QUESTION 1 You are building an ADO.NET Entity Framework application. You need to validate the conceptual schema definition language (CSDL), store schema definition language (SSDL), and mapping specification language (MSL) files. Which Entity Data Model tool can you use? (Each correct answer presents a complete solution. Choose all that apply.) A. EDM Generator (EdmGen.exe) B. ADO.NET Entity Data Model Designer C. Entity Data Model Wizard D. Update Model Wizard Answer: AB Explanation: EdmGen.exe (<http://msdn.microsoft.com/en-us/library/cc716721.aspx>) ADO.Net Entity Data Model Designer ([http://msdn.microsoft.com/enus/library/vstudio/cc716685\(v=vs.100\).aspx](http://msdn.microsoft.com/enus/library/vstudio/cc716685(v=vs.100).aspx)) The Entity Data Model wizard creates the .edmx files. It does not validate the CSDL, SSDL or MSL files. The Update Model wizard updates the .edmx file after changes have been made. It does not validate the CSDL, SSDL or MSL files. QUESTION 2 Drag and Drop Question You are developing an ASP.NET Web API action method. The action method must return the following JSON in the message body. { "Name": "Fabrikam", "Vendor Id": 9823, "Items": ["Apples", "Oranges"] } You need to return an anonymous object that is serialized to JSON. What should you do? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

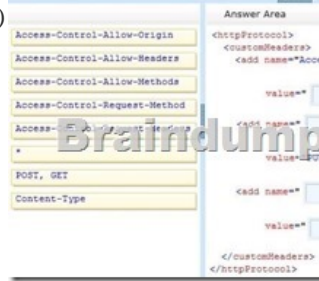

Answer:

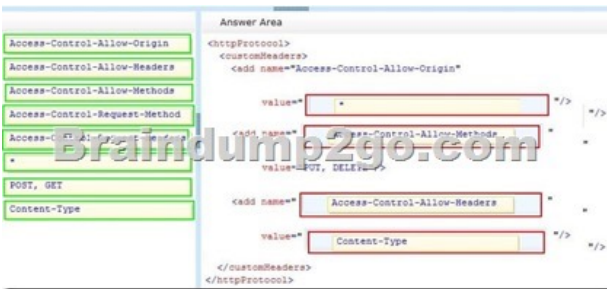

**QUESTION 3** You are designing an ASP.NET Web API application. You need to select an HTTP verb to allow blog administrators to moderate a comment. Which HTTP verb should you use? A. GET B. POST C. DELETE D. PUT  
**ANSWER: D**

**QUESTION 4** Drag and Drop Question You are developing an ASP.NET Web API application that will be consumed by a web browser via a composite application that is served from another web domain. You need to configure the Web API. What should you do? (To answer, drag the appropriate XML elements to the correct location or locations in the answer area. Each XML element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

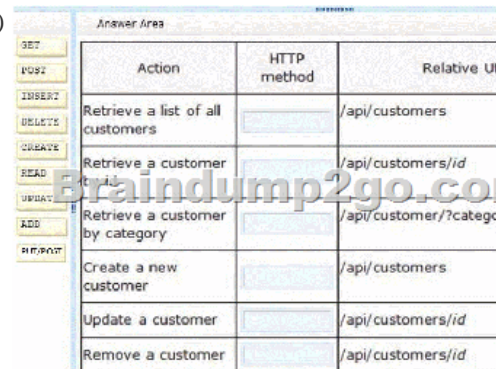

Answer:

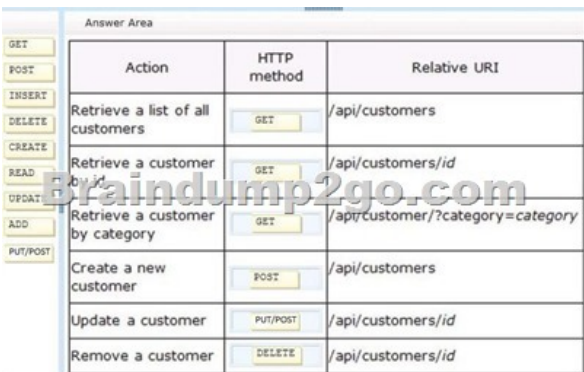

**QUESTION 5** You are planning to migrate websites from IIS 6 to IIS 7.5. You do not have access to SSH or a VPN. You need to select a deployment tool to securely migrate the websites. Which tool should you use? A. RoboCopy B. Web Deploy C. Microsoft command-line FTP D. xCopy  
**ANSWER: B**

**QUESTION 6** Drag and Drop Question You are developing an ASP.NET MVC Web API application. The method names of the Web API must match naming guidelines for RESTful services. You need to create methods to support standard insert, select, update, and delete operations in an HTTP service. What should you do? (To answer, drag the appropriate HTTP methods to the correct row in the table in the answer area. Each HTTP method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer:

QUESTION 7 You are developing an ASP.NET MVC application. Applications can be deployed to remote servers only by administrators who have elevated privileges. The administrators do not have access to Visual Studio 2012. You need to select a deployment tool to deploy the application to remote servers for testing. Which tool should you use? A. Copy Web Site Tool B. One-Click Publish C. Publish Web Site Tool D. Web Deployment Package Answer: D

QUESTION 8 You are developing an ASP.NET MVC web application that contains the following HTML:

```
A. <script>
    $(function () {
        var $customers = $("#customers");
        $.ajax({
            url: "api/customers",
            dataType: "json",
            success: function (data) {
                ...
            }
        });
    });
</script>

B. <script>
    $(function () {
        var $customers = $("#customers");
        $.xml({
            url: "api/customers",
            dataType: "ajax",
            success: function (data) {
                ...
            }
        });
    });
</script>

C. <script>
    $(function () {
        var $customers = $("#customers");
        $.json({
            url: "api/customers",
            dataType: "ajax",
            success: function (data) {
                ...
            }
        });
    });
</script>

D. <script>
    $(function () {
        var $customers = $("#customers");
        $.ajax({
            url: "api/customers",
            dataType: "xml",
            success: function (data) {
                ...
            }
        });
    });
</script>
```

A. Option A B. Option B C. Option C D. Option D Answer: A

QUESTION 9 Drag and Drop Question You are developing an ASP.NET MVC Web API image management application. The application must meet the following requirements:- It must send or receive image data without the use of a buffer. - It must allow up to 4 MB of image data to be received. - It must allow up to 3 MB of image data to be sent. You need to complete the code to meet the requirements. What should you do? (To answer, drag the appropriate code segments to the correct location or locations in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

The screenshot shows a configuration interface for an ASP.NET MVC Web API. On the left, there is a list of code segments to be dragged: `config`, `server`, `MaxBufferSize`, `MaxReceivedMessageSize`, `MaxConcurrentRequests`, `Streamed`, and `Buffers`. On the right, the 'Answer Area' shows a partial C# code snippet for a `Program` class. The code includes a `Main` method that creates an `HttpSelfHostConfiguration` object and sets its `Routes` property. The `config` variable is then used to create an `HttpSelfHostServer` object. The answer area contains several empty text boxes for placing the code segments.

Braindump2go.com

Answer:

```
class Program
{
    private static string _baseAddress = "http://localhost:8080/";

    static void Main(string[] args)
    {
        var config = new HttpSelfHostConfiguration(_baseAddress);
        config.Routes.MapHttpRoute(
            name: "DefaultApi",
            routeTemplate: "api/{controller}/{id}",
            defaults: new { id = RouteParameter.Optional }
        );

        var server = new HttpSelfHostServer(config);
        server.OpenAsync().Wait();
    }
}
```

QUESTION 10 You are preparing to develop a set of libraries for a company. The libraries must be shared across the company. You need to create a remote NuGet feed that exposes the libraries. What should you do? (Each answer presents part of the solution. Choose all that apply.) A. Install the NuGet.Feed Package. B. Install the NuGet.Server Package. C. Configure the Packages folder located in the system.webserver section of the web application's Web.config. D. Create a new Empty Web Site in Visual Studio 2012. E. Configure the Packages folder located in the appSettings section of the web application's Web.config. F. Add packages to the Packages folder. G. Create a new Empty Web Application in Visual Studio 2012. Answer: BEFG Braindump2go New Released 70-487 Dump PDF Free Download, 122 Questions in all, Passing Your Exam 100% Easily!
