QUESTION 21Drag and Drop QuestionYou need to recommend which tasks must be performed to meet the compliance requirement for the marketing department.Which three actions should recommend?To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Note:From scenario: Compliance Requirements All of the email messages in the Sent Items Folder of each user in the Marketing Department of Contoso must be deleted automatically after 365 days.You can use retention policies to group one or more Retention Tags and apply them to Mailboxes to enforce Message Retention settings. A Mailbox can't have more than one Retention Policy. Messages are expired based on settings defined in the Retention Tags linked to the Policy. These settings include actions such moving messages to the archive or permanently deleting them.Before applying a Retention Policy to one or more mailboxes, we recommended that you test the policy and inspect each Retention Tag associated with it.After you create Retention Tags, add them to a Retention Policy, and apply the policy to a mailbox user, the next time the MRM Mailbox Assistant Processes the mailbox,

messages are moved or deleted based on settings you configured in the Retention Tags.Reference: Exchange 2013, Apply a Retention Policy to MailboxesReference: Create a Retention Policy QUESTION 22Drag and Drop QuestionYou need to create a federation trust for the planned organization relationship.Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:http://technet.microsoft.com/en-us/library/jj657462%28v=exchg.150%29.aspx QUESTION 23You need to identify which technologies must be deployed to meet the Office 365 coexistence requirements.Which two technologies should you identify? (Each correct answer presents part of the solution. Choose two.) A.   The Microsoft Online Services Directory Synchronization tool B.   Active Directory Federation Services (AD FS) 2.0C.   Active Directory Rights Management Services (AD RMS)D.   An internal root CAE.   Active Directory Lightweight Directory Services (AD LDS) Answer: ABExplanation:* Scenario: Contoso identifies the following Office 365 coexistence requirements:- Office 365 users must be able to access their mailbox by using their Active Directory user account in Contoso.- On-premises users must be able to share free/busy information and calendar information with the Office 365 users.A: When you create an Office 365 mailbox in Exchange Online in a hybrid deployment, the mail user is created in Active Directory on-premises. Directory synchronization, if it's configured, automatically synchronizes this new user object to Office 365, where it's converted to a cloud mailbox in Exchange Online. You can create Office 365 mailboxes as regular user mailboxes, resource mailboxes for meeting rooms and equipment, and shared mailboxes.B: Step-By-Step: Setting up AD FS and Enabling Single Sign-On to Office 365 QUESTION 24You implement the UM pilot. You capture and analyze a network trace from the IP-PBX. You discover that SIP/MTLS requests for TCP 5061 to EX1 are dropped. You need to ensure that the IP-PBX can route calls successfully to the Exchange Server 2013 organization. What should you do? A.   Modify the IP-PBX to route calls to EX5 and EX6.B.   Modify the port used on the IP-PBX.C.   Deploy a server that has Exchange Server 2010 and the Unified Messaging server role installed.D.   Modify the SIP listening port on EX1. Answer: AExplanation:CAS not MBX listen 5061 TCP port:http://technet.microsoft.com/en-us/library/aa998872%28v=exchg.150%29.aspx QUESTION 25Drag and Drop QuestionThe Montreal data center experiences a power failure. You need to ensure that all the users can access their mailbox. Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

QUESTION 26You need to recommend which tasks must be performed to meet the security requirements for Tailspin Toys.Which two tasks should you recommend? (Each correct answer presents part of the solution. Choose two.) A.   Run the set-transportserver -transportsyncenabled $true command.B.   Run the set-transportconfig -tsreceivedomainsecurelist tailspintoys.com command.C. Run the set-transportservice -transportsyncenabled $true command.D.   Create a new Receive connector.E.   Create a new Send connector. Answer: BDExplanation:* Scenario:Secure all of the email messages from the users at Tailspin Toys to the Contoso users. Ensure that all of the messages can be secured if the certificates at Tailspin Toys are issued by a trusted third-party certification authority (CA).* Configuring Domain Security on Exchange Server 2013http://dizdarevic.ba/ddamirblog/?p=78 QUESTION 27Drag and Drop QuestionYou need to implement a solution to meet the security requirement for the temporary employees.You deploy an Active Directory Rights Management Services (AD RMS) cluster, and then you run the Set-IRMConfiguration cmdlet.Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:Box 1: Create an Active Directory group that contains the temporary employees.Box 2: Create and configure an AD RMS template.Box 3: Run the New-OutlookProtectionRule cmdlet.Note:* From scenario: Prevent temporary employees from executing a Reply All or a Forward of any email messages they receive.* IRM provides persistent online and offline protection of email messages and attachments by applying the information protection technology AD RMS. IRM protection is configured by applying an AD RMS rights policy template. You can use policy templates to control permissions that recipients have on a message. * Using Microsoft Outlook protection rules, you can protect messages with Information Rights Management (IRM) by applying an Active Directory Rights Management Services (AD RMS) template in Outlook 2010 before the messages are sent.Reference: Create an Outlook Protection RuleReference: Exchange Server 2010: Implementing Compliance (part 1) - Configuring IRM Case Study 3: Trey Research (QUESTION 28 ~ QUESTION 37)Overview GeneralOverviewTrey Research is a brokerage firm that has 5,000 users. Trey Research has a finance department, a human resources department, an investment department, and a legal department.

Trey Research is acquiring a partner company named Fabrikam, Inc.Physical LocationsTrey Research has four main offices located in Boston, Chicago, New York, and Atlanta. The offices connect to each other by using a WAN link. The Chicago office connects directly to the Internet.Existing EnvironmentNetwork EnvironmentTrey Research has an Active Directory forest named treyresearch.com. The forest contains a single domain. All domain controllers run Windows Server 2012.Each office is configured as an Active Directory site.All user accounts are in an organizational unit (OU) based on their department. All users are in a universal security group based on their department.Trey Research has a Lync Server 2013 infrastructure. The infrastructure is configured to required encryption for voice traffic.Exchange Server OrganizationTrey Research has an Exchange Server organization that contains five servers. The servers are configured as shown in the following table.

Server name	Role	Exchange Server version
EX1	Mailbox Client Access	Exchange Server 2013
EX2	Mailbox Client Access	Exchange Server 2013
EX3	Mailbox Client Access	Exchange Server 2013
EX4	Mailbox Client Access	Exchange Server 2013
EX5	Mailbox Client Access Hub Transport Unified Messaging	Exchange Server 2010

The mailbox databases are mounted on the Exchange servers shown in the following table.

Mailbox database name	Mounted on server
DB1	EX1
DB2	EX1
DB3	EX2
DB4	EX2
DB5	EX3
DB6	EX4
DB7	EX5

 All of the mailboxes of the users in the executives department are mounted on DB3. A publicfolder database named PF1 is mounted on EX5. The Exchange Server organization has thefollowing configurations:- Users in the legal department use a shared mailbox named Legal. Legal is enabled for In-Place Hold. Legal is the only mailbox on DB2.- All inbound and outbound email messages to and from the Internet are routed through EX1. - Email messages sent and received by Fabrikam are secured by using Mutual TLS. - All public folders are stored in PF1.All users connect to their mailbox by using Microsoft Outlook 2013 and Outlook Web App. Fabrikam has an Exchange Server 2013 organization.Problem StatementsTrey Research identifies the following issues:- After a change to a certificate, users report that email messages sent to Fabrikam are not delivered. - The storage for DB3 fails. The storage will be offline for the next two days.RequirementsPlanned ChangesTrey Research plans to implement the following changes:- Move all public folders to an Exchange Server 2013 server. The solution must ensure that all users cannot modify the public folders stored on EX5 after the planned move. - Integrate Unified Messaging (UM) services with the Lync Server 2013 infrastructure. Collaboration RequirementsCustom recipient MailTips created in the Exchange Server organization of Trey Research must be visible to the users at Fabrikam. The solution must ensure that administrators can define a subset of users who can share their MailTips.Auditing RequirementsThe following actions must be audited for actions in the Legal mailbox only:- Delegate - Purge mailbox content - Delegate - Transfer file between folders - Administrator - Messages sent by administrator - Administrator - Open any content within the mailboxSecurity RequirementsTrey Research identifies the following security requirements:- Ensure that the users in the finance department can protect email messages from being altered in transit, regardless of the recipient. - Prevent the email messages sent to the users in the human resources department from being forwarded to external recipients.- Prevent the audio files in voice mail message marked as Private from being extracted from email messages. - Redirect email messages that contain social security information to the legal department.Compliance RequirementsTrey Research identifies the following compliance requirements:- All users must be notified before they send an email message that contains any five bank account numbers to an external recipient. The users must be able to override the requirement if they have a valid business reason to send the email message. - Users must use a custom message classification when they send email messages that contain information about the planned acquisition of Fabrikam.- Only the users in the legal department must be able to use eDiscovery to view the contents of email messages sent by the finance department users. QUESTION 28Hotspot QuestionYou need to recommend a solution that meets the auditing requirements.Which command should you include in the recommendation? (To answer, select the appropriate options in the
answer area.)

Answer:

QUESTION 29Hotspot QuestionYou need to recommend a solution that meets the compliance requirements for emailing bank account numbers.Which command should you include in the recommendation? (To answer, select the appropriate options in the answer area.)

Answer:

QUESTION 30Drag and Drop QuestionYou need to identify which technologies must be used to meet the security requirements. Which technologies should you identify? (To answer, drag the appropriate technologies to the correct requirements. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
