QUESTION 111 You are the administrator of a SQL Server 2008 instance which uses mixed authentication mode. The instance runs on a computer which has Windows Server 2003 installed. You have to make sure that the SQL Server 2008 authenticated logins follow the same password complexity rules that are enforced by Windows Server 2003. Besides this, you must make sure that the password complexity rules continue to be enforced. Which action should you perform to achieve this goal? (choose more than one)
 A. You should create an SQL Server Agent job. If a rule violation is detected, the job runs periodically to raise an alert.
 B. You should modify all logins by using the ALTER LOGIN ... HASHED statement.
 C. You should modify all logins by using the ALTER LOGIN ... CHECK_POLICY = ON statement.
 D. You should modify all logins by using the ALTER LOGIN ... CHECK_EXPIRATION = ON statement.
 E. You should create a policy by using Policy-Based Management. The policy prevents any violation of these rules.
 Answer: CE

QUESTION 112 Your workstation has installed Microsoft SQL Server Management Studio (SSMS), and not installed Microsoft Business Intelligence Development Studio (BIDS). Which is correct?
 A. You should create the package by using DTS Designer.
 B. You should create the package by using the Package Migration Wizard.
 C. You should create the package by using the Microsoft SQL Server Import and Export Wizard.

 Answer: C

QUESTION 113 You are mastering the company database called TesterDB; The database includes a database that uses SQL Server log shipping. Log shipping will happen half a hour. You should make the full backup. In order to cut the net bandwidth utilization when maintenance every night. Which is the correct answer?
 A. You should set the database to utilize the bulk-logged recovery model.
 B. You should reproduce only those indexes that ask it every night.
 C. You should add the time during transaction log backups.
 D. You should disable log shipping after the nightly maintenance.
 Answer: B

QUESTION 114 You are mastering the company database, Users complains that the SQL Server 2008 application is running slowly. You should check the information of the CPU utilization, disk utilization, and memory utilization. The network should be considered. The detailed information should be checked for the proper example of SQL Server 2008. Which is the correct answer?
 A. You should check the proper dynamic management views (DMVs).
 B. In the databases, you should check the distribution of the statistics which are hosted.
 C. You should check a statistics update commands the output.
 D. You should check the recovery model of the master database.
 Answer: A

QUESTION 115 You maintain an instance of Microsoft SQL Server 2008. The instance contains a database named Finance. The recovery model of the Finance database is set to Full. A full database backup of all the user databases is performed at 02:00 hours daily. The transaction log backup occurs every 15 minutes. A differential backup is performed every 4 hours. You plan to perform a full backup of the Finance database at 11:00 hours. You need to ensure that the backup is performed without affecting the overall backup and restore procedures for the Finance database. You also need to ensure that the backup files are restored in proper sequence. Which Transact-SQL statement should you use?
 A. BACKUP LOG FINANCE TO DISK = 't:backupsfinance.trn';
 B. BACKUP DATABASE FINANCE TO DISK = 't:backupsfinance.bak' WITH NOUNLOAD;
 C. BACKUP DATABASE FINANCE TO DISK = 't:backupsfinance.bak' WITH COPY_ONLY;
 D. BACKUP DATABASE FINANCE TO DISK = 't:backupsfinance.bak' WITH DIFFERENTIAL;
 Answer: C

QUESTION 116 You are mastering the company database, and managing 20 SQL Server 2005 computers which are operated by other administrators that are asked to meet company service level agreements (SLAs) on querying response time. Some of the method on controlling query response times on the servers should be told for these administrators. Which is the correct answer?
 A.

You should create a query that searches the sys.dm_db_partition_stats dynamic management view (DMV). Then distribute this search to the administrators.B. You should develop an XML schema which includes the event and column names of the query response times, which should be captured in SQL Server Profiler.C. You should develop SQL Server Profiler templates, which contain query start times and end times. Then distribute these templates to the database.D. You should teach the administrators to use System Monitor Control Tool Answer: C QUESTION 117You are managing a SQL Server 2008 instance which includes some applications for Home.com.You set the SQL Server Agent service to implement through utilizing the SerTestTest account.You create a job named MailingTester that allows a file to be stored to a log server. The job could not run normally because it could not own proper access to the log server.You decide to set the service of SQL Server Agent.You should make sure that you could run the settings such that the SQL Server Agent service owns all access to the log server. Which is the correct answer? A. You should utilize the type of Domain accountB. You should utilize the type of remote System accountC. You should utilize the type of remote Service accountD. You should utilize the type of Local Service account Answer: A QUESTION 118View Exhibit
