<https://drive.google.com/drive/folders/1UxJtu9d63Dhy-Wy1Npivi8BmgF2YSMXk?usp=sharing> QUESTION 46 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a deployment of System Center Configuration Manager (Current Branch). You configure hybrid mobile device management (MDM). You have a support technician named User1. Your company purchases 300 Apple iPhones. You need to ensure that User1 can enroll the iPhones. Solution: From a web browser, you request an Enrollment Agent certificate from a certification authority (CA). Does this meet the goal? A. Yes B. No Answer: B Explanation:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager> QUESTION 47 You have a deployment of System Center Configuration Manager (Current Branch). You configure reporting in Configuration Manager and verify that users can view reports. You need to ensure that the users can subscribe to the reports and that the reports are delivered by using email. What should you do? A. In Active Directory Users and Computers, configure the email address of the users. B. In Configuration Manager, configure the Report Options. C. In Reporting Services Configuration Manager, configure the E-mail Settings. D. In Microsoft SQL Server Management Studio, configure Database Mail. Answer: C Explanation:

<https://github.com/MicrosoftDocs/SCCMdocs/blob/master/sccm/core/servers/manage/operations-and-maintenance-for-reporting.md> [https://docs.microsoft.com/en-us/previous-versions/sql/sql-server-2008/ms159155\(v=sql.100\)](https://docs.microsoft.com/en-us/previous-versions/sql/sql-server-2008/ms159155(v=sql.100)) QUESTION 48 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You deploy the first primary site server to your organization. Discovery is not configured. You need to deploy the Configuration Manager client to five client computers in a workgroup. Solution: You deploy the client by using a software deployment. Does this meet the goal? A. Yes B. No Answer: B Explanation:

<https://docs.microsoft.com/en-us/sccm/core/clients/deploy/deploy-clients-to-windows-computers> QUESTION 49 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You deploy the first primary site server to your organization. Discovery is not configured. You need to deploy the Configuration Manager client to five client computers in a workgroup. Solution: You configure client push installations. Does this meet the goal? A. Yes B. No Answer: B Explanation:

<https://docs.microsoft.com/en-us/sccm/core/clients/deploy/deploy-clients-to-windows-computers> QUESTION 50 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You deploy the first primary site server to your organization. Discovery is not configured. You need to deploy the Configuration Manager client to five client computers in a workgroup. Solution: You manually install the client on the computers. Does this meet the goal? A. Yes B. No Answer: A Explanation:

<https://docs.microsoft.com/en-us/sccm/core/clients/deploy/deploy-clients-to-windows-computers> QUESTION 51 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You deploy the first primary site server to your organization. Discovery is not configured. You need to deploy the Configuration Manager client to five client computers in a workgroup. Solution: You deploy the client by using a Group Policy installation. Does this meet the goal? A. Yes B. No Answer: B Explanation:

<https://docs.microsoft.com/en-us/sccm/core/clients/deploy/deploy-clients-to-windows-computers> QUESTION 52 Note: This

question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has client computers that run either the 32-bit version of Windows 8 or the 64-bit version of Windows 10. You need to install a line-of-business application to the computers. The 64-bit version of the application must be installed on the Windows 10 computers. Solution: Create one application that has one deployment type. Configure two requirements for the deployment type. Does this meet the goal? A. Yes B. No Answer: B Explanation:

<https://blogs.technet.microsoft.com/canitpro/2013/06/02/step-by-step-managing-multiple-versions-of-the-same-application-via-a-system-center-configuration-manager/> QUESTION 53

You have a deployment of System Center Configuration Manager (Current Branch). You need to create a task sequence to deploy Windows 10. Which two components should you include in the task sequence? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. A. a driver package B. an operating system image C. software updates D. a boot image Answer: B Explanation:

<https://docs.microsoft.com/en-us/sccm/osd/deploy-use/create-a-task-sequence-to-install-an-operating-system> QUESTION 54

You have a deployment of System Center Configuration Manager (Current Branch) that contains a primary site named S01. S01 has the Software update point site system role installed on a server named Server01 and the Distribution point site system role installed on a server named Server02. You need to configure when Configuration Manager can install updates on the site system servers. What should you configure? A. the Properties of the S01 site B. the Distribution point Properties of Server02 C. the Software update point Properties of Server01 D. the Software Update Point Component Properties of S01 Answer: A Explanation:

<https://docs.microsoft.com/en-us/sccm/sum/get-started/manage-settings-for-software-updates> QUESTION 55

You deploy System Center Configuration Manager (Current Branch). You need to manage the malware settings for Configuration Manager clients. What should you do first? A. Add an Endpoint Protection point. B. Disable Windows Defender. C. Create a configuration baseline. D. Create a compliance policy. Answer: A Explanation:

<https://docs.microsoft.com/en-us/sccm/protect/deploy-use/endpoint-protection-configure> QUESTION 56

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series. Start of repeated scenario. Your network contains an Active directory forest named adatum.com. All client computers run Windows 10 Enterprise. All the computers are named by using the name of their respective department and an incremental three-digit number. For example, the first computer in the sales department is named Sales001. Several managers use tablets that run Windows 10 and have 3 GB of RAM. All other client computers have at least 8 GB RAM. Adatum.com is synchronized to Microsoft Azure Active Directory. Your company implements the Microsoft Store for Business. You have a deployment of System Center Configuration Manager (Current Branch) that has discovery configured. All the client computers have the Configuration Manager client installed. The company uses the applications shown in the following table. The company identifies the following requirements for software deployments: View the Upgrade Readiness data of all the client computers. Deploy App1 to the client computers in the marketing department. Deploy App2 to the client computers in the human resources (HR) department. Monitor the usage of App3. Deploy SalesAppLite to sales department computers that have 3 GB of RAM or less. Deploy SalesAppFull to sales department computers that have more than 3 GB of RAM. You create a cloud-based distribution point that has a public name of d1594d4527614a09b934d470. End of repeated scenario. You need to ensure that you can deploy App1 to the marketing department computers. What should you do? A. Download the App-V client and install the client by using a Group Policy object (GPO). B. Sequence App1 by using the App-V Sequencer. C. Download the App-V client and deploy the client by using a Configuration Manager application. D. Deploy a Group Policy object (GPO) that enables the App-V client. Answer: D Explanation:

<https://docs.microsoft.com/en-us/windows/application-management/app-v/appv-enable-the-app-v-desktop-client>
