign the accounts to the owner team. C. Create an access team template, and add to the account form a sub-grid that references the access team template. D. Manually create an access team record for each account and assign the account to the access team. Answer: D QUESTION 22 All users in your organization share a security role named Contoso Employee. The only current Account form is assigned to that role and is configured as a fallback. The marketing team has an additional security role named Contoso Marketing, and your support team has an additional security role named Contoso Support. You need to create a new form for the marketing team. You have the following requirements: - The form must be the only form available to the marketing team. - The support team must have access to this new form and the current form. What should you do? A. Assign the new form to Contoso Marketing and Contoso Support. Then remove Contoso Employee from the current form, and assign Contoso Support to it. B. Assign the new form to Contoso Support and Contoso Marketing, and remove Contoso Employee from the current form. C. Assign the new form to the Contoso Marketing security role, and configure it as the fallback. Then remove Contoso Employee from the current form. D. Assign the new form to Contoso Marketing, and configure it as the fallback. Then add Contoso Support to the current form after removing Contoso Employee. Answer: A QUESTION 23 You create a connection from Account1 to Account2 and select Referred To as the role. You want the connection from Account2 to say Referred From. What should you do? A. Modify the Connection Role for Referred To so that it can only be between the record type of Account. B. Create workflow that will create a matching Connection with the Role of Referred From whenever a new Referred To connection is created. C. Modify the Connection Role for Referred To, and add a new matching connection role named Referred From that also applies to the Account. D. Create a dialog that the user must run to create the Connection, which prompts the user to enter both sides of the connection role. Answer: C QUESTION 24 You are creating a custom entity. Which two Primary Field properties can be changed when the entity is created? Each correct answer presents a complete solution. Choose two. A. Maximum Length B. Schema Prefix C. Field Requirement D. Data Type Answer: AC QUESTION 25 You are adding a Personal Identification Number field to the contact entity. Users should be able to add data to this field when a contact record is created but should not be able to read or modify it after the contact is created. Which two actions should you perform?
