QUESTION 411Your network contains several servers that run Windows Server 2012 R2 and client computers that run Windows 8.1.You download several signed Windows PowerShell scripts from the Internet.You need to run the PowerShell scripts on all of the servers and all of the client computers. What should you modify first? A. the environment variables on all of the serversB. the environment variables on all client computersC. the execution policy on all of the serversD. the execution policy on all of the client computers Answer: AExplanation: First modify the environment variables on the server, then modify them on client computers. QUESTION 412Hotspot QuestionYou have a Hyper-V host named Server1 that runs Windows Server 2012 R2. Server1 hosts 50 virtual machines. You need to create a script to list all of the virtual machines that have checkpoints and support Secure Boot. What should you do? To answer, select the appropriate options in the answer area.

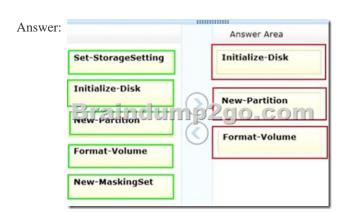

QUESTION 413Your network contains an Active Directory domain named contoso.com. The domain contains a domain controller named Server1 that runs Windows Server 2012 R2.On Server1, you create a work folder named Work1. A user named User1 connects to Work1 from a computer named Computer1. You need to identify the last time the documents in Work1 were synchronized successfully from Computer1. What should you do? A. From Windows PowerShell, run the Get-SyncShare cmdlet. B. From Windows PowerShell, run the Get-SyncUserSettings cmdlet. C. From Server Manager, review the properties of Computer1. D. From Server Manager, review the properties of User1. Answer: D QUESTION 414Drag and Drop QuestionYou have a server named Server1 that runs Windows Server 2012 R2. You add a new internal SAS disk to Server1. You need to ensure

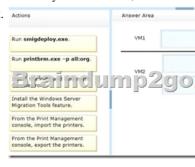

(\$_.version -eq 3)

that the new disk is available to store files. Which three cmdlets should you run in sequence? To answer, move the appropriate three cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

QUESTION 415Drag and Drop QuestionYou have a Hyper-V host named Host1. Host1 contains two virtual machines named VM1 and VM2. VM1 is configured as a print server. VM1 runs Windows Server 2008 R2. VM2 is configured as a file server. VM2 runs Windows Server 2012 R2. You need to migrate all of the printers on VM1 to VM2. Which actions should you perform on the virtual machines? To answer, drag the appropriate action to the correct servers in the answer area. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

QUESTION 416Drag and Drop QuestionYour network contains an Active Directory domain named contoso.com. All servers run Windows Server 2012 R2. All client computers run Windows 8.The domain contains a security group named Group1.You have a Group Policy object (GPO) named GP01. GPO1 is linked to the domain.You need to ensure that only the members of Group1 can run the applications shown in the following table.

Application name

Application file

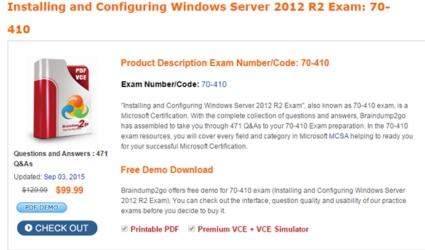

Which type of application control policy should you implement for each application? To answer, drag the appropriate rule types to the correct applications. Each rule type may be used once, more than once, or not at all. You may need to drag the split bar between

panes or scroll to view content. Rule Type

QUESTION 417Your network contains an Active Directory domain named contoso.com. The domain contains 100 user accounts that reside in an organizational unit (OU) named OU1. You need to ensure that a user named User1 can link and unlink Group Policy objects (GPOs) to OU1. The solution must minimize the number of permissions assigned to User1. What should you do? A. Add User1 to the Group Policy Creator Owners group.B. Modify the permissions on the User1 account.C. Modify the permissions on OU1.D. Run the Delegation of Control Wizard on the Policies container. Answer: C QUESTION 418Your network contains an Active Directory domain named contoso.com. The domain contains hundreds of groups, many of which are nested in other groups. The domain contains a user account named User1. User1 is a direct member of 15 groups. You need to identify of which Active Directory groups User1 is a member, including the nested groups. The solution must minimize administrative effort. Which tool should you use? A. ADSI EditB. Get-ADUserC. Active Directory Users and ComputersD. Dsget Answer: D QUESTION 419Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. The domain contains a standalone server named Server2 that is located in a perimeter network. Both servers run Windows Server 2012 R2. You need to manage Server2 remotely from Server1. What should you do? A. From Server2, run the Enable-PsRemoting cmdlet.B. From Server1, run the winrm command.C. From Server2, run the winrm command.D. From Server1, run the Enable-PsRemoting cmdlet. Answer: B QUESTION 420Your network contains an Active Directory forest named contoso.com. The forest contains five domains. All domain controllers run Windows Server 2012 R2. The contoso.com domain contains two user accounts named Admin1 and Admin2. You need to ensure that Admin1 and Admin2 can configure hardware and services on all of the member servers in the forest. The solution must minimize the number of privileges granted to Admin1 and Admin2. Which built-in groups should you use? A. Server Operators global groupsB. Domain Admins global groupsC. Administrators domain local groups D. Administrators local groups Answer: D All the 471 Questions and Answers in Braindump2go 70-410 Exam Dumps are the latest 70-410 Real Exam Questions not just 70-410 Practice Tests Questions! Braindump2gp Microsoft 70-410 Exam Dumps PDF&VCE Guarantees you 100% Pass 70-410 Exam! Braindump2go Can Provide the Latest 70-410 Dumps Questions from Microsoft Official Exam Center for You!
