QUESTION 491 You have a computer that runs Windows 7. You need to install the Exchange 2010 management tools on the computer. What should you do first? A. Install Telnet Client. B. Run the Exchange Best Practices Analyzer. C. Set the Net.TCP Port Sharing service to Automatic. D. Install Microsoft .NET Framework 3.5.1 and the Internet Information Services (IIS) 6.0 Management console. Answer: D Explanation: <http://technet.microsoft.com/en-us/library/bb691354.aspx> QUESTION 492 You need to perform an automated installation of an Exchange Server 2010 server. Which Command should you include in your script? A. setup.exe B. setup.com C. msixexec.exe D. lpsetupui.exe Answer: B QUESTION 493 Your company has two offices. Each office is configured as an Active Directory site. The offices connect to each other by using a congested WAN link. Each office has a direct, high-speed connection to the Internet. Each site contains two Exchange Server 2010 Service Pack 1 (SP1) Hub Transport servers. You need to ensure that email messages sent to the Internet from the Exchange organization are never routed over the WAN link. What should you do from each site? A. From the Exchange Management Shell, run the Set-TransportConfig cmdlet B. From the Exchange Management Console (EMC), modify the properties of the accepted domain C. From the Exchange Management Shell, run the Set-SendConnector cmdlet D. From the Exchange Management Console (EMC), modify the properties of the Receive connector E. From the Exchange Management Console (EMC), modify the properties of the Send connector F. From the Exchange Management Console (EMC), modify the properties of the remote domain G. From the Exchange Management Shell, run the Set- ForeignConnector cmdlet H. From the Exchange Management Shell, run the Set-TransportAgent cmdlet Answer: C Explanation: <http://technet.microsoft.com/en-us/library/aa998294.aspx> QUESTION 494 Your network contains an Active Directory forest that has a single domain. You have an Exchange Server 2010 organization. You plan to add a new domain to this Active Directory forest and deploy Exchange Server 2010 servers in the new domain. A user named Admin1 is a member of this Active Directory group named Organization Management. Admin1 will deploy the Exchange new domain. You need to identify the minimum permissions required to allow Admin1 to install Exchange Server 2010 servers in the new domain. Which group should you add Admin1 to? A. Domain Admins B. Enterprise Admins C. Exchange Install Domain Servers D. Server Operators Answer: C QUESTION 495 Your company has a Exchange Server 2010 organization. You plan to deploy Microsoft Office Outlook

and mobile devices for remote users. You need to plan the deployment of Client Access servers to support the automatic configuration of Outlook profiles and ----- . What should you include in the plan? A. Autodiscover B. MailTips C. Remote Access Server D. Unified Messaging auto attendant Answer: A QUESTION 496 Your network contains an internal network and a perimeter network that are separated by firewall. The perimeter network _____ Server 2010 Edge Transport server. You plan to deploy an internal Exchange Server 2010 organization that meets the following requirements. - Support EdgeSync synchronization - Support encrypted delivery of outbound e-mail messages to the Edge Transport server - Minimize the attack surface of the internal network Which TCP ports should you allow from the internal network to the perimeter network? A. 3309 and 25 B. 3309 and 636 C. 50636 and 25 D. 50636 and 135 Answer: C QUESTION 497 Your network consists of a single Active Directory site. You plan to deploy Exchange Server 2010. You need to plan the deployment of Exchange Server 2010 servers to meet the following requirements. - All Mailbox servers must belong to a database availability group (DAG) - MAPI connections from Outlook clients must be load balanced by using a hardware load balancer - If a single server fails, users must continue to send and receive e-mail - The plan must minimize the number of servers deployed What should you include in the plan? A. Deploy two servers. On the two servers, deploy the Mailbox server role, the Client Access server role, and the Hub Transport server role. Configure a Client Access server array. B. Deploy two servers. On the two servers, deploy the Mailbox server role, the Client Access server role, and the Hub Transport server role. Enable Outlook Anywhere on both Client Access servers. C. Deploy four servers. On two of the servers, deploy the Mailbox server role and the Hub Transport server role. On the other two servers, deploy the Client Access server role. Configure a Client Access server array. D. Deploy four servers. On two of the servers, deploy the Mailbox server role. On the other two servers, deploy the Client Access server role, and the Hub Transport server role. Enable Outlook Anywhere on both Client Access servers. Answer: A QUESTION 498 You have an Exchange Server 2010 organization that contains multiple Hub Transport servers. You need to recommend a message hygiene solution to meet the following requirements. - Block servers that are known to send spam - Minimize administrative effort What should you recommend? A. an IP Block list B. IP Block list providers C. recipient filtering D. sender filtering Answer: B QUESTION 499 Your network contains two Exchange Server 2010 Edge Transport servers and five Exchange Server 2010 Hub Transport servers. All e-mail sent from your organization to the Internet is transferred by the Edge Transport servers. You need to recommend a security solution for the organization to meet the following requirements. - Ensure that users can send encrypted messages to any other organization on the Internet - Ensure that all Exchange related communication between Hub Transport servers and Edge Transport servers is encrypted. What should you recommend? A. Deploy IPsec. B. Deploy SMTP over SSL. C. Implement Domain Security. D. Implement Security/Multipurpose Internet Mail Extensions (S/MIME) Answer: D QUESTION 500 Your company has two data centers. Each data center contains a perimeter network. Your network contains an Exchange Server 2010 organization. You plan to deploy Exchange Server 2010 Edge Transport servers in the perimeter networks. You need to recommend a solution for the Edge Transport servers that meets the following requirements. - Distributes inbound email messages across all Edge Transport servers - Ensures that users receive inbound e-mail messages if an Edge Transport server fails - Ensures that users receive inbound e-mail messages if a single data center network becomes unavailable - Minimize costs What should you recommend? A. In each perimeter network, deploy one Edge Transport server. Implement failover clustering. B. In each perimeter network, deploy two Edge Transport servers. Implement failover clustering. C. In each perimeter network, deploy one Edge Transport server. Configure a mail exchange (MX) record for each server. D. In each perimeter network, deploy two Edge Transport servers. Configure a mail exchange (MX) record for each server. Answer: C Want to be 70-662 certified? Using Braindump2go New Released 70-662 Exam Dumps Now! We Promise you a 100% Success Passing Exam 70-662 Or We will return your money back instantly!
