QUESTION 51 Your company has a hybrid deployment of Office 365. All mailboxes are hosted on Office 365. All users access their Office 365 mailbox by using a user account that is hosted on-premises. You need to delete a user account and its associated mailbox. Which tool should you use? A. The Remove-MSOLUser cmdlet B. The Remove-Mailbox cmdlet C. The Office 365 portal D. Active Directory Users and Computers Answer: D Explanation: When deleting accounts from Active Directory and directory synchronization runs the associated object will be deleted from Azure and also soft deleting the mailbox. QUESTION 52 You use a centralized identity management system as a source of authority for user account information. You export a list of new user accounts to a file on a daily basis. Your company uses a local Active Directory for storing user accounts for on-premises solutions. You are configuring the Windows Azure Active Directory Sync tool. New user accounts must be created in both the local Active Directory and Office 365. You must import user account data into Office 365 daily. You need to import the new users. What should you do? A. Use the Office 365 admin center to import the file. B. Create a Windows PowerShell script to import account data from the file into Active Directory. C. Use the Windows Azure Management Portal to import the file. D. Create a Windows PowerShell script that uses the MSONline module to import account data from the file. Answer: B QUESTION 53 Drag and Drop Question An organization plans to deploy an Office 365 tenant. The company has two servers named SERVER1 and SERVER2. SERVER1 is a member server of the Active Directory forest that you are synchronizing. SERVER2 is a standalone server. Both servers run Windows Server 2012. You need to use the Windows Azure Active Directory Sync tool to provision users. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer Area

- Install and run the Windows Azure Active Directory Sync tool on SERVER2.
- From the Office 365 admin center, activate directory synchronization.
- Install and run the Windows Azure Active Directory Sync tool on SERVER1.
- Activate all synchronized users.
- Install Active Directory Domain Services (AD DS) on the member server.

Answer:

Answer Area

- From the Office 365 admin center, activate directory synchronization.
- Install and run the Windows Azure Active Directory Sync tool on SERVER1.
- Activate all synchronized users.

QUESTION 54 An organization prepares to implement Office 365. You have the following requirements:- Gather information about the requirements for the Office 365 implementation. - Use a supported tool that provides the most comprehensive information about the current environment. You need to determine the organization's readiness for the Office 365 implementation. What should you do?

- A. Run the Windows PowerShell cmdlet Get-MsolCompanyInformation.
- B. Run the OnRamp for Office 365 tool.
- C. Install the Windows Azure Active Directory Sync tool.
- D. Run the Office 365 Deployment Readiness Tool.

Answer: B
 QUESTION 55 Drag and Drop Question A company plans to implement an Office 365 environment to manage email. All user accounts must be configured to use only a custom domain. You need to provision an Office 365 tenant for the company. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

QUESTION 56 A company plans to use Office 365 to provide email services for users. You need to ensure that a custom domain name is used. What should you do first?

- A. Add the custom domain name to Office 365 and then verify it.
- B. Verify the existing domain name.
- C. Create an MX record in DNS.
- D. Create a CNAME record in DNS.

Answer: A
 QUESTION 57 You create an Office 365 tenant. You assign administrative roles to other users. You hire a new user named User2. User2 must NOT be able to change passwords for other users. You need to assign an administrative role to User2. Which role should you assign?

- A. Service administrator
- B. Global administrator
- C. Delegate administrator
- D. Password administrator

Answer: A
 QUESTION 58 Hotspot Question You are the Office 365 administrator for your company. User1 leaves the company. You must delete the account for User1. In the table below, identify when each type of data will be deleted. Make only one selection in each column. Each correct selection is worth one point.

User1 Exchange Online mailbox	Documents Created by User1 on SharePoint Online
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>

Answer:

User1 Exchange Online mailbox	Documents Created by User1 on SharePoint Online	Timeframe
<input type="radio"/>	<input checked="" type="radio"/>	Never removed
<input type="radio"/>	<input type="radio"/>	Removed immediately
<input checked="" type="radio"/>	<input type="radio"/>	Removed after 30-day grace period
<input type="radio"/>	<input type="radio"/>	Removed after 90-day grace period

QUESTION 59 Hotspot Question A company has an Active Directory Domain Service (AD OS) domain. All servers run Windows Server 2008. You have an on-premises Exchange 2010 server. The company plans to migrate to Office 365. In the table below, identify the required action for each phase of the pilot. Make only one selection in each column. Each correct selection is worth one point.

point.

Planning Phase	Migration Phase	Project Action
<input type="radio"/>		Assign licenses to users.
<input type="radio"/>		Prepare the on-premises Active Directory for directory synchronization.
<input type="radio"/>	<input type="radio"/>	Raise the forest functional level to Windows Server 2008.
<input type="radio"/>	<input type="radio"/>	Upgrade the Exchange server to Exchange 2013.

Answer:

Planning Phase	Migration Phase	Project Action
<input type="radio"/>		Assign licenses to users.
<input checked="" type="radio"/>		Prepare the on-premises Active Directory for directory synchronization.
<input type="radio"/>	<input type="radio"/>	Raise the forest functional level to Windows Server 2008.
<input type="radio"/>	<input type="radio"/>	Upgrade the Exchange server to Exchange 2013.

QUESTION 60 Drag and Drop Question You are the Office 365 administrator for your company. The company has Office 365 Enterprise E3 licenses for each of its 250 employees. The company does not allow email or Lync Online licenses to be assigned to external contractors. User1 is an external contractor who requires access to SharePoint and Office Web Apps only. You need to add a license for User1's account. What should you do? To answer, drag the appropriate action to the correct location or locations. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

- Select the purchase services option.
- Select the licensing option.
- Select the users and groups option.
- Enable External Users in Office 365.
- Add an Office 365 Enterprise E3 license for User1.

Answer:

Step	Action
1.	Sign in to the Office 365 admin center.
2.	Select the purchase services option.
3.	Add an Office Web App with SharePoint (Plan 1) plan.
4.	Select the users and groups option.
5.	Assign licenses to User1.
