November/2021 Latest Braindump2go PL-600 Exam Dumps with PDF and VCE Free Updated Today! Following are some new PL-600 Real Exam Questions! QUESTION 84 Hotspot Question A company reports the following issues with an existing data management system. - Users cannot search for specific records by using a user-friendly ID or record identifier. - Users occasionally enter data into fields that is not required. - The record form displays all fields. Many of the fields are not used. You need to ensure that the Power Platform solution will ensure data quality can be properly maintained. Which component should you use? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point. **Answer Area**

Requirement

Ensure that users can search for specific records by using a unique identifier.

Requirement

You must prevent data entry into columns that do not require entry.

Answer: **Answer Area**

Requirement	Solution
Ensure that users can search for specific records by using a unique identifier.	<ul style="list-style-type: none">Business ruleAutonumber columnBusiness process flowDuplicate detection rule
You must prevent data entry into columns that do not require entry.	<ul style="list-style-type: none">Business ruleReal time workflowBusiness process flowDuplicate detection rule

Explanation: Box 1: Autonumber column. Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created. Box 2: Business rule. By combining conditions and actions, you can do any of the following with business rules: Enable or disable columns, Set column values, Clear column values, Set column requirement levels, Show or hide columns, Validate data and show error messages, Create business recommendations based on business intelligence. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/autonumber-fields>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule> QUESTION 85 Drag and Drop

Question A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse. The customer wants to keep the service process simple and save on both licensing and development time. You need to recommend solutions for the customer. What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **NOTE:** Each correct selection is worth one point.

Solutions	Scenario	Solution
Canvas app	Show the app in Microsoft Outlook	Solution
Dynamics 365 Customer Service	Use Universal Resource Scheduling	Solution
	Take notes on a mobile phone and record GPS coordinates automatically.	Solution

Answer: **Solutions**

Answer Area	
Scenario	Solution
Show the app in Microsoft Outlook Use Universal Resource Scheduling.	Model-driven app Dynamics 365 Customer Service
Take notes on a mobile phone and record GPS coordinates automatically.	Canvas app

Explanation: Box 1: Model-drive app Integration with Microsoft Outlook requires a Model-driven app. Box 2: Dynamics 365 Customer Service Schedule anything in Dynamics 365 using Universal Resource Scheduling. You can enable scheduling for any entity in Dynamics 365 Sales, Field Service, Customer Service, and Project Service Automation, including custom entities. Box 3: Canvas app Reference:

<https://docs.microsoft.com/en-us/dynamics365/common-scheduler/schedule-anything-with-universal-resource-scheduling>

QUESTION 86 Drag and Drop Question You are reviewing a list of business requirements submitted by a plumbing company. The company has the following requirements:- Send articles to technicians to allow technicians to help customers resolve issues.- Track work progress and inspections at customer sites.- Schedule technicians for service appointments. You need to recommend solutions to meet the customer's requirements. What should you recommend? To answer, drag the appropriate solutions to the correct business requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Solutions	Business requirement	Solution
Dynamics 365 Field Service	Send articles to technicians to allow technicians to help customers resolve issues.	Solution
Dynamics 365 Customer Voice	Track work progress and inspections at customer sites.	Solution
Dynamics 365 Customer Insights	Schedule technicians for service appointments.	Solution

Answer: **Solutions**

Answer Area	
Business requirement	Solution
Send articles to technicians to allow technicians to help customers resolve issues.	Dynamics 365 Customer Insights
Track work progress and inspections at customer sites.	Dynamics 365 Field Service
Schedule technicians for service appointments.	Dynamics 365 Field Service

Explanation: Box 1: Dynamics 365 Customer Insights Dynamics 365 Customer Insights is a part of Microsoft's customer data platform (CDP) that helps deliver personalized customer experiences. The platform's capabilities provide insights into who your customers are and how they engage with your platform. Unify customer data across multiple sources to get a single view of customers. Box 2: Dynamics 365 Field Service Dynamics 365 Field Service helps to: Organize and track resolution of customer issues Keep customers updated with the status of their service call and when it's resolved Note: The Dynamics 365 Field Service business application helps organizations deliver onsite service to customer locations. The application combines workflow automation, scheduling algorithms, and mobility to set up mobile workers for success when they're onsite with customers fixing issues. The Field Service application enables you to: Improve first-time fix rate Complete more service calls per technician per week Manage follow-up work and take advantage of upsell and cross sell opportunities Reduce travel time, mileage, and vehicle wear and tear Organize and track resolution of customer issues Communicate an accurate arrival time to customers Provide accurate account and equipment history to the field technician Keep customers updated with the status of their service call and when it's resolved Schedule onsite visits when it's convenient for the customer Avoid equipment downtime through preventative maintenance Box 3: Dynamics 365 Field Service Dynamics 365 Field Service: Schedule onsite visits when it's convenient for the customer. Incorrect Answers: Dynamic 365 Customer Voice empowers your organization to quickly collect and understand omnichannel feedback at scale to build better customer experiences. Reference: <https://docs.microsoft.com/en-us/dynamics365/field-service/overview> <https://dynamics.microsoft.com/en-us/customer-voice/capabilities> QUESTION 87 You are designing a Power Platform solution for a company. The company issues each employee a tablet device. The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:- Users must have a visual guide to know which data to enter in each step of the opportunity management process.- The system must automatically assign the opportunity to a manager for approval once all data is entered.- The system must notify an assignee each time an opportunity is assigned to them by

using push notifications.- When a user selects a push notification, the associated opportunity must display.You need to recommend the Power Platform components that will meet their requirements.Which three Power Platform components should you recommend? Each correct answer presents part of the solution.NOTE: Each correct selection is worth one point.A. Business process flowsB. Power Apps mobile appsC. Power Virtual Agents chatbotsD. Power Automate desktop flowsE. Power Automate cloud flowsAnswer: ABEEExplanation: A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule. Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.Reference:<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview><https://docs.microsoft.com/en-us/powerapps/mobile/power-apps-mobile-notification>QUESTION 88A company is struggling to gather insights from won and lost opportunities.Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:- Track opportunities and reasons for the win or loss of opportunities in the context of other related data.- Display data to users as charts and tables and provide drill-through capabilities.You need to recommend a Power Platform tool to help the client visualize the data.Which two technologies should you recommend? Each correct answer presents a complete solution.NOTE: Each correct selection is worth one point.A. Power BIB. Power AutomateC. Power Virtual AgentsD. Power AppsAnswer: ADEExplanation: A: Power BI is a business analytics service by Microsoft. It aims to provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards. It is part of the Microsoft Power Platform.D: Power BI Apps are an easy way for designers to share different types of content at one time. App designers create the dashboards and reports and bundle them together into an app. The designers then share or publish the app to a location where you, the business user, can access it. Because related dashboards and reports are bundled together, it's easier for you to find and install in both the Power BI service (<https://powerbi.com>) and on your mobile device. After you install an app, you don't have to remember the names of a lot of different dashboards or reports because they're all together in one app, in your browser or on your mobile device.Reference: <https://docs.microsoft.com/en-us/power-bi/consumer/end-user-apps>QUESTION 89A company wants to add an interactive checklist to a Power Platform solution to ensure that salespeople are following the same steps when qualifying leads.You need to recommend a solution that will incorporate this checklist.What should you recommend?A. Microsoft Customer VoiceB. Business Process Modeler task guideC. DashboardsD. Business Process FlowAnswer: DQUESTION 90Hotspot QuestionA company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources.The company reports the following data quality issues with the existing solution:- Users often encounter a character limit when entering data.- The database includes multiple instances of duplicate records.You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.What should you recommend? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Users often encounter a character limit when entering data.	<input type="checkbox"/> Define a data mask. <input type="checkbox"/> Define and implement duplicate detection rules. <input type="checkbox"/> Define the data type and format for each column.
The database includes multiple instances of some records.	<input type="checkbox"/> Define requirements for data entry. <input type="checkbox"/> Define and implement duplicate detection rules. <input type="checkbox"/> Define the data type and format for each column.

Answer: **Answer Area**

Issue	Solution
Users often encounter a character limit when entering data.	<input type="checkbox"/> Define a data mask. <input type="checkbox"/> Define and implement duplicate detection rules. <input type="checkbox"/> Define the data type and format for each column.
The database includes multiple instances of some records.	<input type="checkbox"/> Define requirements for data entry. <input checked="" type="checkbox"/> Define and implement duplicate detection rules. <input type="checkbox"/> Define the data type and format for each column.

Explanation:Box 1: Define the data type and format for each columnIncrease the data type size of the column.Box 2: Define and implement duplicate detection rulesReference:

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-duplicate-detection-rules-keep-data-clean>QUESTION 91Hotspot QuestionA company is creating a Power Platform solution to manage employees.The company has the following requirements:- Allow only the human resource manager to change an employee's employment status when an employee is dismissed.- Allow only approved device types to access the solution and company data.You need to recommend a solution that meets the requirements.What should you recommend? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	<ul style="list-style-type: none">Team accessPrivacy preferenceField security profileHierarchy security profile
Allow only approved device types to access the solution and company data.	<ul style="list-style-type: none">Endpoint securityCompliance policyConditional accessMobile threat integration

Answer: **Answer Area**

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	<ul style="list-style-type: none">Team accessPrivacy preferenceField security profileHierarchy security profile
Allow only approved device types to access the solution and company data.	<ul style="list-style-type: none">Endpoint securityCompliance policyConditional accessMobile threat integration

Explanation:Box 1: Field security profileRecord-level permissions are granted at the entity level, but you may have certain fields associated with an entity that contain data that is more sensitive than the other fields. For these situations, you use field-level security to control access to specific fields.Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles.Box 2: Compliance policy Compliance policy settings ? Tenant-wide settings that are like a built-in compliance policy that every device receives. Compliance policy settings set a baseline for how compliance policy works in your Intune environment, including whether devices that haven't received any device compliance policies are compliant or noncompliant.Note: Mobile device management (MDM) solutions like Intune can help protect organizational data by requiring users and devices to meet some requirements. In Intune, this feature is called compliance policies.Compliance policies in Intune:Define the rules and settings that users and devices must meet to be compliant. Include actions that apply to devices that are noncompliant. Actions for noncompliance can alert users to the conditions of noncompliance and safeguard data on noncompliant devices.Can be combined with Conditional Access, which can then block users and devices that don't meet the rules.Reference:<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>
<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>
