Users report that they have received significantly more spam messages over the past month than they normally receive.You need to analyze trends for the email messages received over the past 60 days. From the Office 365 admin center, what should you view? A. The Mail protection reportsB. The Mailbox content search and hold reportC. Messages on the Message center pageD. The Office 365 Malware detections in sent mail report Answer: AExplanation:Use mail protection reports in Office 365 to view data about malware, spam, and rule detections.If you're an Exchange Online or Exchange Online Protection (EOP) admin, there's a good chance you'd like to monitor how much spam and malware is being detected, or how often your transport rules are being matched. With the interactive mail protection reports in the Office 365 admin center, you can quickly get a visual report of summary data, and drill- down into details about individual messages, for as far back as 90 days.

The disclaimers explain that any transmissions that are received in error should be reported back to the sender. You track any confidential documents that are attached to email messages.Your security team reports that an employee may have mistakenly sent an email message that contained confidential information.You need to identify whether the email message included the disclaimer and whether it contained confidential information.Which two options should you configure? To answer, select the appropriate objects in the answer area.

Answer:

QUESTION 14A company deploys an Office 365 tenant in a hybrid configuration with Exchange Server 2013. Office 365 users cannot see free/busy information that is published from the on-premises Exchange Server. In addition, Exchange Server users cannot see free/busy information that is published from Office 365. You need to troubleshoot why users cannot access free/busy information from both Office 365 and Exchange Server 2013. Which tool should you run? A. The Hybrid Configuration wizard B. The Remote Connectivity Analyzer with the Exchange Server tab selected C. The Microsoft Connectivity Analyzer Tool D. The Remote Connectivity Analyzer with the Office 365 tab selected Answer: D

QUESTION 15 You are the Office 365 administrator for your company. Users report that they cannot sign in to Lync from their mobile devices, but they are able to send and receive Lync messages by using their laptop computers. You need to troubleshoot the issue. What should you do? A. From the Office 365 message center, confirm Lync settings. B. Use the Microsoft Connectivity Analyzer tool to confirm settings. C. Confirm Lync user licenses for the affected users. D. From the Lync admin center, verify the external access settings. Answer: B

QUESTION 16 An organization migrates to Office 365. The Office 365 administrator must be notified when Office 365 maintenance activities are planned. You need to configure the administrator's computer to receive the notifications. What should you configure? A. Office 365 Management Pack for System Center Operations Manager B. Service requests C. Service health page D. Office 365 Service Health RSS Notifications feed Answer: D Explanation: <http://technet.microsoft.com/en-us/library/office-365-service-health.aspx>

QUESTION 17 Your company deploys an Office 365 tenant. You need to ensure that you can view service health and maintenance reports for the past seven days. What are two possible ways to achieve this goal? Each correct answer presents a complete solution. A. Run the Microsoft Online Services Diagnostics and Logging (MOSDAL) Support Kit. B. View the service health current status page of the Office 365 admin center. C. View the service settings page of the Office 365 admin center. D. Subscribe to the Office 365 Service Health RSS Notifications feed. Answer: B Explanation: Again tricky question, because MOSDAL is not available anymore http://community.office365.com/en-us/w/diagnostic_tools/default.aspx, and I'm not sure if they update correct answer. By other possibilities, B is 100% correct, C is completely wrong, RSS feed are giving all the info and they are staying in Outlook, so you just need to check feeds for last 7 days. I would go with B and D. !!!RECOMMEND!!!
