A. uptime
B. feature availability

As a result, these questions will not appear in the review screen. Your company plans to purchase an Azure subscription. Your Azure trial account expired last week. You are now unable to create additional Azure Active Directory (Azure AD) user accounts. Instructions: Review the underlined text. No change is needed B. start an existing Azure virtual machine C. access your data stored in Azure D. access the Azure portal Answer: B Explanation: A stopped (deallocated) VM is offline and not mounted on an Azure host server. Starting a VM mounts the VM on a host server before the VM starts. As soon as the VM is mounted, it becomes chargeable. For this reason, you are unable to start a VM after a trial has expired. Incorrect Answers: A: You are not charged for Azure Active Directory user accounts so you can continue to create accounts. C: You can access data that is already stored in Azure. D: You can access the Azure Portal. You can also reactivate and upgrade the expired subscription in the portal. QUESTION 179 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. References: <https://azure.microsoft.com/en-gb/support/plans/> QUESTION 180 Your company has 10 departments. The company plans to implement an Azure environment. You need to ensure that each department can use a different payment option for the Azure services it consumes. What should you create for each department? A. a reservation B. a subscription C. a resource group D. a container instance Answer: B Explanation: There are different payment options in Azure including pay-as-you-go (PAYG), Enterprise Agreement (EA), and Microsoft Customer Agreement (MCA) accounts. Your Azure costs are 'per subscription'. You are charged monthly for all resources in a subscription. Therefore, to use different payment options per department, you will need to create a separate subscription per department. You can create multiple subscriptions in a single Azure Active Directory tenant. Incorrect Answers: A: A reservation is where you commit to a resource (for example a virtual machine) for one or three years. This gives you a discounted price on the resource for the reservation period. Reservations do not provide a way to use different payment options per department. C: A resource group is a logical container for Azure resources. You can view the total cost of all the resources in a resource group. However, resource groups do not provide a way to use different payment options per department. D: A container instance is an Azure resource used to run an application. Container instances do not provide a way to use different payment options per department.
