https://1drv.ms/f/s!AvI7wzKf6QBjgRfWixl0qaxbg8_M QUESTION 36 Drag and Drop Questions You are the SharePoint administrator for your organization. You have one web application named WebApp1 in the farm. You need to prevent users from purchasing apps from the SharePoint Store while allowing users to request apps from the App Catalog. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

QUESTION 37 Drag and Drop Questions You manage the SharePoint 2016 environment for a multinational company with 195 offices in 57 different regions. Each department in the company has its own site collection. Business users have Contribute access to their own department sites and Read access to all other department sites. You have the following requirements: - Maintain a standardized list of office locations across all departments. - Track the office location as metadata for contract documents that are stored in each of the departmental site collections. - Business users must be able to add new office locations directly when they save new files to SharePoint. - When a user adds a new office location, the location information must be accessible to all users for use on other documents. You need to configure SharePoint to track office location for contract documents. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Import the office locations list to the Term Store and set the value of the Term Set to Open.

Create a managed Metadata site column based on the Term Store.

Configure the Column to allow any value.

QUESTION 38 Drag and Drop Questions You are the administrator for a company's SharePoint 2016 farm. Employees use Search functionality extensively. Employees report that display as they enter queries are often irrelevant. You identify the following requirements:- You must add several specific search refiners to Search results pages. - You must expand query results by using synonyms for search keywords. - You need to implement the improvements to search functionality. For each requirement, which action should you perform? To answer, drag the appropriate action to the correct requirement. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.

Actions	Requirement	Action
Create and deploy a thesaurus.	Expand queries with synonyms.	Action
Configure authoritative pages.	Set up custom refiners.	Action
Manage query suggestions.	Edit phrases that are shown to users as they start typing a query.	Action
Manage query spelling correction.		
Create custom entity extractors.		
Manage query suggestion.		

Answer:

Requirement	Action
Expand queries with synonyms.	Create and deploy a thesaurus.
Set up custom refiners.	Create custom entity extractors.
Edit phrases that are shown to users as they start typing a query.	Manage query suggestion.

QUESTION 39 Hotspot Questions You are a SharePoint administrator. You set up a publishing website that is based on product catalogue data. You are configuring Search to retrieve and display content from the publishing website. Content managers have site collection administrator permissions. You need to ensure that multiple crawls can occur for the same content at the same time. What should you do? To answer, select the appropriate value from each list in the answer area. Search administrators must enable the following crawl type:

Search administrators must enable the following crawl type: full crawl continuous crawl

Role that must initiate a full index of the catalog: site owner content managers

Answer:

Search administrators must enable the following crawl type: full crawl continuous crawl

Role that must initiate a full index of the catalog: site owner content managers

QUESTION 40 Drag and Drop Questions A company uses SharePoint Online and SharePoint Server 2016 on-premises. You need to configure two-way federated search between SharePoint Online and SharePoint Server on-premises. How should you configure federated search? To answer, drag the appropriate option to the correct result source and remote providers. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Note: Each correct selection is worth one point.

QUESTION 41 In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You are the SharePoint administrator for a company. You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company. The solution must include the following features: - Dashboards - Scorecards - Key Performance Indicators (KPI) You install and configure Office Online Server. Does the solution meet the goal? A. Yes B. No Answer: B
