https://1drv.ms/f/s!AvI7wzKf6QBjgRfWxl0qaxbg8_M QUESTION 20 Hotspot Questions You plan to install SharePoint Server 2016 in a new environment. You need to install the SharePoint Server prerequisite components. For each prerequisite installation method, which tool or command line utility should you use?

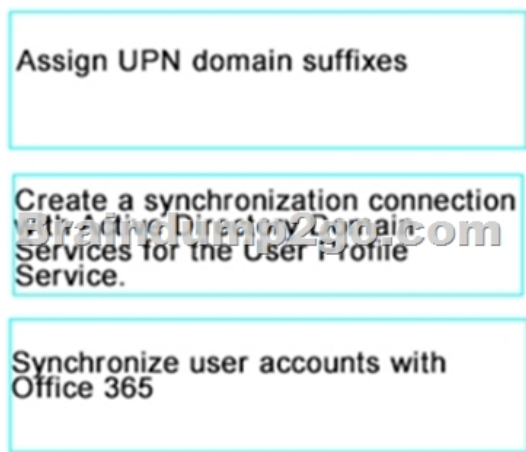

Answer:

QUESTION 21 Drag and Drop Questions Your company plans to move team sites from an on-premises SharePoint environment to the cloud. You register a custom domain with Office 365. You need to configure the Office 365 environment for the hybrid infrastructure before you configure the on-premises environment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

QUESTION 22Your organization has a complex retention schedule that clearly defines retention policies for all document types. Each department has its own SharePoint site. In many cases, a single document library on a department site may contain financial files, human resources files, and project documentation. The following table lists the retention policies that are in place.

Content type	Retention policy
Project documentation	1

You must administer retention rules from a single location for each type of document and must leverage out of the box functionality. You need to configure the SharePoint environment to comply with the retention schedule. What should you do? A. Configure information management policies for the document libraries.B. Activate the Disposition Approval feature.C. Activate the In-Place Records Management feature.D. Configure information management policies on content types.E. Activate library and folder-based retention. Answer: D

QUESTION 23A company plans to deploy a SharePoint 2016 farm. The company only has enough budget to purchase four SharePoint Server licenses and two SQL Server licenses.The farm must be highly available.You need to deploy the SharePoint 2016 farm.Which two server role sets can you use?Each correct answer presents a complete solution. A. Two front-end servers and two custom servers.B. Two front-end servers and two application servers.C. One front-end server, one application server, and two custom servers.D. One front-end server, one application server, one Search Server, and one Distributed Cache server. Answer: AB

QUESTION 24You are customizing standard content types for an organization. For the tracking of a department, you must allow users to easily select or enter a value.In some cases, users may refer to a single department by more than one name. Users must be able to select or type any name for a department but the document must be associated with only one department. You need to create a column that supports the requirements.What should you do? A. Create a Choice site column that uses check boxes.B. Create a Choice site column that uses a drop-down menu.C. Create a Managed Metadata site column.D. Create a Choice list that uses a drop-down menu. Answer: B

QUESTION 25Hotspot QuestionsYou are the SharePoint administrator for Contoso. You are establishing a disaster recovery (DR) location for the SharePoint farm. You plan to create service application databases for the DR environment that are configured to use read-only mode.You need to add the service applications to the passive farm. For each service application, which option should you implement? To answer, select the appropriate option from each list in the answer area.

Service Application	Option
User Profile	<input type="checkbox"/> Failover SQL Server to the DR environment <input type="checkbox"/> Grant the DR farm read and write access to the primary SQL Server <input type="checkbox"/> Create a new database in the failover farm
Managed metadata	<input type="checkbox"/> Failover SQL Server to the DR environment <input type="checkbox"/> Grant the DR farm read and write access to the primary SQL Server <input type="checkbox"/> Create a new database in the failover farm

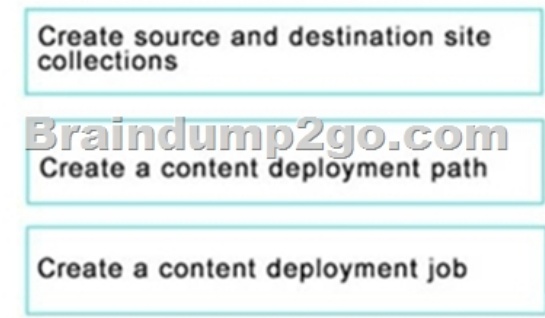

Answer:

Service Application	Option
User Profile	<input checked="" type="checkbox"/> Failover SQL Server to the DR environment <input type="checkbox"/> Grant the DR farm read and write access to the primary SQL Server <input type="checkbox"/> Create a new database in the failover farm
Managed metadata	<input checked="" type="checkbox"/> Failover SQL Server to the DR environment <input type="checkbox"/> Grant the DR farm read and write access to the primary SQL Server <input type="checkbox"/> Create a new database in the failover farm
