 HOTSPOT You have an Azure Stack integrated system that uses a namespace of fabrikam.onmicrosoft.com. A company named A. Datum Corporation has a Microsoft Azure Active Directory (Azure AD) domain named adatum.com. You need to ensure that A. Datum users can sign in to <https://portal.local.fabrikam.onmicrosoft.com>. Which command should you run from adatum.com? To answer, select the appropriate options in the answer area. NOTE, each connect selection is worth one point.

Answer:

Explanation: References: <https://docs.microsoft.com/en-us/azure/azure-stack/azure-stack-enable-multitenancy> **Question: 13**
 DRAG DROP You have an Azure Stack integrated system that uses a Microsoft Azure Active Directory (Azure AD) tenant named fabrikam.com as the identity provider. You need to onboard contoso.com as a guest directory tenant. Which action should each role perform? To answer, drag the appropriate actions to the correct roles. Each action may be used once, more than once or not at all. NOTE: Each correct selection is worth one point.

Answer:

<https://docs.microsoft.com/en-us/azure/azure-stack/azure-stack-enable-multitenancy> **Question: 14** You have an Azure Stack integrated system that has a SQL Server resource provider. You have an Azure Resource Manager template named Template1. You need to validate whether Template1 can be deployed to the system. Which cmdlet should you run before you run

Test-AzureRMTemplate?A. Get-AzureDeploymentB. Get-AzsResourceProviderManifestC. Get-RmsTemplatesD. Get-AzureRMCloudCapability
Answer: D

https://docs.microsoft.com/en-us/azure/azure-stack/user/azure-stack-validate-templates
Question: 15 You plan to automate the deployment of Azure Stack resources by using a script. The script will run by using a security principal named ScriptUser1. The script will run daily and will be used to assign users the ability to create resources within newly created resource groups. You need to assign an RBAC role to ScriptUser1. The solution must minimize administrative privileges. Which RBAC role should you assign? A. subscription Owner B. resource group Contributor C. subscription Contributor D. resource group Owner
Answer: D

Question: 16 Your network contains an Active Directory forest named adatum.com. You deploy an Azure Stack integrated system. You implement federation between adatum.com and Azure Slack. You need to ensure that a user named admin01@adatum.com can manage all aspects of Azure Stack from administrator portal. Which cmdlet should you run? A. New-CloudAdminUser B. Set-ServiceAdminOwner C. Set-AzsUserSubscription D. Set-CloudAdminPassword
Answer: B

Question: 17 DRAG DROP A developer uses an offline Azure Stack Development Kit to develop Azure Marketplace items. After the developer makes several modifications, the development kit becomes unavailable. You need to redeploy the development kit to the same physical hosts. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Run the <code>install-azurestack-POC.ps1</code> script and specify the <code>-ReRun</code> parameter.	
Replace the <code>CloudBuilder.vhdx</code> file.	
Start the computer from <code>CloudBuilder.vhdx</code> .	
Run the <code>asdk-installer.ps1</code> script.	
Run the <code>Add-AzsRegistration</code> cmdlet.	
Start the host from the base operating system.	

Answer:

Answer Area
Run the <code>asdk-installer.ps1</code> script.
Start the host from the base operating system.
Replace the <code>CloudBuilder.vhdx</code> file.
Start the computer from <code>CloudBuilder.vhdx</code> .

Run the asdk-installer.ps1 scriptRun the host from base operating system Replace the C:\CloudBuilder.vhdx fileStart the computer from CloudBuilder.vhdx <https://docs.microsoft.com/en-us/azure/azure-stack/asdk/asdk-redeploy>Question: 18 You have an Azure Stack integrated system.What are three possible types of records that you can create in Azure Stack DNS? Each correct answer presents a complete solution.NOTE: Each correct selection is worth one point.A. NSECB. PTRC. SRVD. MXE. AAAAnswer: BCD <https://docs.microsoft.com/en-us/azure/dns/dns-zones-records>

<https://docs.microsoft.com/en-us/azure/azure-stack/user/azure-stack-dns>

Question: 19 Your company has a Microsoft Azure subscription that contains that tenants configured as shown in the following table.

Tenant name	IP address range	Internal DNS	Number of virtual machines	Number of virtual workers
Tenant 1	192.168.1.0/24	Contoso.com	24	5
Tenant 2	192.168.1.0/24	Contoso.com	30	4

You plan to recreate both tenants in an Azure Stack integrated system. The tenants will be configured to use the DNS service provided by Azure Stack.Which tenant configuration should you modify to ensure that the tenants can be deployed to Azure Stack?A. the number of virtual machinesB. the number of virtual workersC. the internal namespaceD. the IP address range

Answer: A Question: 20 You implement an Azure Stack integrated system.You receive the following service Fabric warning alert: ?The infrastructure role FabricResourceProvider is experiencing issues.?You contact Microsoft support and are instructed to modify the configuration of the Azure Stack integrated system.You successfully modify the configuration. You need to restart the Azure Stack integrated system. What should you do first?A. Connect to the Azure Resource Manager administrative endpoint.B. Connect to the privileged endpoint.C. From the Azure Stack administrator portal, stop the infrastructure role.D. From the Azure Stack administrator portal, restart the infrastructure role.

Answer: D Question: 21 You have an Azure Stack integrated system.You receive a Storage Resource Provider alert indicating that a file share named SUI_ObjStore_4 on a volume named ObjStore_4 is more than 90 percent utilized.You verify that none of the storage accounts were recently deleted. You need to remediate the storage usage issue as quickly as possible.What should you do first?A. From the Azure Resource Manager user endpoint, run start-AzsReclaimStorageCapacity.B. From the Azure Stack administrator portal, modify the retention period.C. From the Azure Stack administrator portal, restart the storage controller infrastructure role.D. Contact Microsoft Support.

Answer: A

Answer: D Question: 21 You have an Azure Stack integrated system.You receive a Storage Resource Provider alert indicating that a file share named SUI_ObjStore_4 on a volume named ObjStore_4 is more than 90 percent utilized.You verify that none of the storage accounts were recently deleted. You need to remediate the storage usage issue as quickly as possible.What should you do first?A. From the Azure Resource Manager user endpoint, run start-AzsReclaimStorageCapacity.B. From the Azure Stack administrator portal, modify the retention period.C. From the Azure Stack administrator portal, restart the storage controller infrastructure role.D. Contact Microsoft Support.

Answer: A

Answer: D Question: 21 You have an Azure Stack integrated system.You receive a Storage Resource Provider alert indicating that a file share named SUI_ObjStore_4 on a volume named ObjStore_4 is more than 90 percent utilized.You verify that none of the storage accounts were recently deleted. You need to remediate the storage usage issue as quickly as possible.What should you do first?A. From the Azure Resource Manager user endpoint, run start-AzsReclaimStorageCapacity.B. From the Azure Stack administrator portal, modify the retention period.C. From the Azure Stack administrator portal, restart the storage controller infrastructure role.D. Contact Microsoft Support.

Answer: A

Answer: D Question: 21 You have an Azure Stack integrated system.You receive a Storage Resource Provider alert indicating that a file share named SUI_ObjStore_4 on a volume named ObjStore_4 is more than 90 percent utilized.You verify that none of the storage accounts were recently deleted.
