QUESTION 91Your network contains an Active Directory domain named contoso.com. The domain contains a Virtual Desktop Infrastructure (VDI).You plan to create a new virtual desktop collection that will contain 500 virtual desktops.Each virtual desktop will be assigned to a specific user. All of the virtual desktops will be based on the same virtual machine template.You need to recommend the configurationfor the virtual desktop collection.Which configuration should you recommend? A.   a managed personal virtual desktop collectionB.   a managed pooled virtual desktop collectionC.   an unmanaged personal virtual desktop collectionD.   an unmanaged pooled virtual desktop collection Answer: A QUESTION 92Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012. Server1 has Microsoft System Center 2012 Configuration Manager installed. All client computers run Windows 8 and support Wake on LAN. You plan to implement a software updates infrastructure to support updating the Windows 8 client computers.You need to meet the following requirements:- Ensure that the updates are not applied during business hours. - Ensure that the updates are installed at 03:00 each day, even if the client computers are turned off. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A.   Add the Out of band service point Configuration Manager system role to Server1.B.   Create and link a Group Policy object (GPO) to the domain and configure the Automatic Updates settings in the GPO.C.   Install and configure Windows Server Update Services (WSUS) on Server1.D.   Add the Software update point Configuration Manager system role to Server1.E.   Install and configure System Center Updates Publisher 2011 on Server1. Answer: CDExplanation:CD: The software update point in Microsoft System Center Configuration Manager 2007 is a required component of software updates and is installed as a site system role in the Configuration Manager console. The software update point site system role must be created on a site system server that has Microsoft Windows Server Update Services (WSUS) 3.0 installed. QUESTION 93Your network contains an Active Directory domain named contoso.com The domain contains a server named Gateway1 that has the Remote Desktop Gateway role service installed.You need to ensure that all of the users who connect to the Remote Desktop Session Host (RD Session Host) servers by using Gateway1 receive a custom logon message.The solution must prevent the message from appearing then the users connect to the RD Session Hosts servers directly.What should you configure from Remote Desktop Gateway Manager? A.   the properties of Gateway1B.   the RD Gateway-managed computer groupsC.   the Remote Desktop connection authorization policies (RD CAPs)D.   the Remote Desktop resource authorization policies (RD RAPs) Answer: A QUESTION 94Your network contains an Active Directory domain named contoso.com. The domain has Microsoft System Center 2012 Configuration Manager deployed. All client computers run Windows XP. Your company plans to replace all of the client computers with new computers that run Windows 8. You need to recommend which Configuration Manager system role must be deployed to capture the local application data from the Windows XP computers, and then deploy the local application data to the Windows 8 computers. Which system role should you recommend? To answer, select the appropriate system role in the answer area.
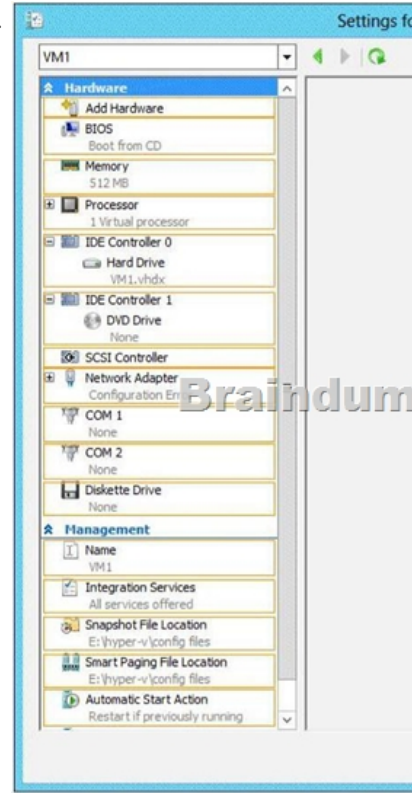

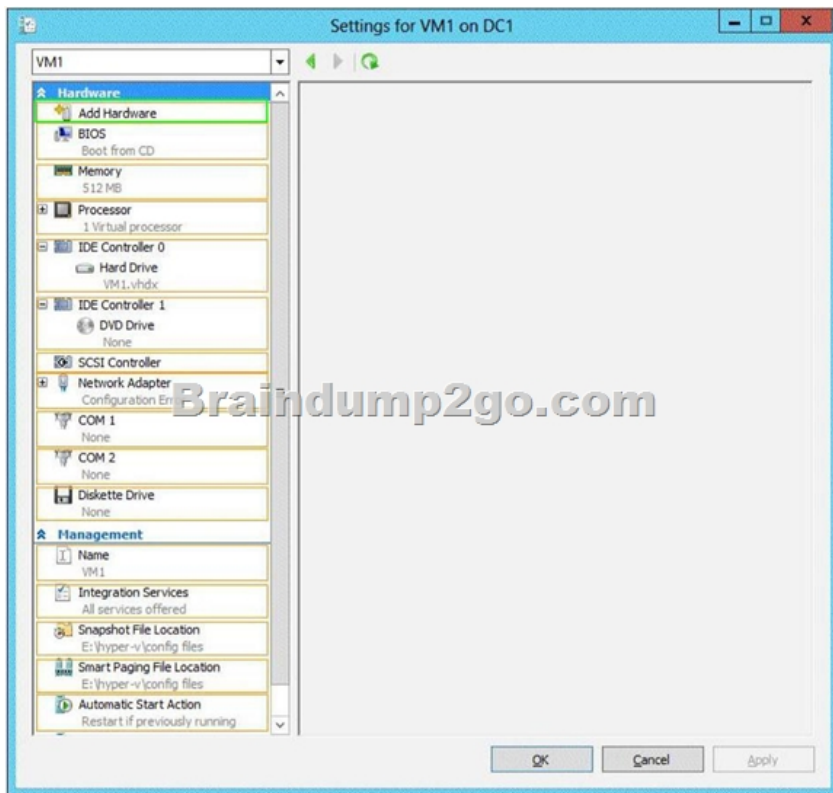

Answer:

QUESTION 95Your network contains an Active Directory domain named contoso.com. You have an image of Windows 8 Enterprise that you plan to use as a template to provision new client computers. You have an internally developed Windows Store line-of-business application named App1 that must be added to the image.You need to include App1 in the image. The solution must ensure that users can run Appl after the image is deployed to their desktop computer. What should you do before adding App1 to the image? (Each correct answer presents part of the solution. Choose all that apply.) A.   Join the users' computers to the domain.B.   Create an XAP file for Appl.C.   Create a Windows Installer package for App1.D.   Sign the application by using a trusted certificate.E.   Modify the AllowAllTrustedApps registry value. Answer: ADEExplanation:A:- You must join the device running Windows 8 Enterprise or Windows Server 2012 to an Active Directory domain that has the Allow all trusted applications to install Group Policy setting enabled.- Setting the Group Policy to allow trusted applications updates the following registry setting: HKEY_LOCAL_MACHINESoftwarePoliciesMicrosoftWindowsAppxAllowAllTrustedApps = 1D: You can install LOB Windows Store apps that are not signed by the Windows Store. The apps must be cryptographically signed and can only be installed on a computer that trusts the signing certificate.E:Note:- You can addline-of-business (LOB) WindowsStore apps to a Windows QUESTION 96Your network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2 that run Windows Server 2012. Server1 has the Windows Deployment Services server role and the Microsoft Deployment Toolkit (MDT) installed. Server2 has Windows Server Update Services (WSUS) installed. You have an image of Windows 8 that is deployed by using MDT 2012. You plan to deploy a new hardware device to all new client computers. The new

hardware requires additional device drivers that are unavailable from Microsoft Update. You need to add the hardware drivers to the Windows 8 image.What should you do? A.   From Server1, add the new drivers to Deployment Workbench, and then create a task sequence.B.   From Server1, install the Windows Internal Database, and then copy the drivers to C:WindowsSystem32DriverStoreTemp.C.   From Server1, mount the image, and then run the Add-WindowsPackage cmdlet.D. From Server2, copy the drivers to the Inventory folder. Answer: CExplanation:- Add-WindowsPackageAdds a single .cab or .msu file to a Windows image QUESTION 97Your network contains a Virtual Desktop Infrastructure (VDI). You have a virtual machine named VM1 that will be used as a virtual machine template. You need to enable RemoteFX video support on VM1. From which node should you perform the configuration? To answer, select the appropriate node in the answer area.

Answer:

QUESTION 98Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that has Microsoft System Center 2012 Configuration Manager installed. You have a client computer named Computer1 that runs Windows 8. Computer1 is a Configuration Manager client. You plan to use Computer1 as a reference computer, and then to deploy an image of the reference computer to the network. You need to recommend which task must be performed before you capture the image. What should you recommend? A.   From Computer1, uninstall the Configuration Manager client.B.   From Server1, create a build and capture a task sequence by using the Configuration Manager console.C.   From Server1, add a capture image by using the Windows Deployment Services console.D.   From Computer1, run sysprep.exe/generalize. Answer: D Explanation:This is asking: You need to recommend which task must be performed before you capture the image Hence: From Computer1, run sysprep.exe/generalize QUESTION 99Your network contains an Active Directory domain named contoso.com. The domain contains a Virtual Desktop Infrastructure (VDI) and pooled virtual desktops. Users start virtual desktop sessions by using Remote Desktop Web Access (RD Web Access). Some users access virtual desktops by using a Remote Desktop Gateway (RD Gateway). You need to identify which users are connected currently to the virtual desktops. Which tool should you use? To answer, select the appropriate tool in the answer area.

Answer:

QUESTION 100Your network contains a Remote Desktop Services (RDS) session collection that is used by all users. Users in the sales department access the session collection by using a Remote Desktop Gateway (RD Gateway) server. Sales users often establish Remote Desktop connections to the internal network from their customers' offices. You need to prevent the sales users from copying files to the computers at the customers' offices during the Remote Desktop sessions. What should you configure? More than one answer choice may achieve the goal. Select the BEST answer. A.   The Remote Desktop resource authorization policies (RD RAPs) from Remote Desktop Gateway ManagerB.   A Group Policy object (GPO) linked to the organizational unit (OU) that contains the Remote Desktop Session Host (RD Session Host) server accountsC.   The properties of the collection from the Remote Desktop Services node in Server ManagerD.   The Remote Desktop connection authorization policies (RD CAPs) from Remote Desktop Gateway ManagerE.   A Group Policy object (GPO) linked to the organizational unit (OU) that contains the sales user accounts Answer: D   100% Full Money Back Guarantee Promised By Braindump2go to All 70-415 Exam Candiates: Braindump2go is confident that our NEW UPDATED 70-415 Exam Questions and Answers are changed with Microsoft Official Exam Center, If you cannot PASS 70-415 Exam, nevermind, we will return your full money back!
