The solution must meet the visualization requirements. What should you include in the recommendation? A. Cluster-Aware UpdatingB. WSUSC. System Center Updates Publisher 2011D. System Center 2012 Configuration Manager Answer: AExplanation:

Business Requirements
- Minimize the number of permissions assigned to users.
- Ensure that the members of a group named Group1 can add a WSUS server to the fabric.
- Ensure that the members of a group named Group2 can create new virtual machines in the Los Angeles office only.
- Only create virtual machine templates by using objects that already exist in the System Center 2012 Virtual Machine Manager (VMM) library.
- On the failover cluster in the main office, apply limited distribution release (LDR) updates to the virtualization hosts without disrupting the virtual machines hosted on the virtualization hosts.

Cluster-Aware Updating Overview

Applies To: Windows Server 2012

Braindump2go.com

This topic provides an overview of Cluster-Aware Updating (CAU), a new feature for failover clusters in Windows Server 2012 that automates the software updating process on clustered servers while maintaining availability. It describes scenarios and applications for using CAU, and provides links to content that details how to integrate CAU into other IT automation and management processes.

What should you create? A. A collectionB. A host groupC. An organizational unit (OU)D. A site Answer: BExplanation:

Business Requirements	Technical Requirements	Virtualization Requirements	All
The company identifies the following virtualization requirements:			
- Minimize the number of permissions and privileges assigned to users.			
- Ensure that the members of a group named Group2 can add a WSUS server to the fabric.			
- Ensure that the members of a group named Group1 can create new virtual machines in the Los Angeles office only.			
- Only create virtual machine templates by using objects that already exist in the System Center 2012 Virtual Machine Manager (VMM) library.			
- On the failover cluster in the main office, apply limited distribution release (LDR) updates to the virtualization hosts without disrupting the virtual machines hosted on the virtualization hosts.			

Applies To: System Center 2012 - Virtual Machine Manager, System Center 2012 SP1 - Virtual Machine Manager

[This topic is pre-release documentation and is subject to change in future releases. Blank topics are included as placeholders.]

The company plans to implement the following changes:

- Replace all of the domain controllers with new servers that run Windows Server 2012.
- Upgrade the CRM application to use a web-based application that connects to the current CRM database.
- The web application will store session data in the memory of each web server.
- Deploy two front-end web servers to two virtual machines. Additional virtual web servers will be deployed in the future.
- Implement Microsoft System Center 2012 to manage the main environment.

Distribution point: A site system role that contains source files for clients to download, such as application content, software packages, software updates, operating system images, and boot images.

<http://technet.microsoft.com/en-us/library/gg610645.aspx> QUESTION 55You need to recommend a solution for managing updates. The solution must meet the technical requirements. What should you include in the recommendation? A. A System Center 2012 Configuration Manager management point in the main office and a System Center 2012 Configuration Manager distribution point in each office.B. A System Center 2012 Configuration Manager management point in the main office and a WSUS downstream server in each office.C. A System Center 2012 Configuration Manager software update point in the main office and a System Center 2012 Configuration Manager distribution point in each office.D. A WSUS upstream server in and a WSUS downstream server in each office. Answer: CExplanation:

Business Requirements	Technical Requirements	Virtualization Requirements	All
The company identifies the following technical requirements:			
- Implement a highly available DHCP solution.			
- Implement third-party applications for all of the users.			
- Ensure that all of the domain controllers have the ReliableTimeSource registry value in HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\W32Time\Parameters set to 1, even if an administrator changes that value manually.			

Overview	Existing Environment	Network Infrastructure	Current Issues	Planned Changes
The company plans to implement the following changes:				
- Replace all of the domain controllers with new servers that run Windows Server 2012.				
- Upgrade the CRM application to use a web-based application that connects to the current CRM database.				
- The web application will store session data in the memory of each web server.				
- Deploy two front-end web servers to two virtual machines. Additional virtual web servers will be deployed in the future.				
- Implement Microsoft System Center 2012 to manage the main environment.				
Distribution point: A site system role that contains source files for clients to download, such as application content, software packages, software updates, operating system images, and boot images.				

<http://technet.microsoft.com/en-US/library/gg682106.aspx> QUESTION 56 You need to recommend an automated remediation solution for the ReliableTimeSource registry value. The solution must meet the technical requirements. What should you include in the recommendation? A. A System Center 2102 Configuration Manager configuration baseline. B. A System Center 2012 Operations Manager performance counter rule. C. A System Center 2012 Configuration Manager maintenance task. D. A System Center 2012 Operations Manager event rule. Answer: A Explanation:

<http://technet.microsoft.com/en-US/library/gg682106.aspx> QUESTION 57 You need to create a service template for the web servers used by the CRM application. What should you include in the service template? A. A VIP template. B. A host profile. C. Guest OS profile. D. A capability profile. Answer: A Explanation:

<http://technet.microsoft.com/library/gg610569.aspx> QUESTION 58 You need to recommend a solution that meets the technical requirements for DHCP. What should you include in the recommendation for each office? A. Network Load Balancing (NLB). B. DHCP failover. C. DHCP server policies. D. IP Address Management (IPAM). Answer: B Explanation:
